I. Letter to Shareholders

Dear Shareholders:

First of all, thank all shareholders for full support of the company in the past year. The operating performance in 2019 and the business plan for 2020 are reported as follows:

1. Operating Performance in 2019

The consolidated sales revenue of Ablerex is NTD 2,462,390 thousand in 2019, which decreased 2.70% comparing to the sales revenue NTD 2,530,613 thousand in 2018. The consolidated net income is NTD 40,555 thousand in 2019, which decreased 45.87% compared to the net income NTD 74,916 thousand in 2018. (As the following table)

Unit: NT\$ thousands

Item	2019	2018	Growth Rate (%)
Sales Revenue	2,462,390	2,530,613	-2.70%
Gross profit	573,933	611,560	-6.15%
Operating income	25,864	84,632	-69.44%
Net income	40,555	74,916	-45.87%
Profit attributable to parenting company	39,500	73,156	-46.01%
EPS(NTD) – After tax	0.88	1.63	-46.01%

2. Implementation of business plan in 2019

Revenue, from sales and service in 2019 totaling NTD 2,462,390 thousand, decreased NTD 68,223thousand (2.70%), comparing to the annual revenue NTD 2,530,613 thousand in 2018. In comparison of sales revenue from the five main product categories in 2 years, except revenue from UPS and PV inverter and other products (components and battery, etc.) some percentage growth than in 2018. Among them, the others of revenue got the best growth rate, but the uninterrupted power system got the largest growth amount; APF and project revenues got declined, of which the project fell by more than NTD100 million, which mainly caused the revenue declined compared with it in 2018.

The operating costs in 2019 totaling NTD 2,436,526 thousand, decreased NTD 9,455 thousand (0.39%), comparing to NTD 2,445,981 thousand in 2018. Among them, the operating cost decreased by NTD 30,596 thousand along with the decrease of operating income, and the operating expenses increased by NTD 21,141 thousand compared with 2018. The increasing of operating expenses was mainly due to the increasing of sales expenses as well as management expenses.

The company's 2019 major business performance indicators are as follows:

Unit: NT\$ thousands

Item	2019	2018	Growth Rate(%)
Return on Assets	1.62%	2.82%	-1.10 ppts
Return on Shareholders' Equity	2.69%	4.83%	-2.14 ppts
Operating Income to Capital Stock	5.75%	18.81%	-13.03 ppts
Profit before Tax to Capital Stock	9.63%	23.12%	-13.49 ppts
Net Profit Margin	1.65%	2.96%	-1.31 ppts
EPS (NTD)-after tax	0.88	1.63	-46.01%

Although the company's annual sales gross profit margin (23.31%) decreased slightly by 0.86% than in 2018 (24.17%), and the operating expense ratio increased by 1.44% than in 2018, resulting in a decrease in the overall business profit. It results in a decline in both the net profit and the net profit rate for the whole year, and the performance of related assets and management performance indicators were worse than in 2018.

3. Business Plan for 2020

A. Business guidelines

In the business, Ablerex continues to adopt a strategy tailored to local conditions, implement localized operations, strive to be close to the market, and quickly respond to customer needs. In product development, establish a materials database, strengthen the function of the R & D technology exchange platform, improve the effectiveness of the R & D team's experience inheritance and technology sharing, and accelerate the speed of product development. In manufacturing, optimize supply chain management, ensure that timely and compliant materials are obtained at reasonable prices, and improve inventory turnover; participate in product design and development to synchronize production process planning and shorten product transfer time; adjust production processes and increase the proportion of automation To improve production efficiency and product quality.

B. Sales Forecasts and basis

The company is a professional power electronics product and service provider. In addition to continuing to expand the ODM and OBM sales business of the international market of uninterruptible power systems, it is also actively participating in domestic uninterruptible power system project engineering bids and providing maintenance services, and selling its own brands Solar power converter. According to research by research institutes, there is room for growth in the global uninterruptible power system market and the domestic solar market. The company will aim to increase overall profitability, increase sales and sales of various products, and actively increase the sales of various products. market share.

C. Major production and sales strategy

1. Production strategy :

Optimize the management of the supply chain to ensure the quality of the supply, reduce the inventory of stock and meet the needs of flexible production; adjust the

production process, increase the proportion of automation, and improve production efficiency and product quality.

2. Sales strategy :

Adopt strategies tailored to local conditions, implement localized operations, strive to be close to the market, strengthen potential customer development and relationship maintenance, and quickly respond to customer needs and strengthen after-sales service, improve customer satisfaction, and stabilize the market position.

D. Research and Development Status

Adhering to the belief of "technical independence", the company continues to invest in the application research and product design of three-phase, high-order, high-capacity power electronics technology. It has successively completed the improvement of power quality and efficiency, and the development of energy storage products; at this stage, it will strengthen internal Technology exchange platform function, complete knowledge management (KM) function, to shorten the development time, improve the efficiency of research and development, and then reduce product costs, in order to quickly respond to market trends and meet customer needs.

4. The impact of the External Competitive Environment, Regulatory Environment, and Macroeconomic Conditions

A. External Competitive Environment

UPS is a mature and highly competitive industry. The middle and high-end product market is monopolized by a few large European and American brands and continues to consolidate its market position through mergers and acquisitions. The low-end product market is a highly competitive Red Sea market; As for PV Inverter, due to the vast advantages of the application market, mainland manufacturers have risen rapidly in recent years, and have become a powerful force in the market. They have led to continued decline in product prices and intensified market price competition. However, product applications and follow-up services are highly local, so It is difficult for international manufacturers to operate in multinational markets if they cannot conduct localized operations in the target market.

B. Regulatory Environment

The company follows national policies and laws and international norms, executes various operating activities, and does grasp changes in important policies, laws, and regulations. It adjusts the company's internal systems and operating activities in a timely manner to meet the specifications and ensure the smooth operation of the company. At present, the company has no significant impact on finances and business due to changes in domestic and foreign regulations.

C. Macroeconomic Conditions

At the end of 2019, New Crown Pneumonia broke out in China. As of the writing date (end of March 2020), the epidemic has spread to all countries in the world, casting a shadow on the global economic outlook. Enterprises are not only facing the impact from

the supply chain, The impact of reduced consumer demand has prompted many international organizations and financial institutions to lower their global economic growth estimates for this year. It is even more worrying that if the epidemic is not controlled in the short term, the global economy may postpone recovery.

The Organization for Economic Cooperation and Development (OECD) in March has lowered its global growth forecast for 2020 to 2.4%, which is 0.5 percentage point lower than the previous forecast.

The impact of enterprises on the epidemic mainly comes from two aspects. One is the supply chain shock from factory closures, worker isolation and component shortages. In addition, delays in public activities and heightened panic have led consumers to reduce travel, eat out and shop around, which has caused a sharp drop in demand. The combination of the two effects is likely to push the global economy into a downward vicious cycle of self-reinforcement and will lead to increased market turbulence.

5. Development Strategy

Facing the new crown pneumonia epidemic, in the short term, AblereX will prioritize stability. Under the premise of ensuring a win-win situation, the company will discuss with customers measures to mitigate the operational impact caused by the epidemic as much as possible to survive the storm. In the long run, the company will continue to optimize mature products and provide cost-effective products to customers; and demonstrate long-term rooted R & D strength and application experience in the power electronics field, complying with "open source (multiple sources) throttling (improving use efficiency)) "Trend, providing products such as renewable energy power generation equipment (light energy, wind power converters), monitoring systems, energy storage systems (ESS).

Looking forward to 2020, AblereX's management team will continue to uphold: (1) focus on the industry and customers first; (2) research and development innovation, technological independence; (3) benefit shareholders and care for employees; (4) strengthen corporate governance and pursue sustainable development, The four major beliefs, focusing on the development and production of power electronics products for power conversion applications, and related service provision; pursuing reasonable operating profits, taking care of employees and giving back to shareholders, and taking into account the interests of various stakeholders, and fulfilling corporate social responsibility, The foundation of the company's sustainable development is laid, and it continues to move towards the goal of "AblereX, Experts in Power Conversion".

All the best,

Chairman and CEO

Wen Hsu

II. Company Profile

2.1 Date of Incorporation: Apr. 27, 1998.

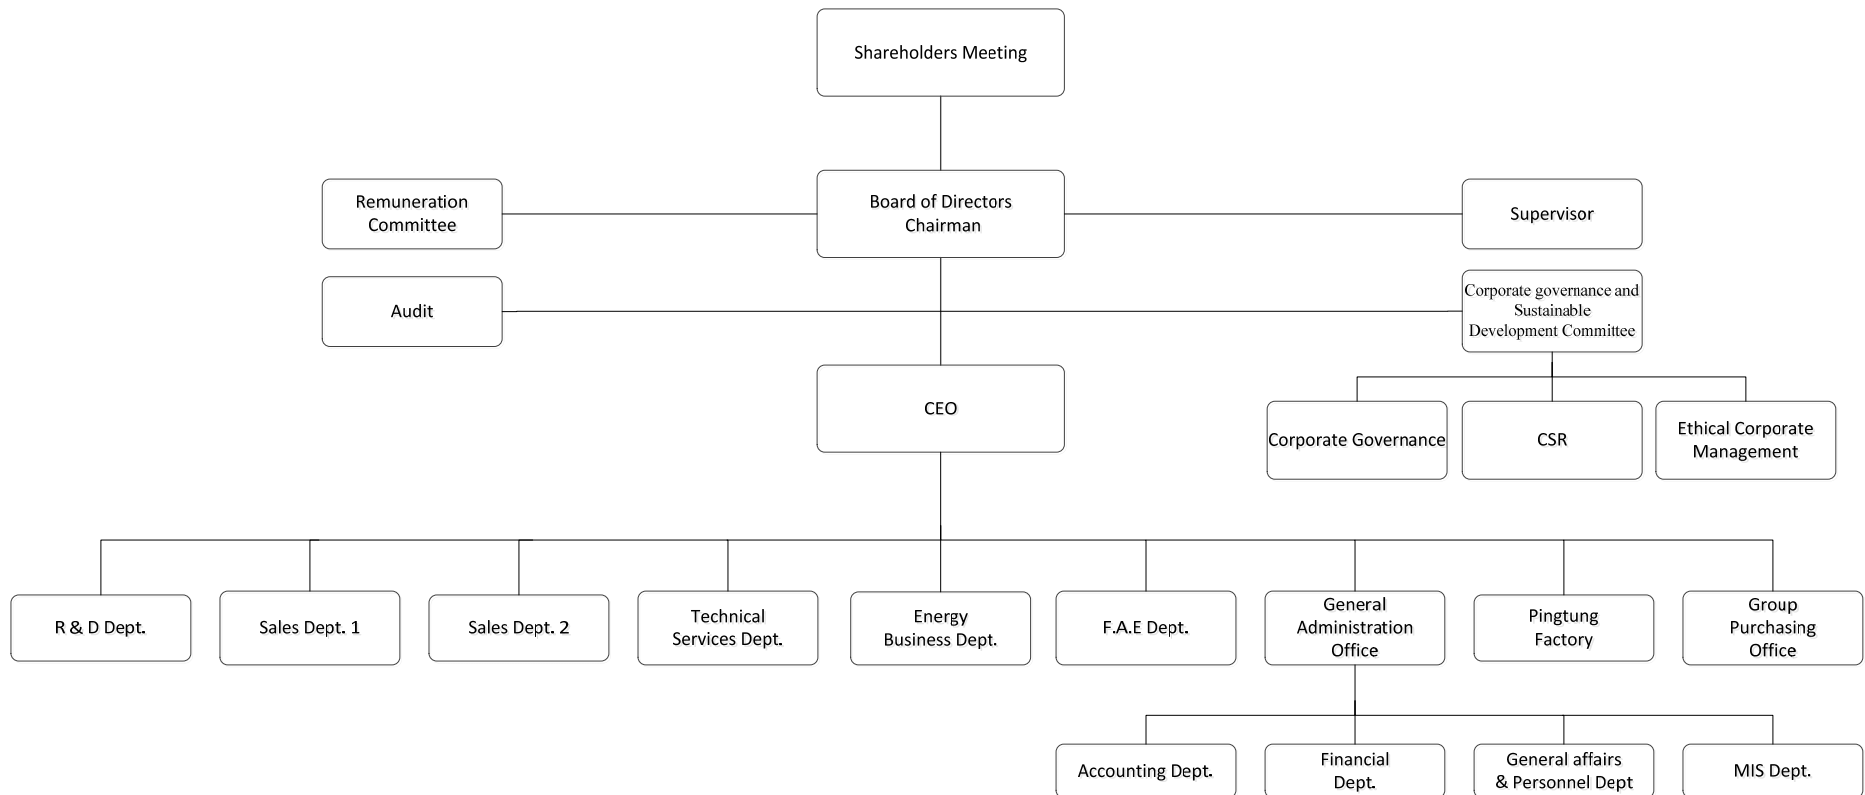

2.2 Company History

2018	Set up Ablerex Latam Corp. in US for Latin America market
2017	Invest Ablerex Electronics (Thailand) Co., Ltd. for own branded products in Thailand
2016	Set up Wada Denki Co., Ltd. in Japan
2016	Invest New Office for Xinchu office
2013	Set up New Building for U.S. Office
2012	New Factory at Pingtung Taiwan for 3 phase product.
2010	Public Listed on OTC market Increased Capital to USD 15M (NTD450M)
2009	Set up Beijing office and Italy office Listed on Emerging Stock Market
2008	Set up RD center in Kaohsiung Invest Singapore Company Set up 2nd-owned Factory in Suzhou, China Public offering in Taiwan Stock Market
2006	Set up USA office.
2005	Set up 1st-owned Factory in Suzhou, China.
2004	Increased Capital to USD 10 M (NTD 310 M)
2002	Merged with UIS Abler Electronics Co., Ltd. and rename Ablerex Electronics Co., Ltd.
2001	Start to set up Production facility in Suzhou, China
1994	Set up PEC TECHNOLOGY CO., LTD

Note 1: Regardless of whether the check box is "Yes" or "No", it should be stated in the summary description field.

Note 2: Board diversity goals and implementation

Professionalism and independence of the board of directors:

The Company set forth "Corporate Governance Best-Practice Principles" and "Procedures for Election of Directors and Supervisors". The selection of directors of a company shall take into consideration the overall configuration of the board of directors. In order to achieve the ideal goal of corporate governance, the members of the board of directors should generally have the knowledge, skills and accomplishments necessary to perform their duties. Their overall capabilities should be as follows:

1. Ability to make operational judgments.
2. Ability to perform accounting and financial analysis.
3. Ability to conduct management administration.
4. Ability to conduct crisis management.
5. Knowledge of the industry.
6. An international market perspective.
7. Ability to lead.
8. Ability to make policy decisions.

Directors shall have majority seats and shall not have a kinship relationship such as a spouse or second relative. The company may set up more than two independent directors in accordance with the articles of association, and it shall not be less than one fifth of the number of directors.

Board diversity Goals

Article 20 of the "Corporate Governance Best-Practice Principles" and Article 3 of the "Procedures for Election of Directors" states that the composition of the board of directors should consider diversity and formulate an appropriate diversification policy based on its own operations, operating patterns and development needs, should include but not limited to the following two major aspects:

1. Basic conditions and values: gender, age, nationality and culture.
2. Professional knowledge and skills : such as professional background (law, accounting, industry, finance, marketing or technology), professional skills and industrial experience.

The company set up its goals based on the board's diversification policy. It hopes that the background of future board members will include one seat for female directors, one-third for independent directors, one-third for directors with employee background, and one for legal or scientific professionals so as to improve board diversity and

corporate governance.

The company currently has 7 seven directors, including three employee directors (42.9% of the directors 'seats) and two independent directors (28.6% of the directors' seats). The members have extensive experience in business management, industrial knowledge, financial accounting, and environmental protection. Hope to realize the diversity goals of female directors and board of directors with a major in law and risk management in future. Please refer the table below :

Diversity situation for Board members

N

Note 4 : The implementation of Corporate Governance Officer in 2019 is as follows :

Although the company is not required in the list to set up a corporate governance officer, based on strengthening corporate governance and other management matters, a comprehensive corporate governance organization was arranged. The company newly set up a Corporate Governance and Sustainable Development Committee in 2017 ahead of the regulation and it is stipulated that the Chairman's special assistant be appointed as the Corporate Governance Officer to serve as the convener of the committee, the company's Corporate Governance, Corporate Social Responsibility and ethical management teams shall be organized to respond to the increasing number of governance-related matters.

To comply with the statutory requirements, the company passed the board of directors' resolution on August 5, 2019 to appoint the special assistant to chairman as the corporate governance officer to protect shareholders' rights and strengthen the board's functions. Damon Chao, special assistance to Chairman, has possessed more than three years of experience in legal affairs and corporate governance in public listed companies, which meets the requirements and regulation.

Eligible conditions are detailed on our website: http://www.ablerex.com.tw/ch/csr_2_7_1.php ,

In compliance with the legal training requirements in 2019, as detailed on our website: http://www.ablerex.com.tw/ch/csr_2_7_3.php

The main function of the corporate governance officer are to handle board and shareholder meeting related matters in accordance with the law, produce board and shareholder meeting records, assist directors and supervisors in their appointments and continuing education, provide directors and supervisors with information needed to perform business, assist directors, and monitor People follow statutes, etc.

The implementation in 2019 is as follows :

1. Assist independent directors and general directors in performing their duties, provide required information and arrange directors' further education:
 - (1) For the revision of the company's business areas and the latest laws and regulations related to corporate governance, provide board members when they take office and update them regularly.

- (2) Review relevant information confidentiality levels and provide company information required by directors to maintain smooth communication and communication between directors and business executives.
 - (3) Independent directors, in accordance with the Code of Corporate Governance Practice, assist in arranging relevant meetings when the internal audit supervisor or visa accountant meets individually to understand the needs of the company's financial business.
 - (4) Assist independent directors and general directors to formulate annual training plans and arrange courses in accordance with the company's industrial characteristics and director's academic and experience background.
2. Assist the board of directors and shareholders in meeting procedures and resolutions and compliance matters:
 - (1) Report to the board of directors, independent directors, audit committee or supervisors the status of the company's corporate governance operations, and confirm whether the company's shareholders meeting and the board of directors are in compliance with relevant laws and corporate governance codes.
 - (2) Assist and remind directors of the laws and regulations to be followed when carrying out business or making a formal resolution of the board of directors, and make suggestions when the board of directors will make an illegal resolution.
 - (3) After the meeting, it is responsible for checking the release of important information on important resolutions of the board of directors, ensuring the legality and correctness of the content of the heavy news, and ensuring the equality of investor transaction information.
 3. The board of directors shall be informed of the drafting of the agenda of the board of directors seven days in advance, and the meeting shall be convened and the meeting materials shall be provided. If the issue of interest is to be avoided, a reminder shall be given in advance, and the minutes of the board meeting shall be assisted to be completed within 20 days after the meeting.
 4. Assistance with the pre-registration of shareholders' meetings in accordance with the law, preparation of meeting notices within the statutory deadline, the proceedings of the meeting, the proceedings, the integration of the contents of the annual report, and the amendment of the articles of association or the election of directors for change registration.
 5. Preparation for the establishment of Audit Committee and related matters, gradually improving the establishment of the English version of Corporate Governance regulations, implementation of performance evaluation assessment of the board of directors, continuous and regular or irregular training and education to colleagues, preparation and uploading of the 2018 CSR report.

3.4.5 Corporate social responsibility and Best-practice implementation status deviation and reason for TWSE/TPEX Listed Companies:

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
1. Does the company conduct risk assessments of environmental, social and Corporate Governance issues related to the company's operations in accordance with the materiality principle, and formulate relevant risk management policies or strategies?			In order to improve and implement the management functions for the operating environment, society and Corporate Governance, the company has set up a "Corporate Governance Sustainable Development Committee", which has Corporate Governance teams, corporate social responsibility teams and integrity management teams to promote and evaluate related affairs. Developed the "Code of Corporate Governance Practices", "Code of Corporate Social Responsibility Practices" and "Code of Supplier Social Responsibility" as the basis for Corporate Governance and performance of social responsibilities, and tracked the implementation situation. Annual audit plans are included in the audit Times to ensure implementation and effectiveness review or improvement of reference basis.	In accordance with Article 1, 5, 6 and 9 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”
2. Does the company establish Full-Time (or Part-Time) units, which are authorized by and report to the Board of Directors, to be in charge of proposing and enforcing the corporate social responsibility policies?	V		Under the supervision of the Board of Directors, the Company set up the “Corporate Governance and Sustainable Development Committee” in accordance with the Corporate Governance Evaluation Indicators on 2018.5.2. The Company set up a Corporate Governance Officer from 2018.12.1 and approved by Board of Directors and the officer shall be in charge of all relative provision amendment of “Corporate Social Responsibility Best-Practice Principles” and all promotion of the relevant business. After the implementation of the announcement,	In accordance with Article 7 and 9 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
			the previous tasks will continue to arrange education training or promotion operations, so as to promote the implementation of corporate social responsibility policies for all employees and related parties, and continue to report the results of compliance in the board of directors every year, so as to implement corporate social responsibility.	
3. Environmental issues (1).Does the company establish an appropriate environmental management system based on its industrial characteristics?	V		(1).The company establishes and obtains ISO14000 environmental management system certification according to industry characteristics, strengthens the management of environmental and environmental protection in the plant area, and implements management and treats the environment with actions. In addition, wastes, scraps, and waste generated during the production process are subject to relevant regulations and the competent recyclers are required to recycle the waste. And issue the supplier/outsourcer's social responsibility commitment letter to reply, in order to invite the upstream manufacturers to jointly establish and coordinate the implementation of environmental protection, and move toward the green concept.	In accordance with Article 13 and 14 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(2). Is the company committed to improving the utilization efficiency of various resources and using recycled materials with low impact on the environment?	V		<p>(2). The company is committed to the production and development of energy-saving products. In 2018, Yingzheng Yushun estimated two main products, a single-phase uninterruptible power system and a three-phase uninterruptible power system, which can help customers save 268,797 kWh in total, which can reduce about 148.91 Tons of greenhouse gas emissions. In addition, since the solar inverter introduced in 2018 is an initial product, and there is no internationally recognized regulatory energy efficiency standard, it is not possible to quantify energy efficiency; however, this model (ES7200HC) is a new product developed to meet the market's solar template specifications. Based on the 320W solar template, the overall module matching rate is nearly 98%, which can improve the matching loss caused by specifications, voltage and capacity restrictions of other models, and effectively improve the efficiency of solar power generation.</p> <p>In addition to the inability to quantify the energy savings of solar inverters, the number of products and shipments of three-phase uninterruptible power systems in 2018 were lower than in the previous year, which was the main reason for the reduction in energy conservation contributions this year. (For specific practices and environmentally friendly products, please refer to the 2018 CSR report of the company P.40. ~ 47.)</p>	In accordance with Article 12 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(3) Does the company assess the potential risks and opportunities of climate change for the company now and in the future, and take measures to respond to climate-related issues?	V		(3). Corporate sustainable development and social responsibility have always been our commitments and obligations since the company was founded. For the potential risks and opportunities of climate change, the company introduced greenhouse gas inventory operations in 2018, and formulated response measures such as greenhouse gas inventory, wastewater and waste management, and compliance with environmental regulations to analyze the status of greenhouse gas generation and analyze The data is used for subsequent setting of greenhouse gas reduction performance.	No major deviation
(4) Does the company statistical analysis the greenhouse gas emissions, water consumption and total weight of waste in the past two years, and formulate policies on energy conservation and carbon reduction, greenhouse gas reduction, water consumption or other waste management?	V		(4). The company introduced greenhouse gas inventory operations in 2018, and formulated response measures such as greenhouse gas inventory, wastewater and waste management, and compliance with environmental regulations. For the past two years, greenhouse gas emissions, water consumption, and total weight of waste can be found in the company's 2018 Annual CSR Report P.53 ~ P.54) In order to cooperate with the promotion of energy conservation and carbon reduction policies, the Company has focused and implemented a number of energy conservation and carbon reduction measures. Example: The office controls the temperature of the air conditioner. Male colleagues do not wear a tie. In summer, the company issues short-sleeved breathable clothing and encourages colleagues to wear the same type of clothing.	No major deviation

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
			It is required to turn off the lights at hand, replace water-saving shower faucets, use energy-saving lamps, and implement the concept of garbage classification and publicity for the earth. Specific improvement targets will also be developed in accordance with relevant regulations and actual conditions. In 2018, a greenhouse gas inventory operation was introduced to analyze the status of greenhouse gas generation and analyze the data for the purpose of setting the greenhouse gas reduction performance in the future.	
4. Social issues (1). Does the company formulate relevant management policies and procedures in accordance with relevant regulations and international human rights conventions?	V		(1). The company establishes rules of work such as "Working Rules" and "Corporate Social Responsibility Codes of Practice" based on the Labor Standards Law and related labor laws, providing management units and employees to follow, and providing stable and preferential treatment and complete educational training, promote the development system, and create a safe and healthy working environment to protect the legitimate rights and interests of employees. In the "Supplier's Social Responsibility Code", it has been stipulated that suppliers and contractors should abide by the relevant human rights provisions of the Labor Standards Law, include the prohibition of illegal employment of child labor, forced labor, inhuman treatment and discrimination, and follow relevant laws and regulations to formulate relevant management policies.	In accordance with Article 18 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(2). Does the company formulate and implement reasonable employee welfare measures (including compensation, vacation and other welfare, etc.), and appropriately reflect operating performance or results in employee compensation?	V		(2). The company has formulated the "Working Rules" in accordance with the Labor Law, which summarizes the chapters on salary, bonuses, working hours, vacations, attendance and assessment, and welfare measures, as well as the company's articles of association. If the company's annual profit is obtained, it should be based on that year. The performance situation provides 6% to 10% for employee compensation. In addition, the salary and remuneration committee considers the company's relevant policies, employee performance evaluation system and corporate social responsibility policy, and considers the salary and remuneration policies, systems, standards and structures into the salary and remuneration policy.	In accordance with Article 21 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”
(3). Does the company provide safe and healthy work environments for its employees, and organize training on safety and health for its employees on a regular basis?	V		(3). The company has set labor safety and health objectives and implementation plans, regularly organize employee health checks in accordance with regulations, and provide sports and leisure rooms and nursing rooms for employees. The production workshop regularly checks the noise intensity. It involves wearing safety shoes, labor safety propaganda, fire drills and drills in the heavy object area, and places relevant safety guidelines in the work environment, and provides protective equipment and emergency medicine to maintain employees. Safe. (For details, please refer to page 126 of the 2019 Annual Report)	In accordance with Article 20 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(4). Does the company have an effective career development training program for employees?	V		(4). The company provides professional training and timely adjustment of work content according to the nature of the employees' work, so as to increase their experience in applying what they have learned, and requires them to participate in external continuing or qualified refresher courses in accordance with laws and regulations to obtain relevant certificates or professional skills and strengthen their career Development capabilities. In addition, in the personnel evaluation and promotion, we also refer to the training and performance of employees, and actively encourage self-study and function enhancement to enable further integration between individuals, families, and work, and to cultivate talents, retain talents, and grow personally. Get a virtuous circle.	In accordance with Article 21 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(5). Regarding the health and safety of customers of products and services, customer privacy, marketing and labeling, does the company comply with relevant laws and regulations and international standards, and formulate relevant consumer protection policies and appeal procedures?	V		(5). The laboratory established by the company's research and development center cooperates with certification units to meet international energy efficiency standards to ensure that products can be legally sold in various regions around the world and meet customer and market energy-saving product specifications. Because the laws and regulations of different countries are different, the access methods of various electronic products must submit test reports or certificates in accordance with relevant local regulations. The company has established customer complaint processing procedures to provide transparent and effective consumer complaint procedures for products and services. In addition, the Corporate Social Responsibility Area is set up on the company's website, which includes the establishment of a stakeholder communication channel to facilitate consumer complaints and opinions expressed by various stakeholders. From 2016 onwards, the English Corporate Social Responsibility Area website is also available for foreign language stakeholders to think of a platform for further understanding of the company's business situation and providing complaints. Each year, we regularly implement customer satisfaction surveys, analyze and improve the results of the investigations, and conduct internal audits on these operations to ensure the implementation of this policy and related operations.	In accordance with Article 23 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(6). Does the company formulate a supplier management policy that requires suppliers to follow relevant regulations and issues regarding environmental protection, occupational safety and health, or labor rights?	V		(6). The company originally planned to have procedures such as "Supplier Evaluation Operating Procedures" and "Supplier Environmental Impact Operating Procedures", to evaluate the quality and environmental impact situation before trading with suppliers, and to confirm the actual situation. Separately set the "Corporate Social Responsibility Code" and "Supplier Social Responsibility Code", and evaluate new suppliers in accordance with regulations to determine whether they have affected the society in the past, and follow-up planning will further increase manufacturers' impact on environmental and social assessment bonus items(ISO -9001 & 14001, OHSAS18001, etc.), as an important reference for business dealings. By cooperating with suppliers and partners to build a green value chain, the company will jointly improve environmental protection, safety and health performance, and further establish a harmonious relationship of environmental sustainability and co-prosperity. Note 3	In accordance with Article 26 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”
5. Does the company refer to internationally-used reporting standards or guidelines, and compile reports such as corporate social responsibility reports that disclose the company's non-financial information? Did the previous disclosure report obtain the assurance or assurance of a third-party verification unit?			Corporate sustainable development and social responsibility have always been our commitments and obligations since the company was founded. Since 2015, the Company has proactively issued the annual publication "Corporate Responsibility Report of Ablere Electronics Co., Ltd.". In order to fully improve the quality of the report disclosure and be in line with international trends, the company's 2018 CSR report follows the guidelines of the Global Sustainability Reporting (GRI) Global Sustainability Report issued by the Global Reporting Initiative (GRI) in 2016 Compiled with rule. It is hoped that by adopting	In accordance with Article 29 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
			the "GRI Standards" (hereinafter referred to as the GRI Standards) program, the information disclosed in the report can better meet the expectations of stakeholders, and fully demonstrate the company's efforts to achieve sustainable development. Note 2	
<p>6. If the Company has established corporate social responsibility principles based on “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies”, please describe any discrepancy between the principles and their implementation:</p> <p>Ablerex has established corporate social responsibility principles based on “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies” and no discrepancy between the principles and their implementation.</p>				
<p>7. Note 3

Human rights policy

In order to promote the promotion of labor and business ethics policies, the company has adopted the principles and spirit of the Global Reporting Initiative's (GRI) Global Responsibility Report's 4th Generation Program (GRI G4). In addition to the implementation of human rights related policies, and in accordance with the government's "Labor Standards Act" and other related laws and regulations, the "work rules" are established to regulate the company's rights and obligations related to the human rights of employees. In order to protect the basic human rights and related rights and interests of employees, it is believed that every employee should be treated with fair humane treatment and respect, and established "control measures and punitive measures against sexual harassment" and provided a complaints pipeline to safeguard the rights and interests of female employees. This labor force's human rights policy is formulated so that the entire company will follow the principles of social responsibility and labor conditions of the relevant labor human rights. In addition, in order to fulfill its social responsibilities, we work hand-in-hand with our partners and set out the "Code of Supplier Social Responsibility" to expand our influence.

Comply with relevant local government regulations and international guidelines

The company has a detached ethical standard and must comply with relevant local government regulations and international standards and regulations. When implementing business activities, it should adopt standards that can provide employees with the greatest guarantees.

Normal employment relationship

The dismissal and disbursement of all employees of the company must comply with the relevant laws or regulations of the local country. No one may be forced to employ, crush, or hire involuntary prisoners, nor may one-sidedly release the employment contract. Before the supplier's employees are hired, they should provide explanations of employment conditions such as salary, and pay details during the payment period. They should not be considered as a means to punish employees. In overseas areas, wage payments should meet or exceed the laws of the local country.

Prohibit overtime work

The company's standard working hours are in accordance with the laws of the local country and the standards set by the industry it belongs to, and employees who are more favorable to the employees are employed. They are not allowed to ask their employees to

work overtime regularly. The employees should work overtime should be voluntary and should provide equal value. make up.

Child labor

The company must not illegally employ child labor, and it is absolutely prohibited that child workers work from 8 p.m. to 6 a.m. or engage in heavy and dangerous work in order to comply with the norms of the ILO Convention No. 138 and the UN Convention on the Rights of the Child. .

No discrimination

The company shall implement equality policies for all employees in accordance with their local laws and regulations, prohibiting any employment due to differences in race, social status, nationality, religion, age, disability, gender, marital status, sexual orientation, union, or political party for differences in salary, training, promotion, reappointment, or retirement.

Inhuman treatment is prohibited

The company prohibits personal injury, improper physical punishment, threats of physical, sexual and other harassment, verbal violence, or any other form of intimidation.

Respect employees' freedom of association and right of collective bargaining

The company respects the freedom of assembly and association of employees and the right to collective bargaining. According to China's trade union law, employees have the right to organize and join trade unions.

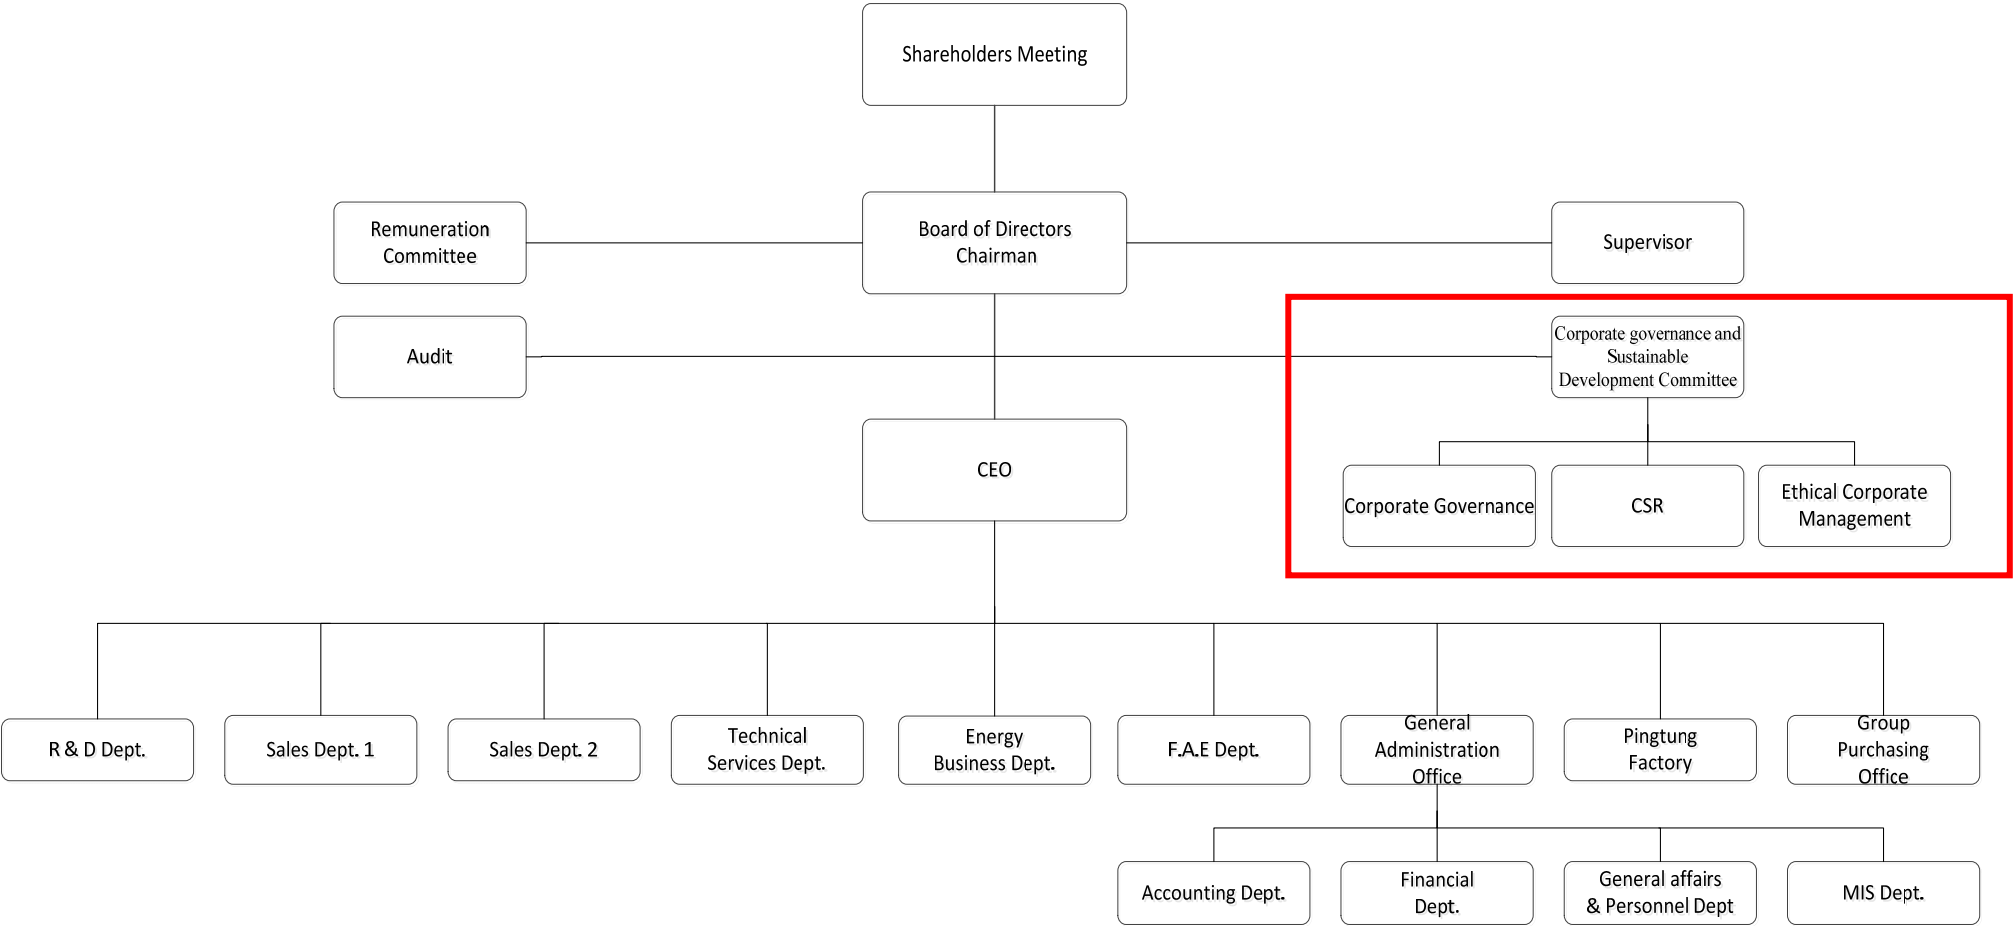

Note 4:

In order to improve and implement the company's management functions for environmental, social and Corporate Governance, the company has established the “Corporate Governance Perpetual Development Committee”, which includes the “Corporate Governance Group”, “Corporate Social Responsibility Group” and “Corporate Ethical corporate management Team”.

4.1.6 Dividend Policy and Implementation Status

A. Dividend Policy stated in the Articles of Incorporation:

- (1) As regulated in Article 25-1 of Articles of Incorporation in operation, when the annual final accounting statement shows earnings, the Company shall contribute 6-10% of earning as employee compensation and not more than 2% of earning as compensation as remuneration to directors and supervisors. But the company still has accumulated losses, should be made up. The remuneration to directors shall be Cash. Employees' compensation shall be made by stock or cash. It shall be held by the board of directors by attending more than two-thirds of the directors and attending a majority of the directors 'consent, and report to the shareholders' meeting. In addition to the employees of the Company, the employees of the Company shall pay the employees of the Company who meet certain conditions.

As regulated in Article 26 of Articles of Incorporation in operation, when the annual final accounting statement shows earnings, the Company shall contribute tax and compensate the accumulated loss of previous years, and then contribute 10% of earnings as legal reserve unless the accumulated legal reserve reached the amount of the capital of the Company. Secondly, the Company shall contribute to special reserve based on the laws or regulations of administrations, together with accumulated undistributed earnings as distributable earnings. If earnings remain, the Company shall retain part of earning before Board of Directors make a distribution proposal according to the operation conditions and submit the proposal to shareholders' meeting for resolution.

The distribution proposal proposed by the Board of Directors shall, under the consideration of no other special occasion, be no less than 65% of the after-tax earnings of current year in principles. As regulated in Article 26-1 of Articles of Incorporation in operation, distribution of shareholders' dividend could be in the form of cash or shares, which the cash distribution proportion to shareholders shall no less than 20% of shareholders' dividend.

The form and proportion of such earning distribution is based on the future fund needs of the Company and the long-term operation plan, which could be proposed by Board of Directors under the consideration of the current operation status with the balance of taking care of shareholders' rights, dividend policies, and planning fund demand, and submit to shareholders' meeting for adjustments and resolutions.

(2) Proposed Distribution of Dividend for this meeting of shareholders

Unit : NTD

Items	Amount	Description
2019 Net income after tax	39,499,778	
Add/Less: 2019 Retain earnings adjustments	-3,110,622	Old-version pension actuarial difference, recognition of changes in ownership interest in subsidiaries
2019 Net income (summation)	36,389,156	
Less: provision of legal reserve (10%)	-3,638,916	
Less: Special surplus reserve	-17,841,396	Appropriations on the debit balance of Other Stockholder's Equity-(Exchange Differences on Translation of Foreign Financial Statements)
Add: 2018 undistributed earnings	56,154,284	
2019 Distributable earnings	71,063,128	
Less: cash dividend to shareholders	31,500,000	NTD 0.7 cash dividend per share
Undistributed earnings	39,563,128	

Note:

1. The company's articles of Incorporation authorize the special resolution of the board of directors to distribute all or part of the earning to be distributed in cash and report to the shareholders' meeting.
2. This earning distribution proposal has been approved by Board of Directors' special resolution on Mar 19, 2020.

(3) Expectation of significant change on dividend policies: None.

4.1.7 Impact of the proposed stock dividend in shareholders meeting on business performances and EPS:

Board of Directors decided to distribute cash dividend from profit in 2019 and no stock dividend. The Company did not have financial forecast, so this clause is not applicable.

4.1.8 Compensation to employees, directors and supervisors

1. Information of dividend to employee and remuneration to directors and supervisors was stated in the Articles of Incorporation:

As stated in Article 25-1 of the Articles of Incorporation, the Company shall contribute not less than 6% of its annual earning as employees' compensation and not more the 2% as remuneration to directors and supervisors. But the Company shall compensate its accumulated losses first.

In addition to the employees of the Company, the distribution of employees'

bonus could include the employees of subsidiaries who meet certain conditions.

2. Accounting process applied to the estimation base of dividend to employees and remuneration to Directors, Supervisors, and employees, outstanding shares computing base for stock dividend distribution, and the spread between amounts distributed and estimated:

Compensation to employees estimated to be NTD 2,717 thousands and to Directors and Supervisors to be NTD 906 thousands is estimated 6% and 2% of annual earning in 2019, accordingly. The differences between actual distribution amount resolved by Board of Directors and the estimated amount will be adjusted as changes in accounting estimates.

3. Dividend distribution of employees resolved by the board of directors
 - a. Distribution amount of cash dividend and stock dividend to employees and remuneration to directors and supervisors:

Board of Directors has approved to distribute NTD 2,640 thousands as employees' remuneration in 2019 and NTD 870 thousands as remuneration to directors and supervisors. The distribution amount aforementioned is NTD 113 thousands less than the estimated amount reported in 2019. The main consideration is the need of adjustments in actual distribution operation. The differences between actual distribution and estimated amount reported will be regarded as changes in accounting estimates and be calculated in profit or loss in 2020.

- b. Proposed stock dividend to employees and its ratio to total net income of individual financial report and to total employees' remuneration:

Board of Directors has approved to distribute employees' compensation by cash, and no stock dividend is distributed to employees, so the ratio of stock dividend distributed to employees to total net income of individual financial report and to total employees' remuneration is zero.

4. Actual distribution of employees' bonus and remuneration of Directors and Supervisors:

The actual earning distribution of 2018 is as stated aforementioned. The differences NTD 9 thousands less than the recognized employees' compensation is mainly due to the distribution changes with profit, which has been adjusted in the profit or loss of 2019.

2018 Earnings Distribution

Item	Shareholders' Meeting approved on Dec. 31, 2018	on Board of Directors approved on Mar. 22, 2019	Difference	Cause of Difference
Remuneration of Directors and Supervisors	\$2,087	\$2,080	-\$7	Distribute practice tolerance
Employees' cash compensation	\$6,262	\$6,260	-\$2	Distribute practice tolerance

4.1.9 Buyback of Treasury Stock : None

4.2 Bonds : None

4.3 Preferred Shares : None

4.4 Global Depository Receipts : None

4.5 Employee Stock Options : None

V. Operational Highlights

5.1 Business Activities

5.1.1 Business Scope

(1) Main areas of business operations

- (1) Manufacturing and distribution of uninterruptible power system (UPS).
- (2) Manufacturing and distribution of active power filter.
- (3) Manufacturing and distribution of photovoltaic power inverter system.
- (4) Agent of large capacity UPS through project distribution and services.
- (5) Offering maintenance and technical services.

(2) Revenue distribution

Unit ; NT\$ thousands; %

Major Divisions	2018		2019	
	Total Sales	Total Sales	Total Sales	(%) of Total Sales
UPS	935,361	36.96%	986,409	40.06%
APF	156,369	6.18%	124,413	5.05%
PV	27,170	1.07%	32,670	1.33%
Project	1,060,839	41.92%	958,810	38.94%
Others	350,874	13.87%	360,088	14.62%
Total	2,530,613	100.00%	2,462,390	100.00%

(3) Main Products and Services

- (1) Independent R&D, manufacturing, and distribution of single-phase uninterruptible power system (commonly known as single-phase UPS or small UPS) at 20KVA (and below).
- (2) Independent R&D, manufacturing, and distribution of three-phase uninterruptible power system (commonly known as three-phase UPS or mid/large UPS) at 10KVA (and above).
- (3) Agent distribution of Europe's SOCOMEC three-phase uninterruptible power system (commonly known as three-phase UPS or mid/large UPS) at 15KVA (and above).
- (4) Independent R&D, manufacturing, and distribution of power quality improvement equipment – active power filter (abbreviated as APF, also known as active power harmonics conditioner).
- (5) Independent R&D, manufacturing, and distribution of green energy system photovoltaic inverter (PV Inverter), also known as solar inverter.
- (6) Design and manufacturing services for OEM/ODM/OIM (Original Innovative Management) models.
- (7) Maintenance and technical services for the aforementioned products.

(4) New Products Planned for Development

- (1) Development of new multi-function UPS technologies that incorporate features of miniaturization, intelligent, networking, and distribution.
- (2) Mid-sized and large three-phase high frequency parallel UPS

- (3) Power quality management technology
- (4) Hybrid system PV Inverter
- (5) Power management software technology
- (6) SmartGrids application related PDU
- (7) Wireless BMS
- (8) Energy storage system

5.1.2 Industry Overview

(1) Macroeconomic Environment

① Uninterruptible Power Supply (UPS)

With the rapid development of high-tech electronic products in recent years, the operation of procedure-control workstations computer and precision instruments at high-tech production facilities relies heavily on quality and reliable power supply in order to maintain normal operation. Poor power quality could result in erroneous action for precision equipment or even disruption of the manufacturing process, leading to severe losses. Common problems relating to power quality include voltage distortion, overvoltage, under voltage, power disruption, and so forth. And as such, ensuring high quality and reliable supply of power has become a vital issue for the power company and all users. In order to prevent issues of power disruption or unstable voltage, most users would incorporate uninterruptible power supply (UPS) systems to ensure power quality and in turn enhance the reliability of precision equipment operation.

Within their given electricity storage capacity, UPS is designed with power converter interface to supply the required power in the event of anomalies with the AC mains supply. And as such, UPS systems have been extensively used as the backup power solution for information, communication, and precision instruments to prevent sudden power failure from halting equipment operation, thereby improving the reliability of equipment operation. And as such, the demand for UPS has been continually growing.

UPS systems can generally be separated into three major categories: Off-line, On-line and Line interactive. These three types of UPS systems each has their own strengths, weaknesses, and suitable applications. Common Off-line UPS are typically single-phase low capacity products with relatively few functions, therefore are available at cheaper price points. Such products are generally used for PCs and other peripheral equipment. Designed with hot standby functionality, when AC mains supply is normal, the switch between the UPS and load would be activated in order to prevent the circulation of electrical current between the AC mains supply and the UPS system. However, should the main supply fail, the load would be exposed to a few milliseconds of power failure due to the transition of the switch. This would in turn lower the operating efficacy of the load. On-line UPS system operates by converting the AC power from the AC mains supply into DC power through a DC/AC inverter. A percentage of the DC power is stored into the battery charger while a part of the DC power is sent through a DC/AC inverter to be converted to steady, reliable AC power to be fed to the load. When in operation, an On-line UPS system features a two-stage power inverter between the load and AC mains supply. And as such, the quality of power from the load would not be susceptible to the influence of AC mains supply, making the On-line UPS the best

power protection solution for the load equipment. This explains why On-line UPS systems are frequently deployed for instruments and equipment that require power of better quality. However, since the power carried by the load on such UPS systems requires conversion through a two-stage inverter, the circuitry design would be more sophisticated and have lower efficacy. As for Line interactive UPS systems, such systems feature paralleled operation of the power inverter and AC mains supply as their technological basis, with the power inverter responsible for charging and discharging the battery at the same time. In other words, when the AC mains supply is working normally, its power will be directly sent to the load and charge the battery through the power inverter. When the AC mains supply fails, the stored power on the battery would be sent to the load through the power inverter. Such UPS systems feature relatively simpler system architecture and are relatively cheaper in cost. And since the load is directly powered from the AC mains supply when it is working normally, there will be no recurrent energy loss. However, the issue of conversion time still remains.

In recent years, in an effort to improve the efficiency of On-line UPS systems, in addition to adopting three-stage power inverters to handle the task of conversion, the system also features a new economic operation mode. In this mode, the DC/AC inverter of the UPS system would be set to hot standby, with the AC mains supply providing power directly to the load.

Table 1 Strengths and Weaknesses of the three UPS System Architectures

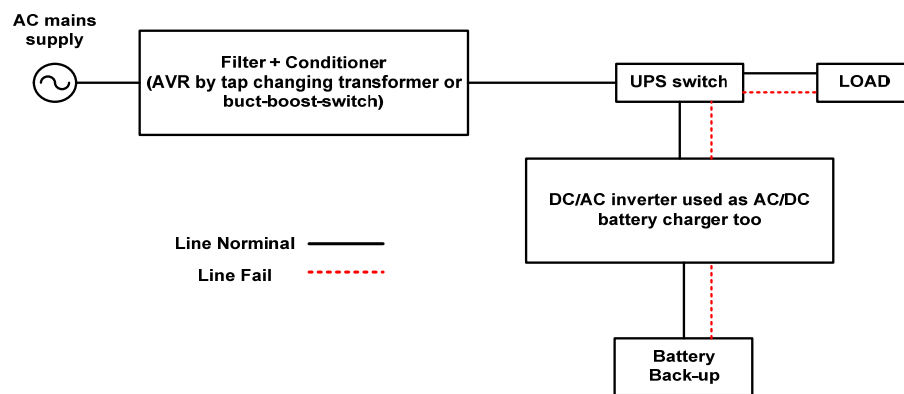

Type	Strengths	Weaknesses
Off-Line	<ol style="list-style-type: none"> 1. Simple circuitry 2. Higher power efficiency 3. Low cost, compact form factor 	<ol style="list-style-type: none"> 1. Brief power disruption (~1ms) 2. Lacks voltage stabilization function; power quality is susceptible to the effects of AC mains supply
On-Line	<ol style="list-style-type: none"> 1. No brief power disruption 2. Improves upon literally all existing issues of power quality with AC mains supply 	<ol style="list-style-type: none"> 1. Higher cost 2. Sophisticated control circuitry 3. Inferior efficiency
Line Interactive	<ol style="list-style-type: none"> 1. Simple circuitry 2. Low cost 	<ol style="list-style-type: none"> 1. Brief power disruption 2. Sophisticated control mechanism

A. Off-line

The architecture of an off-line UPS system primarily features an AC/DC charger, a battery, and a DC/AC inverter. When the line is normal, the required power comes directly from AC mains supply while a portion of the power goes through the AC/DC battery charger to charge the battery. Since the inverter is running without load, the quality of the power of load is determined directly by the AC mains supply. When the line fails, the inverter will convert the power from the battery to AC current and keep connected equipment running. Typical off-line UPS systems only provide backup power but do not improve power quality. In addition, when the line fails, the system will have a momentary lapse of switch transition. And as such, off-line UPS systems are not truly “uninterruptible” in the truest sense of the term due to its “instantaneous disruption”. When the voltage falls below the permitted value, the system will

C. Line-interactive

Line-interactive UPS systems operate on similar principles as off-line UPS systems, with the most distinctive feature of having a multi-tap variable-voltage autotransformer (i.e. operating as both an AC/DC inverter and a rectifier). In addition to charging the battery during normal operation, the autotransformer will automatically function as an inverter when AC mains supply fails to deliver power from the battery to the connected equipment. Since the product design did not include a bypass switch between the AC mains supply and the load, such system will still experience “instantaneous disruption” in the event of a power failure (with an extremely short response time between the disruption to battery power supply under 0.04 seconds). As line-interactive UPS systems output sine waves, they can work with more equipment compared to off-line UPS systems. With functionalities falling between off-line and on-line UPS systems, line-interactive UPS systems are more suited for the needs of small enterprises or website servers.

Line-Interactive UPS System

Within their given electricity storage capacity, UPS is designed with power converter interface to supply the required power in the event of anomalies with the AC mains supply. And as such, UPS systems have been extensively used as the backup power solution for information, communication, and precision instruments to prevent sudden power failure from halting equipment operation, thereby improving the reliability of equipment operation. Therefore, such products have definitive values in the market. Furthermore, with more and more electronic equipment and applications emerging in consumers' lives (such as cable TV, broadband internet access, wireless communication base stations, surveillance systems, security systems, and telematics), the UPS market that once did not exist, is now seeing gradual growth in demand. One can anticipate significant potential for growth for the UPS market in the near future. AblereX has been specializing in the development and manufacturing of UPS ever since its foundation, with a focus centered on the development of high-end on-line UPS that requires extensive technical know-how and great effort on continual improvement on the functionalities of our line-interactive UPS. We strive to

satisfy our customers' needs by achieving maximum performance with lower costs. This would prevent the company from engaging in a price war with other manufacturers in the low-end offline UPS product market.

② Active Power Filter (APF)

Due to the rapid development of power semiconductor component manufacturing technology and power electronic applications, power electronic equipment have been extensively used in different domains. Nevertheless, power electronic equipment have the inherent flaws of high input current harmonics and low input power factor, with harmonic currents being responsible for the deterioration of power quality. In recent years, precision equipment has been extensively used in different industries and such equipment has relatively high requirement for power quality. Consequently, the power company had to establish harmonics regulation standards to limit the amount of harmonic current generated by users in order to maintain the quality of power from the electricity distribution system.

Traditionally, passive power filters are designed with passive components such as inductors and capacitors. Due to their low price points, such products have been extensively used to mitigate harmonic currents. However, passive power filters have the following shortcomings: (1) Change of impedance in a power system could severely affect the characteristics of the filter. (2) Parallel resonance could occur between the power reactor and passive power filter and consequently amplifying the load's harmonic current, resulting in even greater harmonic current distortion. (3) Serial resonance could occur between the power reactor and passive power filter, which may in turn cause harmonic currents from other non-linear load to enter the passive power filter, resulting in an overload of the passive power filter. (4) Filter parameters are difficult to design due to the changes in system status or deviations of filter capacitance or inductance. (5) Filter characteristics cannot be fixed due to changes in load. Given these aforementioned shortcomings, active power filter had been developed in recent years as an alternative. An active power filter features a power transducer built with power semiconductor switching components such as GTO, IGBT, or power transistors. Active power filter not only solves the problem of harmonics but also compensates virtual work to convert the input current of AC mains supply to pure sine waves of the same phase as the AC mains supply voltage. An active power filter comprises three components: a converter, an energy storage component and a control circuitry. In the past, passive power filters have been used as a means to mitigate harmonics but the product still has notable drawbacks that current technologies cannot overcome. In contrast, active power filter was developed in recent years due to the advancement in power electronic technologies as to suppress harmonics while regulating harmonics and improving power factor.

Presently, there are three types of filters that are designed to suppress harmonics: 1. Traditional passive power filter (PPF), 2. Active power filters (APF) and 3. Hybrid power filters (HPF). The following section will provide brief descriptions for each type of power filter.

A. Passive Power Filter

Traditionally, passive power filter (PPF) comprises passive components including capacitors, reactors, and resistors. However, due to the characteristics

of specific passive components, PPFs do suffer from inherent drawbacks. For example, the result of harmonic absorption of a PPF may change along with any change in the system's impedance. In addition, when unknown external harmonic current enter the system or any change of the systems' load/additional harmonic load could cause the existing PPF to overload or resonate, thereby leading to accidents. In addition, power capacitors and inductors in PPFs have error margins. Increases in usage duration and temperature changes could cause the values of the power capacitor or inductor to shift and thereby impede its filtering capabilities. Not only those, the passive components are heavy and bulky, making PPFs requiring more physical space.

B. Active Power Filter

Active power filter (APF) is an AC/DC conversion equipment that applies relevant power electronic technologies. Depending on the load demand, APF would create a harmonic current that is of the opposite phase of that from the load and send it to the power system. The harmonic currents would cancel each other and achieve the filtering of harmonics. APF is therefore used to resolve destructive issues caused by harmonic currents, such as transformer overheat, voltage distortion, and machine failure. However, power electronic components of high power are restricted by their switching frequencies, and this result in specific limit of power capacity for APF.

C. Hybrid Power Filter

As both passive and active power filters have their limitations that are hard to overcome, products that combine features of both active and passive power filters were developed as a result. Such products are known as hybrid power filters (HPF). HPF incorporates a power transducer to improve upon the characteristics of PPF while resolving the issue of resonance. Compared to APFs, PPFs make it possible to reduce the capacity of the power transducer, rendering its application on larger capacity filter systems.

The exclusive technology we have developed for our APF feature immediate response control, which enables real-time compensation at any point during each current cycle to create a harmonic current that is the opposite of that of the load and send it to the power system. This harmonic current would cancel the harmonic current at the load, thus resulting in a current wave that is close to sine at the power system and thereby achieving harmonic filtering. Such rapid response capabilities make our APF ideal for equipment with substantial load changes, such as pumps used to maintain water or barometric pressure, high-end passenger/cargo elevators, and other high-tech industries. Presently, the world's APF market is dominated by US and Japanese manufacturers including FUJI, TOSHIBA, MERLIN, ABB and so forth, with no other leading manufacturers in Taiwan. With our immediate response control technology, our APFs have outstanding transient response capabilities that enable immediate compensation at any point during each current cycle, unlike other products designed for Fast Fourier Transform (FFT) that only output response after the load has changed and delayed for two cycles. In addition to breaking through the existing limits of current product architecture and technological deployment,

this technology is also compliant with pertinent international safety regulations, thereby allowing the company to distribute the products more extensively. We have essentially debunked the misconception that conventional high-spec products will inevitably fail in their safety regulation compliance and our APFs have proven to have a great competitive edge in the domestic market. Coupled with the latest 150A European/US standard series we have developed in 2012, our APFs are expected to bring positive boost to the company's operational growth in the near future.

③ PV Inverter

A. Current status of the global solar power market:

Compared to 2011, the demand for PV inverter in Europe has fallen significantly. But thanks to the explosive growth of the Chinese market, Ablerex managed to achieve a total of 31 GW in sales in 2012, translating to a growth margin of 5%. Nevertheless, the drastic decline in market prices has resulted in a decrease in real revenue for manufacturers.

According to IMS Research's prediction, the market for PV inverter will continue to grow, with more noticeable growth in demand in 2017. The demands for small business building PV system (usually between 10~100kW) and PV stations (typical installation of 500kW or higher) are expected to grow more significantly while the demand for residential PV system will be less apparent.

It is estimated that approximately 60% of the PV system installation in the future will take place in Asia, mainly China, and the majority of them would be PV stations. As for residential PV systems, Japan will be the only market that may promise some potential.

B. Types of solar PV systems

1. Stand-Alone System

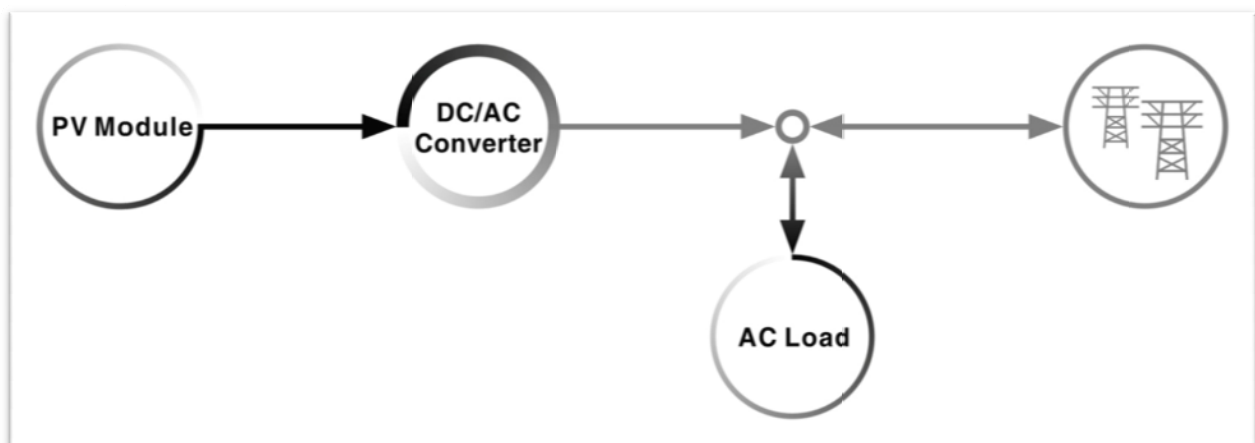

As its name implies, a stand-alone PV system is capable of generating the power that is required without having to be connected to the power distribution grid of the power company. Since the system will not be able to generate electricity in the absence of sunlight at night or in poor weather, stand-alone systems have incorporated battery banks that store power when there is ample sunlight in order to ensure stable supply of power. Stand-alone systems are primarily installed in regions where the power grid is hard or unable to reach (i.e. remotely populated mountainous regions or offshore islands). Such systems are also commonly installed to function as small power systems for road displays, billboards, road lights, and other illumination equipment.

Architecture of Stand-Alone System

2. Grid-Connected System

A Grid-connected system generates power in a parallel connection with the city power grid. The system would generate power for the load and the power company will cover the insufficient part of power. With such system, the city power grid can be perceived as an infinitely large and everlasting free battery bank.

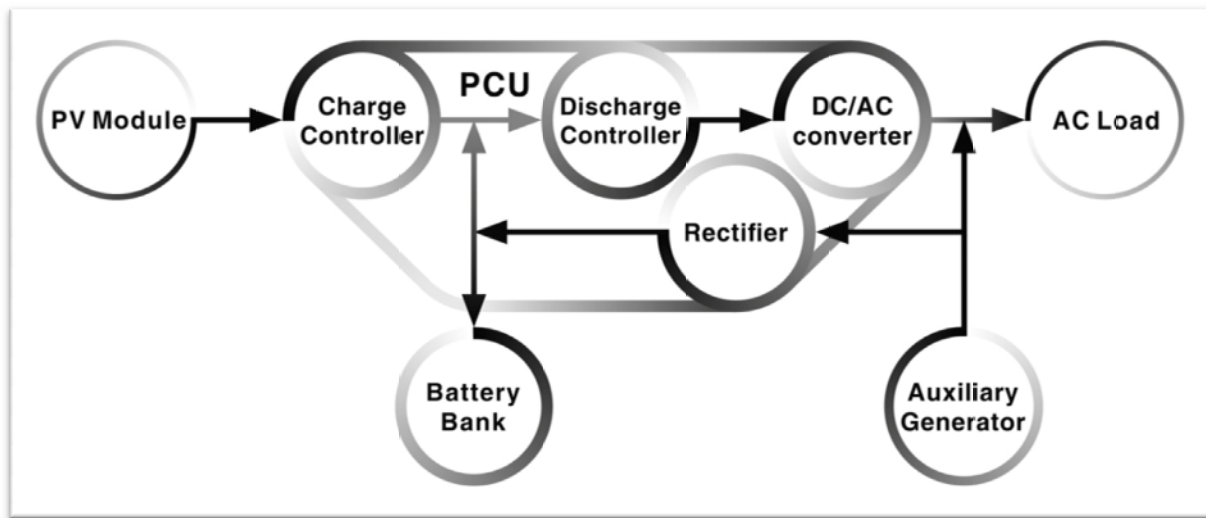

Architecture of Grid-Connected System

3. Hybrid System

A PV hybrid system operates in conjunction with the city power grid and a battery bank. During normal operation, the system is connected to the city power grid, responsible for supply power to the load, and charging the battery bank and at night, power supplied by the grid will take over. In the event of disasters such as typhoons or torrential rains that resulted in a

power outage, the battery bank would still have adequate power in reserve so that relevant rescue operations can take place before the city power grid is restored.

Architecture of Hybrid System

Current Status and Future Development of PV

The following section is a summary of Ablerex's primary application and breakthrough in the area of PV inverter development:

(1) Anti-islanding technologies

Islanding refers to the condition in which a PV inverter continues to power a location when the electrical grid power has been disrupted. When this happens, it would result in an isolated power generation system that may cause partial power instability for users. Not only that, as the PV inverter continues to deliver power, the connected electrical grid (PV and city power grid connected in serial or parallel connection) may remain powered. This can be dangerous to the utility workers as they run the risk of electrocution. And as such, in the event of a power failure, PV inverters must be designed to immediately disconnected from the grid so that even if they remain operational and deliver power, the city power grid will stay unpowered to protect relevant electronic systems and the safety of operators. Presently, the islanding detection feature offered by typical products involves passive detection, which suffers from the shortcomings of poor sensitivity and interference. Due to these issues, such products offer very limited stability. Through the integration of hardware and software, Ablerex have achieved breakthrough of existing technological bottleneck with solutions that integrate the strengths of both active and passive detection through DSP control algorithm.

(2) Maximum Power Point Tracking

Output power of solar panels are affected by a number of external factors, such as the intensity of sunlight, temperature, component aging, PV material, and so forth. In order to ensure optimal performance of the PV cell,

PV inverter must be subjected to appropriate control so that it can ensure maximum power output from the PV cell regardless of the operating environments. Such control method is known as maximum power point tracking.

(3) Grid Connection Control Technology

As solar PV generation system takes the energy generated by the solar panels and sends it directly to an electrical grid through a parallel circuit, it is imperative that relevant protective measures be thoroughly developed. Specific technical and legal issues (such as power system stability) that may arise from the operation of sending power to an electrical grid must be addressed. Designing a multi-functional solar PV system involves power conversions of different functions. Naturally, the design process has to take the issue of corresponding controls into consideration. Therefore, we have taken advantage of the high computing power of digital signal processing (DSP) as the solution for PV-inverter control.

④ Residential Energy Storage System

As sources of intermittent energy, solar energy is not continuously available and can be easily affected by numerous environmental factors. Thus the output power of solar energy can be described as unstable and unpredictable power source. When a large quantity of grid connected PV systems are installed on the electrical grid, the intermittency characteristics of solar energy will have given a serious impact on the electrical grid such as the fluctuation of voltage and frequency, safety, stability, and electrical power quality. Therefore, the development of grid connected PV system has been limited. In order to deduct intermittency characteristics of solar energy cause impact on the power grid, the transmittance of solar PV system must be developed. At the same time, the battery storage system can solve the fluctuation of voltage and poor electrical power quality caused by over capacities of grid connected renewable energy system. Since the Smart Grid was established, liberalization of the electricity market has rapidly accelerated the business from various sectors have been selling electricity by time-of-use pricing. Users allow to purchase the lowest price of electricity at the off-peak period and storage into the battery bank. and discharge the saved energy at the peak period, which the electricity price is extremely high, to avoid the consumption of electricity or even sell back to the utility. Other than functions mentioned above, if the utility grid is ordinary condition, users can operate charging/ discharging the power from our battery module during the night. When the utility grid has unpredictable problem occurred, our system would disconnect with the utility automatically and continuously provide power to loads by using storage energy.

(2) Relationship with Up-, Middle- and Downstream Companies

① UPS manufacturing process (up, mid and downstream)

Upstream	Mid-stream	Downstream
Raw material	Manufacturing	End user
Wire material PCB Packing material IGBT Cabinet Battery Transformer Transistor Capacitor Software design	UPS Power Provider Manufacturer	Medical equipment Public infrastructure Aviation Equipment Military equipment Business entities Telecommunication equipment PC equipment Household appliances Other

Ablere specializes in the design and manufacturing of UPS products. Our upstream vendors are primarily suppliers of relevant components (transformer, cabinet, wire material, capacitor, PCB, etc), battery supplier and software developer. Distributed through our network channels, our products are sold to end users in different sectors, including medical care, aeronautics, military equipment, finance, security, nuclear power, petrochemical, telecommunication, PC equipment, and so forth.

With the boisterous growth of the Internet and ICT sectors, the requirements for power supply quality have been steadily increasing. This has attracted more enterprises to adopt UPS solutions to protect their PC equipment, thereby propelling the demand for UPS. Consequently, such trends promise substantial potential for our business growth in the future.

② APF

Upstream	Mid-stream	Downstream
Raw material	Manufacturing	End user
Wire material PCB Packing material IGBT Cabinet Battery Transformer Transistor Capacitor Software design	APF manufacturer	Steel plant/machinery factory Telecommunication equipment Large industrial equipment Taipower distribution gridApplications where harmonics improvement are required Applications where harmonics improvement are required Other

Ablerex specializes in the design and manufacturing of APF. Our upstream vendors are primarily suppliers of relevant components (transformer, cabinet, wire material, capacitor, PCB and etc), battery supplier and software developer. Distributed through our network channels, our products are sold to end users in different sectors, including steel machinery factories, telecommunication, large industrial equipment, Taipower distribution grid and applications where harmonics improvement are required.

With various sectors demanding higher power quality, more and more businesses found themselves needing APF to improve power quality and reduce power loss. Due to the technical threshold required for the product, there are few local or foreign manufacturers for the product. And as such, our APF are rather competitive in the market and it is one of our key products that we promote aggressively.

③ Solar PV inverter manufacturing process (up, mid-, and downstream)

Upstream	Mid-stream	Downstream
Raw material	Manufacturing	End user
Silicon material Silicon wafer Solar cell cutting Solar cell Software design	PV Inverter System	Construction industry Telecommunication industry Public infrastructure High-tech fabrication plant PC equipment Household power supply Other

In the solar PV industry, Ablerex assumes the role of a designer and manufacturer of PV inverter in the area of system and inverter. Distributed through our network channels, our products are sold to end users in different sectors for system integration, including construction industry, telecommunication industry, public infrastructure, high-tech fabrication plants, and so forth.

The solar PV industry promises vast business opportunities in the foreseeable future. Due to the high technological threshold, we have few domestic competitors. Our PV inverter have definitive competitive advantages in terms of quality and pricing, and Ablerex has in fact become a global leading manufacturer in this area and a designated ODM partner for several major brands around the world. PV inverter has been the product that has generated substantial revenues for Ablerex.

④ESS for home manufacturing process (up, mid-, and downstream)

Upstream	Mid-stream	Downstream
Raw material	Manufacturing	End user
Silicon material Silicon wafer Solar cell cutting Solar cell Software design Battery cell	Residential Energy Storage System	Construction industry Telecommunication industry Public infrastructure High-tech fabrication plant PC equipment Household power supply Other

In the Energy Storage industry, AblereX specializes in the area of system and inverter technologies and assumes the role of a designer and manufacturer of inverter for ESS. Distributed through our network channels, our products are sold to end users in different sectors for system integration, including construction industry, telecommunication industry, public infrastructure, high-tech fabrication plants, and so on.

Energy Storage industry promises vast business opportunities in the foreseeable future. Due to the high technological threshold, there are only few competitors seen in the domestic market. Our inverter for ESS definitely have competitive advantages in quality and pricing of the product. In fact, AblereX has become a leading manufacturer in domestic industry and has been designated as an ODM partner by several major domestic companies. Our ESS has already brought substantial revenues for AblereX.

(3) Product Trends

① For UPS

A. Trend for modular design to prevent over allocation

Modular UPS comprises multiple modules in order to achieve easy scalability. One of the issue with traditional UPS is the over allocation of power system. For example, when a user's actual power load is at 12KVA, he would end up purchasing a traditional UPS at 20KVA to save himself from the hassle of expansion in the future. This would result in an over allocation of the system, which a modular UPS would be able to overcome.

B. Diversification of product design and electronic consumption

In the future, UPS systems will continue towards the path of becoming more compact, lightweight, high efficiency, and low noise. With these characteristics, UPS systems will gradually shift from large server rooms and find a place in normal office space. And as such, we should dedicate more attention to exterior design and usability in order to deliver a more pleasant user experience.

C. Heading towards intelligent and network development

With constant innovations in technology today, users have become accustomed to expecting more from UPS products in terms of their quality and

functionality. Traditional analog power control UPS has been ousted by full digital control, which enables the user to schedule and control specific machine parameters through the CPU of the UPS, which can now be simultaneously connected to multiple PCs. Not only that, the user can also take advantage of its communication interface and PC, along with smart monitoring software and network protocol to manage and analyze his PC and UPS system locally or even remotely with greater convenience and efficiency.

D. High reliability and safety

The development UPS systems will be steered towards higher reliability and safety

- (a) Automatic detection: Upon start-up, the UPS will perform a check on all component (inverter, battery and so forth) load in order to detect potential issues.
- (b) Self-protection: Through designs of self-protection, the UPS system will automatically shut down in the event of UPS overload, short circuit or overheat to prevent other hardware damages that might otherwise have been caused by UPS failure.

② APF

Harmonics suppression has always been a vital issue when it comes to power quality improvement. Following the rapid growth of non-linear load that has resulted in deteriorating power quality, the power company had no alternatives but to establish harmonics control standards in order to limit the amount of harmonics generated by users so as to maintain the quality of power for the whole system. Therefore, in addition to the development of high power APFs, the product will also have multiple functions such as virtual work compensation and voltage suppression. At present, APFs are more expensive than PPFs and the discrepancy is even greater when the load exceeds 500KW, at which point APF becomes no longer economical. And as such, hybrid filters have been created with an architecture that combines the advantages of both the active and passive types. In the future, hybrid power filters will become a trend in the domain of harmonics improvement technology.

③ PV Inverter

In addition towards high power development for PV inverters, it would be viable to pursue other alternative energy development such as wind power generation to expand the market further. In 2008, Ablerex has obtained the Intertek GS certificate – the first ever issued in Taiwan. Not only that, the company has received certifications from nations including Germany, Spain, France, Italy, Belgium, England, USA and Japan. The company shall continue to stay abreast with the latest market trends and submit more applications to other countries, and this will be beneficial to the expansion of the PV inverter market in the future.

④ Residential Energy Storage System

The future of Residential Energy Storage System(ESS) will not only develop in high efficiency and for commercial use, but also it will be able to resolve the renewable energy problem of intermittent electricity generation for wind power

and solar power. The development of this system allows problems to be solved while expanding its potential market further. From 2016, AblereX has continuously been applied for certifications in Germany, Australia, and Japan. We strongly believe these certifications from different regions would be beneficial to expand the ESS market and has generated substantial revenue for AblereX.

(4) Product Competition

Presently, our main product lines include UPS, APF, and PV inverter. Their characteristics and whether they are replaceable will be covered as follows:

① UPS

As its name implies, an uninterruptible power supply (UPS) functions by delivering power to connected equipment in the place of AC mains supply during a power outage, similar to way emergency lighting works. However, an UPS features more sophisticated design that dramatically reduce the switching duration from AC mains and battery/inverter to make up for the shortcoming of significantly longer power outage duration with typical fuel-powered generators or other emergency power source, without creating the issues of noise and air pollution that fuel-powered generators have. Unless conventional power generators achieve significant improvement in their speed of power supply while minimizing environmental pollution, they will not be able to fully replace UPS.

② APF

Power filters are equipment primarily used to improve power quality and suppress harmonics. Presently, such products fall under three categories: active, passive, and hybrid. Each has its distinctive advantages and weaknesses. At present, the development of power filter is headed for higher power and multi-functionality designs. Barring the invention of new harmonic suppression equipment in the future, there are no existing products that could replace APFs.

③ PV Inverter

PV inverter is primarily used to convert the AC current stored in solar panels to DC power for direct usage and connection to the city power grid. Barring the invention of new conversion equipment or new solar cells that could convert DC current to AC current by themselves, there are no existing products that could replace PV inverters.

④ Residential Energy Storage System

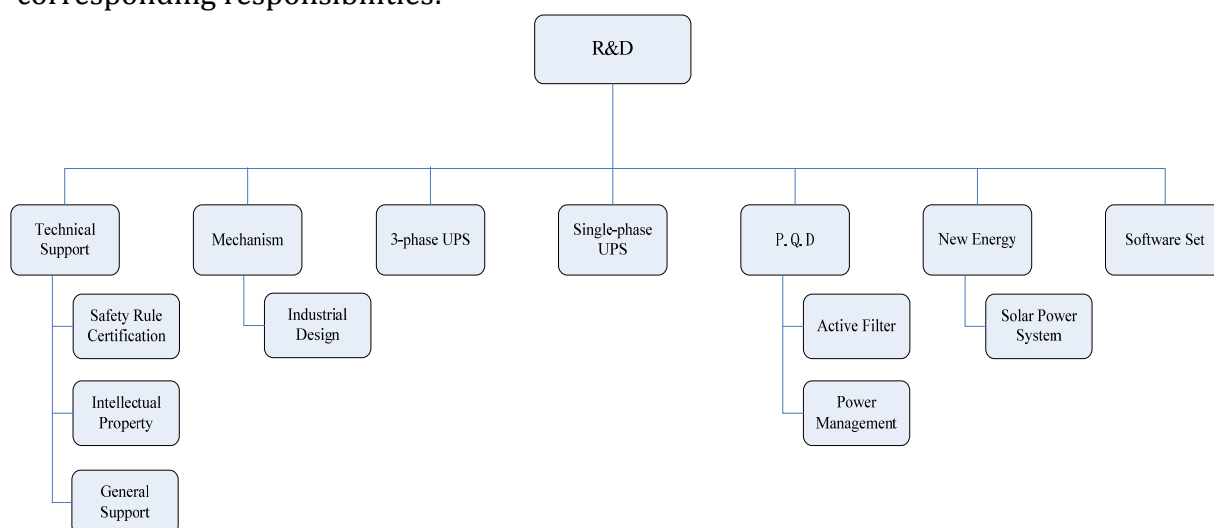

ESS is mainly used to convert the AC current stored in solar panels to DC power or to save the generated power in the battery bank for direct usage and connection to the power grid. Unless the new invention of conversion equipment or new solar cells that could convert DC current by itself, otherwise, there are no other alternative products.

5.1.3 Research and Development

(1) Technical level and R&D of our business

Right from the initiation of the company, AblereX has established its R&D unit, which focused on the research and development of small UPS. With the development of new products and technologies, the R&D unit has also expanded in scale. At present, the R&D Department can be separated into smaller units based on their respective product lines, including Single-phase UPS, Three-phase UPS, PQD and New Energy. In addition, sections

such as the Mechanical structure, Technical support, Software and Technical research have also been established to provide relevant support for the three aforementioned sections. Through the planning, development, design and safety regulation control for new product development handled by each corresponding section, the R&D Department endeavors to provide products and services that are precisely aligned to existing market demands. The following will cover the organization of our R&D Department and their corresponding responsibilities:

Department	Section	Primary job description
R&D	Single-Phase UPS Section	Responsible for the development of single-phase UPS product and technology.
	Three-Phase UPS Section	Responsible for the development of three-phase UPS product and technology.
	P.Q.D Section	Responsible for the development of APF, power management system product, Energy storage system and technology research.
	New Energy Section	Responsible for the development of green energy and smart grid product and technology.
	Mechanical Design Section	Responsible for all products' exterior and mechanical designs.
	Technical Support Section	Responsible for the general support (i.e. construction of BOM, patent and safety regulation application, document management, acquisition of R&D samples and so forth).
	Software Section	Responsible for the development of software bundled with products and the system platform for Cloud computing.

The accumulation of know-how that we have grasped from pre-development, development, and post-development of various products enabled the R&D Department to accrue its IP assets. Strengthening innovative R&D and acquiring patents have become a vital strategy for businesses to remain competitive in the market. During the past few years, Ablerex has experienced significant growth in the number of local and foreign patents received and these patents brought concrete benefit to the improvement of our technical capabilities. With relevant deployments in place, our IP assets enabled us to

engage in technical exchanges with major international players and even take part in collaboration models of licensing patent rights through technical exchanges. This not only enhanced the company's reputation in terms of its technical capacity and brand value in the industry but also boosts customers' confidence in our technical capabilities. Consequently, our IP assets offer profound positive impacts on our business expansion.

Paper

The publication of technical papers not only brings exposure to the company but also represents the company's level in terms of innovative technology. Through the participation in various conferences and paper publication, we aim to draw more opportunities for collaboration.

Looking towards the future with numerous competitors in the global market, given our existing resources, we ought to dedicate more attention to innovation so as to propel business growth. Through commitment of resources to patent and paper strategies and deployment, we shall gradually accumulate Ablere's IP asset, which will no doubt prove invaluable to the company's overall competitiveness in the future.

(4) The following is an overview of the technologies and products that Ablerex has successfully developed:

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
2019	UPS	Line-interactive UPS PSA4 500VA~1500VA	Featuring new full-bridge architecture, the new model offers the following advantages: 1. Improved efficiency. 2. Compact PCB 3. Low cost 4. Higher power wattage 5. Autonomy time longer than Glamor 6. Support dual channel of communication Simultaneously (Wife, RS232 and USB)
		Line-interactive UPS PST4 350VA~850VA	Power strip form factor 1. higher efficiency 2. Compact size 3. Low cost
		On-line UPS ARES 1K~3K RT / Tower Model for 230Vac System	1. Increased product capacity (power factor increased from 0.9 to 1.0) 2. Wifi Adopted for friendly interface 3. Versatile battery bank configurations (1K: 2-3 batteries; 2K: 4-6 batteries; 3K: 6-8 batteries)
		Line-interactive UPS Clumbus 750VA~3kVA For 230Vac system	1. Increased product capacity (power factor increased from 0.6 to 0.7) 2. New added SNMP and DryContact Card 3. LCD panel display function
		Line-interactive single phase UPS Clumbus 750VA~3kVA For 120Vac system	1. Improve power factor of current product from 0.6 to 0.7. 2. Increase SNMP and DryContact Card 3. LCD panel function 4. UL certified model
		A.T.S. (Auto Transfer Switch) iTS with CAM	1. Switching time from 21ms~16ms. 2. Support firmware update of USB 3. Initial output relay at N.O. position 4. Support Emergency power off function 5. High MTBF design
		Three-phase UPS TAURUS 10K~100K	1. Adopted a new three-level architecture to significantly improve the unit's overall operating performance 2. Input power factor increased to PF=1.0 3. New accelerated ECO operation mode with transferring speed < 3ms
		Three-phase UPS Kronos 10K~40K	1. Adopted a new three-level architecture to significantly improve the unit's overall operating performance 2. Input power factor decreased to PF=0.9 to be highly competitive 3. New accelerated ECO operation mode with transferring speed < 3ms
		Three-phase UPS Voltage Sag	1. Adopted a new three-level architecture to significantly improve the unit's overall operating performance. 2. Adopted a long lifecycle capacitor back to replace the battery. Backup loads from utility voltage

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
	Power Management Development		problems. 3. Capacity can be extended up to 6 units of total 360kVA/360kW
		Battery Management System BMSIII plus RF Receiver	In addition to the wireless transmission functionality that is also featured in the previous generation, the product has also been designed with battery voltage equalizer technology to prevent battery overvoltage with greater precision. We have designed with additional function that allows determine battery condition, remaining discharging time, and diagnosing life cycle of deteriorated battery.
		Raspberry Pi Intelligent HMI	Adding a wifi function; moreover, to strengthen the development of Green Product related application software.
		AC PDU2.0 Power System Management	According to the market demand for DC current communication server, we have developed AC PDU power management systems with applications similar to our previous AC PDU, but The main difference is the improvement of measurement accuracy, and its monitoring interface is upgraded from the 7-inch touch panel to the Raspberry Pi intelligent interface.
	APF	APF ESD34 150/100A	Features immediate response control that delivers outstanding transient response for the APF by enabling immediate compensation at any point during each current cycle. We have also increased product compensation capacity and catered to the demands for IP00/IP20.
		APF 480V UL	In addition to the breakthrough of existing product architecture and technology utilization, the product is more compliant with existing international safety regulations, making its distribution more extensive.
		APF 80A Rack Module	Next-gen product that offers significant improvement in power density to reduce spatial requirement for installation. Next-gen hot swapping technology. New controller that adds all-level harmonics compensation and load balancing mechanism. Adopting a multi-level switching structure, the product reduces IGBT switching loss while increasing the number of harmonics compensation while correcting power factor.
		APF 80A Wall Mount	Next-gen wall mounted product that offers significant improvement in power density to reduce spatial requirement for installation.
		APF 60A/100A	In addition to improving the current product architecture and technology, adding different capacity parallel applications makes this product portfolio more flexible.
		SVG 70kVAR	Speed up the Reactive Power Compensation response in half cycle (10ms) to reach the target of requiring compensation of load
	ESS	Single Phase Residential ESS	The ESS includes smart meter(ESS-MET), inverter (ESS-INV), and battery module(ESS-BAT).
		Energy Storage System	Through the smart meter interface, the user can

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
		ESS5000/4000/3300	<p>command the Self-consumption function based on the calculation of voltage, current, and power factor through out the controller. The controller will automatically order the command to the rectifier to adjust power generation from solar panel and battery discharge/ charge power. This system also fits to time-of-use pricing program users that throughout the setting of smart meter, users will be able to control discharging or charging electricity by adjusting the setting of off peak and on peak time-of-use periods. Users can buy electricity in the off peak period to storage into the system and sell these storage electricity in the on peak period to accomplish the goal of saving energy resource and the most efficiency way of use.</p> <p>Our ESS inverter can use any batteries as long as the voltage of inverter matches the voltage of battery bank within the range of 40~60V. The customer can consider choosing our ESS Li-ion battery module option which includes the Battery Management System in it. Our system is suitable for the Lead-acid, Lit-ion, LiFePO4, SiC, Seawater battery, etc.</p>
	GPS	Three-phase PV inverter ES52000	This three-phase 52kW PV product can be used with solar modules, and the number of parallel units can reach the best operating point to achieve the best cost of the solar power system; intelligent MPPT tracking can effectively increase the overall power generation of the solar system. Products will be higher competitive.
		Three-phase PV inverter ES 60000	This three-phase 60kW PV product is used in the 480Vac system, and further provides PV inverter energy density to make the product more competitive.
		Single-phase PV inverter ESJ5500 For Japan market	This single-phase 5.5kW PV product is to comply with JET certification in Japan; in addition, it has installed with the output voltage circuit for the disaster prevention usage. This product can be widely applicable in numerous areas that it will possibly be developing our single-phase ESS in the foreseeable future.
		Single-phase PV inverter ES5500H	To modify an existing product of ES5000H, we select the outer case made of aluminum material, in order to improve its heat dissipation performance. The capacity of the machine increases 10% with the same material cost as the previous model, and we are hoping this modification will help increasing our product's profit margin.
		Single-phase PV inverter ES7200HC	As the solar panel production improves year after year, panel efficiencies continue to improve as well. To apply to the improvement of solar panel and market's needs, we have developed a new inverter of 7.2kW model. This new inverter is designed with single MPPT function and 1000V DC input, in order to rise power density and to make the product lighter.

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
		Taiwan CNS15382 Grid regulation	In response to Taiwan's enactment of national grid-connected regulations, the full range of PV inverter models sold in Taiwan are about to reach the requirements of the standard.

5.1.4 Long-Term and Short-Term Business Development Plans

(1) Short-term business development plan

① Product strategy

Complete medium and low-category single-phase UPS product lines, aiming at different market and customer needs, strengthen the company's product advantages, provide reasonable C/P value products, retrieve customer trust, and increase market share.

② Production strategy

Optimize the supply chain management, ensure the quality of the supply materials, and reduce the stock of spare and meet the flexible production needs; adjust the production process, increase the proportion of automation, improve production efficiency and product quality.

③ Marketing strategy

Adopting a strategy of adapting to localization, implementing localized operations, striving to be close to the market, strengthening potential customer development and relationship maintenance, quickly responding to customer needs and strengthening after-sales service, improving customer satisfaction, and strengthening market position.

④ Financial coordination

Based on the principle of steady operation, the company uses its own funds and operating surplus as the main working capital, but it will also use bank financing in a timely manner in order to seek ROE optimization.

(2) Long-term business development plan

(A) Product strategies and goals

In terms of product development, the company shall adhere to the following strategies:

- ① Making our existing product lines more comprehensive so as to offer more choices to our customers while attracting more potential customers to improve sales and raise our market share.
- ② To refine and deepen our ODM/OEM collaboration models with leading manufacturers around the world and jointly development mainstream products so that we could become the main supplier or partner of strategic alliance with leading manufacturers. This will allow us to expand our scale of production, improve product quality, lower our costs and in turn make the company more competitive as a whole.
- ③ Close integration between new product development, our core technologies, and patented technologies to boost our products' competitive edges and enhance our lead against other competitors in terms of technical capabilities.
- ④ Close coordination with the development of new energy technologies and foray into the research and development of relevant products for green and

renewable energies such as solar PV and fuel cells so as to enhance their applications in “smart power grid”.

With the aforementioned strategies, Ablerex is confident that it will rise to become a major player in the global supply chain with significant presence as we shall not only have outstanding manufacturing capabilities and energy but also leading core technologies. We will strive to become a leading manufacturer in Taiwan and a major collaboration partner for leading companies around the world.

(B) Production strategies

- ① Improve upon existing manufacturing processes to achieve compliance with relevant eco-friendly standards and green product development by launching pollution-free processes.
- ② Transition to modular production for all pre-production processes in order to boost productivity while reducing occurrences of errors, thereby achieving the two-fold objectives of rapid production and high quality.
- ③ Utilize automated production equipment (NCT, AI, SMT, ICT and so forth) and automated testing equipment (ATE) to boost productivity, improve quality while lowering costs.
- ④ Implement total quality management to maintain optimal internal operation at all times.

(C) Marketing strategies

In order to attain continual improvement in the company's sales, expand the market share of our products and increase the value of Ablerex in the global supply chain, we shall adhere to the following marketing strategies:

- ① To deliver the best services in all our processes and all aspects of our operation.
- ② To demonstrate Ablerex's existing core technologies and capabilities and our determination and drive to carry onward in our improvement of technical capabilities.
- ③ To fortify our search and collaboration with other leading companies around the world and foster partnerships so that we could become one of the primary suppliers of mainstream products in the business.
- ④ To expand our original product and establish distribution channels for specific products in appropriate region/territory.
- ⑤ To collect information of local market, connect with our customers and deliver prompt services through our offshore locations.

(D) Financial strategies

- ① To strengthen exchange management and make appropriate use of financial hedging tools to ensure our costs and revenues, thereby reducing the risks and losses from foreign exchanges.
- ② To make appropriate use of financial leveraging to lower operating costs.
- ③ To expand our fundraising channels into the capital market so that we can obtain funding at lower costs and facilitate relevant expansion plans.

(E) R&D strategies:

- ① To focus on development continuously for products about power quality improvement and power supply reliability.
- ② To inject more R&D resources for new energy, renewable energy, energy

recycling, and energy conservation so that we could develop relevant products for the market in the future.

- ③ To insist on technological innovation and continue with aggressive patent deployment so that we can strengthen our technical competitiveness.

5.2 Market and Sales Overview

5.2.1 Market analysis

(1) Sales (Service) regions

Unit: NT\$ thousand, %

Item		Year	2019	
			Amount	%
Domestic operating income			1,075,536	43.68%
International operating income	Asia		789,866	32,08%
	America		93,678	3,80%
	Europe		491,033	19,94%
	Other		12,277	0.50%
Total			2,462,390	100.00%

(2) Market share (%) of Major Product Categories in the Last Two Years

Ablerex is primarily involved in the production and distribution of UPS, APF, PV Inverters, and the subcontracting of power related projects. Presently, we have many competitors in the domestic market, including PCM, Delta Electronics, CyberPower and so forth. However, our products and products from these competitors are distinctively different and as most of these products are customized products, relevant information have been difficult to obtain. This renders a precise calculation of market share to be impossible.

(3) Supply & demand and potential growth of market in the future

① UPS

Despite the long history of the UPS industry, the sector still has much room for growth waiting for businesses to commit and cultivate. Even though the migration of local businesses may significantly reduce the quantity of factory equipment in Taiwan, UPS manufacturers will still be able to locate new market and point of entry. With the prevalence of PC systems and the growing sophistication of machinery functions, end users will grow to better appreciate the necessity and importance of UPS systems. In addition to enterprises and server rooms where UPS have long played a vital role, UPS products have gradually found their way to general consumers. Between large and sophisticated home multimedia entertainment systems and personal PCs, the demand for UPS is starting to stem from even the average consumers.

② APF

With the rapid development of high-tech industries, literally all of their precision instruments require high quality power systems in order to maintain normal operation. However, as most of the high-tech instruments run non-linear load (such as the semiconductor industry), they generate substantial amount of harmonics current pollution that has adverse impact on power quality, leading to issues such as voltage distortion, overvoltage, and even equipment failure. Consequently, APFs have been installed to mitigate the harmonic currents

generated by the load and have therefore been perceived as valuable investments.

In the mid-year update of “Semiconductor Applications Forecaster” published by the American market research organization IDC in 2011, the global semiconductor sales in 2012 will achieve an annual growth of 5% to reach US\$ 318 billion and by 2015, the global semiconductor sales will reach US\$ 378 billion, with compound annual growth rate at 6% spanning from 2010 to 2015. It is therefore natural to predict that the demands for APF will increase as the

Fig. 1: Global Semiconductor Revenue Forecast

Source : iSuppli • 2009年09月

③ PV Inverter

According to IMS Research’s prediction, the market for PV inverter will continue to grow, with more noticeable growth in demand in 2020. The demands for small business building PV system (usually between 10~100kW) and PV stations (typical installation of 500kW or higher) are expected to grow more significantly while the demand for residential PV system will be less apparent.

It is estimated that approximately 60% of the PV system installation in the future will take place in Asia, mainly China, and the majority of them would be PV stations. As for residential PV systems, Japan will be the only market that may promise some potential.

④ Residential Energy Storage System

According to Energytrend’s prediction, the ESS market will continuously grow in future. Especially clear and more needs after 2018 to 2020. We estimate the demand of ESS converter (normally 5kW) will likely increase in the foreseeable future.

(4) Competitive niche

Factors such as the yield rate of UPS, productivity and specifications have become the key criteria that global leading brands and channel operators use as guidelines in their selection of UPS supplier. Presently, Ablerex has the following competitive edge in terms of its marketing, product development, and manufacturing process:

① Marketing

The company has been actively taking part in major local and international electronics fairs in recent years and has achieved significant exposure in the global

sector chains. In addition, our products have received safety certifications in numerous countries and this helps to facilitate the expansion of our business. We also offer a comprehensive selection of small and micro UPS products that can satisfy customers' varying needs. With our positive image and solid R&D capabilities, the company has proven itself to be capable of developing new products in accordance with customers' needs and this has in turn made AblereX a preferred partner of collaboration for international brand names compared to other local competitors. Consequently, this will be beneficial in our search for ODM/OEM collaboration opportunities.

② Product development

With UPS products becoming more compact and more intelligent with modular and network functionalities, AblereX has shifted its core technologies towards the development of high speed and high precision. In terms of product development, the company not only has adequate capacity for relevant software and hardware design but also managed to reach top class level when it comes to product development speed and design quality. We are capable of working with customers' needs to make relevant changes and technological reforms to launch new products at the right timing so that we are able to compete in the market with products of better performance, superior quality at lower costs.

③ Manufacturing process

Manufacturing process improvement is an important factor in the control of production costs, while quality stability functions as a critical criterion of customer satisfaction and future business expansion. And as such, we have carefully planned and mapped out the entire manufacturing process for the development of new products and have been making continual improvement on our process and quality control so as to facilitate manufacturing processes while lowering relevant costs and enhancing quality. AblereX has the professional manufacturing capacity to handle independent product development, software design, manufacturing, automated assembly, and testing. Not only that, we deliver products of outstanding quality, punctual shipping schedules and comprehensive after sales services to stay competitive in the market.

(5) Favorable and Unfavorable Factors in the Long Term

① UPS and APF

Favorable factors

A. Continual upgrading of high-tech industries to propel the continual increase in the demand for UPS and power quality improvement

As high-tech industries upgrade their production capabilities, they would inevitably use more expensive manufacturing processes of higher precision. As a result, their demand for power quality would grow in proportion, thereby driving up the demand for UPS and APF to improve their power quality.

B. Superior R&D capabilities to achieve stable product quality

After accumulating years of experience and expertise from independent research, AblereX has obtained 131 patents, and 128 of which are invention patents that have been featured on our key products. Not only that, we have also been accredited to ISO 9001 and ISO14001 standards that speak for our

high product quality. At the same time, we have also improved our productivity and expanded our production capacity to satisfy the needs of our customers.

Unfavorable factors

- A. Product diversification may impede the improvement of production efficiency
- With different equipment requiring different capacities and power factors for UPS and APF products, our product lines have become more diverse and this is disadvantageous to the improvement of production efficiency.

Counter-strategy:

We shall improve our production-distribution coordination to achieve precise control of product delivery schedules and monitor changes in market demand at all times through information systems. The manufacturing department will also make flexible adjustments to its production plan in order to better manage the delivery schedule and satisfy our customers' needs without compromising the benefits of concentrated batch production.

- B. Low energy storage density that is unable to cater to the need for long operation duration

The greatest drawback of battery banks used for normal UPS systems is their low energy storage density. In order to construct a large scaled energy storage system, the batteries would take up substantial physical space.

Counter-strategy:

Due to cost considerations, normal UPS systems use lead-acid batteries. In the future, lithium batteries that offer higher storage density and longer lifecycle might become a viable alternative. Although lithium batteries are significantly more expensive, with the advancement in battery technology and development of electric car batteries, its development in the future is still worth looking forward to.

② PV Inverter

Favorable factors

- A. Continual demand for energy keeps international oil prices up

With the rise of emerging nations such as China, India, Brazil and the ongoing growth of US and European economies, the global demand for energy has continued to grow. In addition, as the global petroleum reserve declines over the years, international oil prices have remained high and thus driving nations around the world to seek for alternative energies to mitigate the rising energy costs and energy shortage. Among the alternative energy sources, solar power has received the most abundant investments. With the certainty of growing energy demands in the future, the use of renewable energy will become more prevalent.

- B. Growing awareness for environmental protection

The Kyoto Protocol prescribes specific targets of greenhouse gas reduction and is supplemented with multiple flexible operating regulations such as emission trading clean development mechanism and joint implementation. The protocol also touched on the issues of environmentally harmful subsidy reform. The Copenhagen UN Climate Change Conference also involved negotiations of greenhouse gas emission goals with specific carbon reduction

objectives and discussions on assisting developing nations to combat global warming. These events have gone to show that the issue of environmental protection is of primary concern to nations around the world and due to the considerations for sustainability, governments will no doubt actively develop renewable energy industries.

C. Government subsidies to reduce installation costs

Due to the low conversion factor of solar power at present, the cost of solar PV generation is still higher compared to other traditional means of power generation. The relatively expensive costs of solar PV system installation will no doubt create additional economic strains on the general public that wishes to have solar PV systems. And as such, governments around the world have promulgated subsidy policies, causing the solar PV market to experience explosive growth and continual increase in market demand.

Unfavorable factors

A. Increase in the number of competitors, leading to intense price competition

With the demands gradually growing, there will inevitably be more competitors in the business, only to be followed by price wars and struggle for orders with lower pricings. This would in turn impact the profit margin for products.

Counter-strategy:

The company shall continue to research and innovate in the future so that we can develop products of higher efficiency and functions and other high-end products to differentiate from the low-cost market. In addition, we will also commit more resources to the development of other alternative energies to stay competitive.

B. The industry is susceptible to the impact of government policies

As the solar PV industry is susceptible to the impact of government policies, product demand may become limited during period of depression when the government is likely to cut down on subsidies to reduce spending.

Counter-strategy:

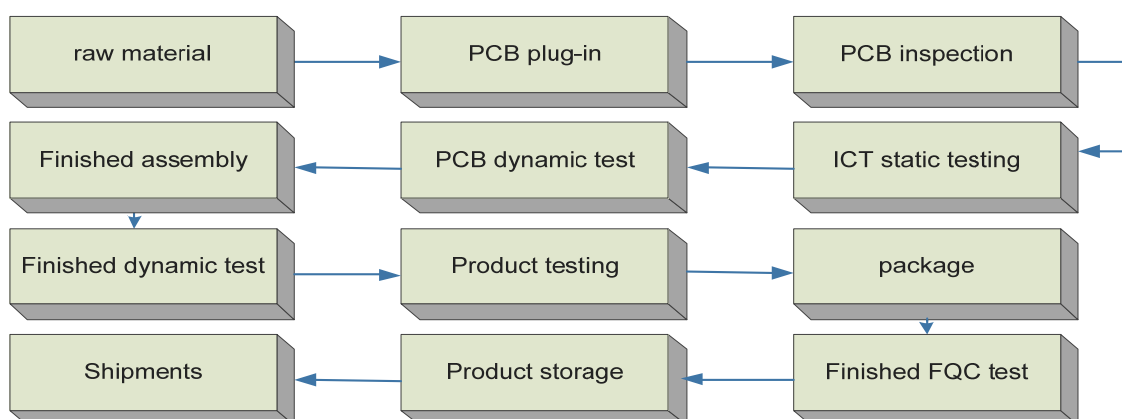

We will continue to develop new customers and cultivate new customer base in different countries to better understand the needs of our future clients. In addition, we will foray into the respective markets to lower the risks of being overly dependent on the distribution in specific regions.

5.2.2 Production Procedures of Main Products

(1) Primary purpose of main products

Main product categories	Purpose & Functions
UPS	At the moment of power failure, the UPS will temporarily supply power from its battery bank to prevent damages on PC, communication device, consumer electronics, high tech products medical equipment and so forth due to power disruption or power surge.
APF	Generates a compensatory current that is of the opposite phase of the harmonics at the load to effectively improve power quality while preventing excessive harmonic currents from causing interferences or damages on power equipment or production processes.
PV Inverter	Utilizes DC current from solar PV cell and converts it to AC currents similar to the power from city power grid for direct usage or parallel connection to the power grid. PV inverter is a key component in solar PV generation systems.
ESS	The ESS includes smart meter (ESS-MET), inverter (ESS-INV), and battery module (ESS-BAT).

(2) Major Products and Their Production Processes

(3) Supply Status of Main Materials

The main raw materials used for our products include battery, transformer, semiconductor parts, plastic materials, metal cased PCB, wire materials, and so forth and these are sourced by a number of suppliers. However, the ratio of supply for these materials have been carefully managed to prevent over-concentration of order for specific suppliers. In addition, AblereX has maintained positive collaboration with most suppliers over the years and in an effort to ensure supply stability, we have made an effort to stay in touch with other suppliers. And as such, supply status has been positive for AblereX and no incident of short supply or supply disruption has occurred.

(4) Major Suppliers and Clients

A. Major Suppliers (10%) in the Last Two Calendar Years

Unit: NT\$ Thousand; %

Year	2018				2019					2020Q1

5.3 Human Resources Analysis

Number of employees, average seniority of service, average age and education distribution ratio for the last two years and as of April 30, 2020

Apr. 30, 2020, Unit: people, age, %

Year		2018	2019	2020/4/30
Number of Employees	Direct Labor	160	129	143
	Indirect Labor	95	84	94
	Administrative staff	406	432	410
	Total	661	645	647
Average age		35.38	35.9	37.2
Average seniority of service		6.54	7.03	6.8
Education (%)	Ph. D.	0.30%	0.31%	0.31%
	Masters	13.16%	12.87%	13.29%
	Bachelor's Degree	27.08%	27.13%	29.52%
	College	18.46%	21.24%	19.78%
	Senior High School	24.96%	23.10%	21.79%
	Junior High School and below	16.04%	15.35%	15.30%

Note : The numbers are for all group

5.4 Environmental protection Expenditure

5.4.1 Total Losses and Penalties

According to the law, the applicant shall apply for the establishment of a permit or pollution discharge permit or should pay pollution control costs or the establishment of environmental protection units responsible for the person, the application, payment or establishment of the statement: the company in the production process and No major sources of pollution, but in order to avoid changes in the law also set up environmental protection personnel, and regularly check the status of the law to determine whether the impact of the company's operations.

5.4.2 Major equipment to prevention and their usage and potential benefit : None.

5.4.3 Until the date of publication, any improvement in environmental pollution for past two years : None

5.4.4 (Including remedial measures) and possible expenses (including non-response measures that may occur in the future due to the total amount of the damage suffered by the Company in the last two years and as of the date of publication) Loss, disposition and indemnity, if it is not reasonably possible, it shall state the fact that it can reasonably be estimated. : None

5.4.5 The current pollution situation and its improvement on the company's earnings, competitive position and capital expenditure and the expected impact of the next two years of major environmental capital expenditure: None.

5.5 Labor Relations

5.5.1 Employee's welfare package, education and training, retirement plan, and employee rights

(1) Employee's welfare package:

In addition to following the Labor Standards Act and the relevant regulations, Ablrex provides group insurances covering healthcare, accidents, and health examinations for employees. Ablrex also established the Employees' Welfare Committee which is in charge of employees' welfares including subsidies of weddings, funerals, in hospitals, and birthing, and holds activities regularly, such as birthday parties and domestic/foreign trips, to take care the life of employees.

(2) Education and training:

Ablrex holds internal management and specialist training program and encourage employees to attain courses and training held by professional institutions in order to enhance the proficiency and core competitiveness of employees. The education and training records are as follows:

Item	Courses	Trainees	Hours	Costs
1. Training for New employees	4	58	232	0
2. Specialist training	175	158	1,179	180,233
Total amount	179	216	1,411	180,233

(3) Retirement plan and the implementation:

Ablrex has formulated the retirement and pension plans for employees according to the Labor Standards Act. A certain percentage of salary payment is allocated as retirement reserve funds and if it is not enough for the payment of pension, the additional part will be listed as expense in the financial reports.

Since the implementation of Labor Pension Act in 2005.7.1, for the employees, adopting the defined contribution plan of pension, the pension fund will be paid and deposited in the personal pension fund account for no less than 6% of monthly salary by Ablrex.

(4) Employee rights:

Ablrex has advocated to humane management and set up many channels for employees to communicate with employers. Ablrex thinks highly of all kinds of employees' welfare and feedbacks of communication, so that Ablrex has harmonious relationship between employer and the employees. There is no any dispute on labor relation to be negotiated since Ablrex established. Yet, Ablrex still devote to better employees' welfares to enhance the harmonious labor relation and to prevent any possible labor disputes.

(5) Code of employee's conduct and ethics:

Ablrex has stipulated "Ethical Corporate Management Principles" and relevant managerial regulations for Directors, Managers, and employees to prohibit unethical behaviors, the chances of pursuing personal interests, bribery, to protect and properly

use the assets of the company, to abide by regulations, and to encourage to report any illegal or unethical behaviors.

(6) Working environment and worker's safety protection:

Ablerex deals with employees' safety and health under the regulations of "Occupational Safety and Health Act" and relevant laws to prevent occupational accidents and to protect the safety and health of all employees. Ablerex also follows "Act of Gender Equality in Employment" and "Regulations for Establishing Measures of Prevention, Correction, Complaint and Punishment of Sexual Harassment at Workplace" to maintain the equality opportunity of both genders and to provide a working environment without sexual harassment. Personnel entry and exit of office are controlled by security system to keep employees safe.

No.	Target	Solution	Status	Execution
1	Change to lead-free product	10% leaded product change to lead-free product	There are still very few leaded products in the Company, although it still complied with international standard, but also as a goal to go.	Lead-free raw materials and lead-free electrical product development test, the production line has been fully changed accordingly.
2	10% recycling of Office total used	program for A4 paper and laser printer cartridge recycling	Recycling	Set A4 recycling paper dedicated machine, toner cartridges are re-transfer manufacturers to use
3	Energy saving and carbon reduction and improvement	Saving water saving measures	The company set the energy policy in 2019, electricity consumption decreased by 1% compared with 2018,(result is increasing 9.43%) water consumption decreased by 2% compared with 2018, (result is increasing 4.44%)	1. Implement energy conservation and reduce electricity expenses. 2. Central air-conditioning use period control. 3. master the various units of electricity, to review the possible loss of power. 4. Analyze the rationality of electricity and set the optimal contract capacity. 5. The faucet is equipped with a water-saving device to reduce the amount of water. 6. Use water-saving equipment when replacement.

Follow-up activities on environmental and occupational safety and health promotion

A. Harmful substances limit (ROHS)

ROHS in July 1, 2006 came into effect, the products sold to the EU shall not contain lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls and polybrominated diphenyl ether and other six hazardous substances. The Company actively promote green production and procurement, to achieve in the process, and has been

with the main customers to meet the products without harmful substances, access to customer recognition.

B. Plan for Occupational Disaster Prevention

In order to achieve the goal of zero disaster, the Company plans to prepare the annual occupational disaster prevention plan at the end of each year, and then formulate detailed implementation plans according to the contents of the occupational disaster prevention plan, and will be implemented by the institution according to the planned time and content. The system explores the lack of implementation, at every three months of the safety and health committee or the labor meeting, to fix the occupational disaster prevention plan. In accordance with the resolution of the Safety and Health Committee during the year, we will set down the occupational disaster prevention plan, re-implementation, re-audit, review and revise the plan for the next year. We will continue to reduce the risk of harm to the public through the PDCA The ultimate goal of the disaster. Once an accident occurs, it will require countermeasure. There were 5 accidents for work safety in 2019 and all of them are traffic accidents involving employees on the way to and from work. The team is required to understand and improve the working conditions of the employees. Employees are required be careful on the way to and from work. At the same time, Work safety's inspections will also be implemented from time to time, and a total of 15 improvements proposed.

C. Implement the automatic check

Employees in the face of different operating environment, process, operation and operation, may be due to unsafe operations, equipment or management and other factors, resulting in physical harm, to this end, the company is actively promoting the automatic inspection, this is a measure to promote the discovery of potential hazards, and strive to improve and effectively control. The company automatically checks the items, including equipment, the use of raw materials, operating environment, operating machinery and motor vehicles.

D. On-site job environment measurement and personal protection of employees

In the implementation of the operating environment of the Company, the operating environment measurement plan containing the sampling strategy is prepared, and the project is collected from the basic data collection, the process flow and the hazard record. Through the observation, interview record, survey, (CO2), noise, ... and so on.

Site workplace planning safety line, the protection part of the necessary equipment, such as the protection of protective equipment, earplugs, etc., on the part of the staff assigned to the safety shoes to strengthen the protection. Regular health check every three years, the most recent implementation date 2018.07.27.

E. Strengthen corporate social responsibility to take care of employees

In the spirit of corporate social responsibility, the Company has a Code of Ethics on Employee Practitioners, which clearly protects

employees' work fairly and maintains their work. We also set up the Supplier Corporate Social Responsibility (CSR) Code for Supplier Management and Specifically, they are required to sign back the declaration, the specific requirements of the staff must also protect the rights and interests.

5.5.2 Any current or potential loss resulting from labor disputes and prevention actions for the past 2 years and as of the date of this annual report:

Ablerex values the welfare of all employees and has harmonious relationship between employer and the employees. Ablerex has no major dispute on labor relation in the past 2 years and up to the printing date of this Annual Report. Therefore, there should be no concerns on the loss resulting from labor disputes.

5.6 Important Contracts

Principal current contractual agreements shown below were effective or expired during the most recent reporting period:

Agreement	Counterparty	Period	Major Contents	Restrictions
Financing contracts	Chang Hwa Commercial Bank	2019.06.30~2020.06.30	Comprehensive credit line	None
Financing contracts	Taipei Fubon Bank	2019.11.13~2020.11.13	Comprehensive credit line	None
Financing contracts	China Trust Commercial Bank	2019.12.01~2020.11.30	Comprehensive credit line	None
Financing contracts	E.Sun Commercial Bank	2019.12.18~2020.12.18	Comprehensive credit line	None

VI. Financial Information

6.1 Five-Year Financial Summary

6.1.1 Condensed Balance Sheet/Income Statement

A. Consolidated Condensed Balance Sheet – Based on IFRS

Unit : NTD in Thousand

Item	Year	Summarized Balance Sheets of Latest 5 years(Note1)					03-31-2020 (Note 3)
		2015	2016	2017	2018	2019

Consolidated Financial Analysis – Under IFRSs

The causes of the financial ratio change over 20% in the last two years:

1. Solvency : Interest Protection Multiples in 2019 decreased 79.58% compared with 2018 due to Income before tax decreased and bank interest increased.
2. Profitability :
ROA in 2019 decreased 42.55% than in 2018 due to Income before tax decreased.
ROE in 2019 decreased 44.31% than in 2018 due to Income before tax decreased.
The ratio of Operating profit over paid in capital in 2019 decreased 69.43% than in 2018 due to Income before tax decreased.
The ratio of Pre-Tax Income over paid in Capital in 2019 decreased 58.35% than in 2018 due to Pre-Tax income decreased.
Profit Margin in 2019 decreased 44.26% than in 2018 due to Income before tax decreased.
EPS in 2019 decreased 46.01% than in 2018 due to Income before tax decreased.
3. Cash flow:
Cash flow ratio decreased 54.28% than in 2018 due to the decrease of net cash inflow from operating activities.
Cash Flow Adequacy Ratio increased 23.89% than in 2018 due to Capital expenditure, inventory and cash dividend decreased.
4. Leverage :
Degree of Operating Leverage increased 173.77% than in 2018 due to decreased of Operating Income.
Degree of Financial Leverage increased 25.53% than in 2018 due to increase of bank interest.

B. Stand Alone Condensed Financial Analysis – Based on IFRSs

Year Item			Financial Summary for The Last Five Years (Note 1)					03-31-2019 (Note 2)
			2015	2016	2017	2018	2019

Note 1: The financial data stated above for last five years have been reviewed by CPAs.

Note 2 : The company doesn't not prepare Stand Alone Report.

Financial Analysis – Stand Alone - Under IFRSs

The causes of the financial ratio change over 20% in the last two years:

1. Solvency :

The Times interest earned ratio decreased 73.62% than in 2018 due to Income before tax decreased and bank interest increased.

2. Profitability :

ROA in 2019 decreased 44.44% than in 2018 due to Income before tax decreased.

ROE in 2019 decreased 44.42% than in 2018 due to Income before tax decreased.

The ratio of Operating profit over paid in capital in 2019 decreased 64.74% than in 2018 due to Income before tax decreased.

The ratio of Pre-Tax Income over paid in Capital in 2019 decreased 58.03% than in 2018 due to Pre-Tax income decreased.

Profit Margin in 2019 decreased 41.77% than in 2018 due to Income before tax decreased.

EPS in 2019 decreased 46.01% than in 2018 due to Income before tax decreased.

3. Cash flow :

Cash flow ratio decreased 91.4% than in 2018 due to the decrease of net cash inflow from operating activities.

4. Leverage :

Degree of Operating Leverage increased 111.72% than in 2018 due to decreased of Operating Income.

Note : Financial Analysis Formula

1. Financial structure

- (1) Ratio of Liabilities to assets = total liabilities / total assets.
- (2) Ratio of long-term capital to fixed assets = (net of shareholders' equity + long-term liabilities) / net fixed assets.

2. Solvency

- (1) Current ratio = current assets / current liabilities.
- (2) Quick ratio = (current assets - inventory - prepaid expenses) / current liabilities.
- (3) Times interest earned ratio = before the income tax and interest expense net interest / current interest expense.

3. Operating ability

- (1) Account Receivable Turnover (including accounts receivable and bills due from operations) = Net Sales/Avg. Accounts Receivable (Including Receivables and Receivables due to Operation) Balance.
- (2) Days sales in accounts receivable = 365/receivables turnover.
- (3) Inventory turnover = cost of goods sold/average stock.
- (4) Account Payable Turnover (including accounts payable and bills payable as a result of operations) = balance of cost of goods sold / average payables for each period (including accounts payable and bills payable as a result of operations).
- (5) Average days in sales = 365/inventory turnover.
- (6) Fixed assets turnover = net sales/average net fixed assets.
- (7) Total assets turnover = net sales/average total assets.

4. Profitability

- (1) Ratio of Return on assets = [after tax loss + interest expense × (1-tax rate)] / average total assets.
- (2) Ratio of Return on shareholders' equity = post-tax profit/loss/average shareholder's equity.
- (3) Profit ratio = after-tax profit/loss/net sales.
- (4) Earnings per share = (net profit after tax - special share dividend) / weighted average number of shares outstanding.

5. Cash Flow

- (1) Cash flow ratio = net cash flow from operating activities / current liabilities.
- (2) Cash flow adequacy ratio = net cash flow from operating activities in the last five years / recent five years (capital expenditure + inventory increase + cash dividend).
- (3) Cash reinvestment ratio = (Net cash flow from operating activities - cash dividends) / (Gross fixed assets + long-term investments + other assets + working capital).

6. Leverage :

- (1) Degree of Operating leverage = (net operating income - variable operating costs and expenses) / operating profit.
- (2) Degree of Financial leverage = operating interest / (operating interest - interest expense).

- 6.3 Supervisors' /Audit Committee's Report for the Most Recent Year : Please refer to Page 132 to 134 of the Chinese annual report.
- 6.4 Financial Statements for the Most Recent Years: Please refer to Page 157 to 227 for the details
- 6.5 Independent Auditors' Report for stand-alone basis in Most Recent Years: Please refer to Page 135-205 in Chinese Version Annual Report for the details.
- 6.6 Impact of financial difficulties of the Company and related party on the Company's financial position: None

Total shareholders' equity	1,528,739	1,481,332	(47,407)	(3.10)

Analysis of changes in financial ratios, which changes more than 20% and the changed amount is over NT\$10 million:
None

1.Non-current financial assets at fair value through other comprehensive income : due to investing
ECO.COM

2.Right-of-use asset : due to in IFRS16

3.Other equities : Due to exchange differences in the conversion of financial statements of foreign operating office

Effect of Changes in the last two years to more than 20%, and the amount of change of NT \$ 10 million or more:

None

7.2 Financial Performance

A. Condensed Consolidated Financial Performance Analysis – Under IFRSs

Item \ Year	NTD Thousands; %			
	2018	2019	Difference	
			Amount	%
Net Sales	2,530,613	2,462,390	(68,223)	(2.70)
Cost of Good Sold	1,919,053	1,888,457	(30,596)	(1.59)
Gross Profit	611,560	573,933	(37,627)	(6.15)
Operating Expense	526,928	548,069	21,141	4.01
Operating Income	84,632	25,864	(58,768)	(69.44)
Non-operating Income and Expense	19,402	17,481	(1,921)	(9.90)
Income Before Tax	104,034	43,345	(60,689)	(58.34)
Income Tax	29,118	2,790	(26,328)	(90.42)
Net Income	74,916	40,555	(34,361)	(45.87)

Analysis of changes in financial ratios, which changes more than 20% and the changed amount is over

1. Operating Income: mainly due to the decrease in operation income and increase of Expense.
2. Income Before Tax: mainly due to decrease in operation income and increase of Expense.
3. Income Tax: mainly due to decrease in operation income and increase of Expense.
4. Net Income: mainly due to decrease in operation income and increase of Expense.

B. Estimated sales volume and its basis, the possible impact on the company's future financial business and the response plan:

With the booming development of global communication products, Internet, cable TV, wireless base stations, smart grids and cloud demand, the aging of existing global power infrastructure and power grids has led to end-use applications such as personal desktops. PCs, large-scale data centers for enterprises, large-scale computer equipment for public infrastructure, and other types of electronic digital devices all have stable power supply protection requirements, which makes UPS products almost indispensable standard equipment, so the world The UPS industry has shown a steady growth trend in recent years. According to the 2019 report of the industry survey company, if 2018 is the base period, it is estimated that the global UPS market will grow at a complex growth rate of about 3 to 5% every year from 2019 to 2025, and the market size will reach more than US \$ 13.5 billion in 2025.

PV Inverter is a part of the solar energy industry. According to the research of Energy Trend, Global demand is expected to continue to grow. Since the addition of 1GW of new grid connections in 2018, the solar energy market in Taiwan has become the focus of global attention. The government has also actively implemented the second phase of the two-year solar photovoltaic project. At the end of September, the cumulative installed capacity has reached 3.8GW, and the adjustment of the new version of the purchase rate in 2020 will help Taiwan move towards the target of cumulative installed capacity of 6.5GW by 2020.

In considering the market development situation and the company's own conditions, besides continuing to expand the ODM and OBM business in the international market of UPS, and actively participate in domestic UPS project engineering projects and provide maintenance services, as well as sales of solar power converters under our own brand. The company will aim to increase overall profitability, increase the sales volume and sales of various products, and actively increase the market share of various products.

7.3 Analysis of Cash Flow

7.3.1 Liquidity analysis of the recent years

Item \ Year	2019	2018	Financial ratio change
Current ratio	4.65	10.17	-54.28%
Cash Flow adequacy ratio	54.87	44.29	23.89%
Cash reinvestment ratio	0.00	0.00	0.00%

Analysis of financial ratio change:

- (1) Current ratio : The net cash inflows from operating activities decreased by approximately 46.71% over the previous year, and the current liabilities for the year 2019 increased over the previous year due to the Company's 2019 annual revenue and pre-tax net profit declined. Therefore, the ratio has increased significantly.
- (2) Cash Flow adequacy ratio : The net cash inflow from the Company's business activities in the past five years is not sufficient to cover the capital expenditure, inventory increase and cash dividends in the corresponding period, so the ratio is less than 1. The net cash inflow from operating activities in 2019 still insufficient to support the annual capital expenditures and increase in inventories and the payment of cash dividends, the gap has been greatly reduced compared with that in 2014, so the proportion has increased.
- (3) Cash reinvestment ratio : The net cash inflow from operating activities for 2019 was less than the amount after cash dividends were paid, so the ratio was zero.

7.3.2 Remedy for cash deficit and liquidity insufficient: Operating profits of the company has been stable, still get full support from financial institutions and no liquidity insufficient up to the date of the report printed.

7.3.3 Analysis of cash liquidity in 1 year

Unit: NT\$ thousand

Beginning cash balance (1)	Expected net cash flow from operating activity of the year (2)	Expected cash outflow of the year (3)	Expected cash surplus (deficit) (1)+(2)-(3)	Remedial measures for the expected insufficient cash	
				Investing plan	Financing plan
224,475	139,246	77,200	286,521	-	-

1. Analysis of cash flow change in one year:

- (1) Operating activity : It is expected that the profit will be maintained in 2020. With the A/P and A/R conditions and the control of inventory, it is expected that the business activities will continue to show a net inflow of cash.
- (2) Investing activity : Mainly for research and development equipment purchase and production line equipment updates and upgrades.
- (3) Financing activity : It is expected to repay loans from financial institutions and distribute cash dividends. It is expected that the financing activities will be net cash outflows.

2. Remedial measures for the expected insufficient cash and liquidity analysis: N/A

7.4 Impact of major capital expenditure on finance and business : None

7.5 Investment policies, reasons for gain or loss and improvement plan in regard to investment plans in current year and the next year

7.5.1 Investment Policies:

In response to the need to strengthen the company's business development and upstream and downstream integration, the company will be prepared to assess the implementation of the investment plan after the investment.

7.5.2 Reasons for gain or loss and improvement plan in regard to investment plans in current year

Dec. 31, 2018; Unit: NTD thousand

Invested Company	Invested Amount	Investment Policy	Recognition of the investment gain or loss in the latest year	Main reason of gain or loss	Improvement plan
Joint Rewards Trading Corp.	US\$ 3	Trading Company between AblereX and AblereX-SZ.	NT\$(46)	Annual expenditure	-
AblereX Electronics (SAMOA) Co. LTD.	US\$ 6,635	To set up AblereX-SZ and Holding company of AblereX-BJ.	NT\$(3,490)	mainly recognized profit loss from ABLEREX-SZ	Increase sales and reduce cost
AblereX Corporation	US\$ 250	To promote and sales for America territory.	NT\$(6,076)	mainly recognized profit loss from ABLEREX-LATAM	Increase sales and reduce cost
AblereX International Corp. LTD.	HK\$ 10	Trading Company between AblereX and AblereX-SZ.	NT\$507	Support to expand sales	-
AblereX Electronics(s) PTE. LTD	US\$ 1,480	To promote and sales for EMEA.	NT\$5,735	Expand sales territory	-
AblereX Electronics UK LTD.	GBP 100	To set up Holding company of AblereX-IT.	NT\$(288)	recognized profit gain from ABLEREX-IT	Increase sales and reduce cost
WADA DENKI CO., LTD.	JPY 30,000	To promote and sales for Japan territory.	(NTD1,911)	expand stage for market	Increase sales and reduce cost

Note: The Company recognizes the write-down of the investment gains and losses.

7.5.3 Investment Plan in the next year: None

7.6 Risk Management and Evaluation until the report printed

7.6.1 The impact of interest rate, exchange rate, and inflation on the company's income and expense and the responsive measures:

1. The impact of interest rate change:

The financial costs of the Group for 2019 and 2018 were NTD5,497 thousands and NTD2,448 thousands respectively, and the financial cost expenses accounted for 0.22% and 0.10% of the net operating income for the current period. The financial cost expenses accounted for a very small proportion of the net operating income of the Group, and the Group's loan are fixed-rate loans due within 6 months, so no significant fair value interest rate risk is expected to occur. The Group will maintain a close relationship with the correspondent banks based

on the principle of sound and conservative financial management, so as to immediately grasp relevant information on interest rate changes and reduce the impact of interest rate fluctuations on the Group.

2. The impact of exchange rate fluctuation:

The business of the Group involves a number of non-functional currencies (the functional currency of the Company is NT and the functional currency of some subsidiaries is US \$ and RMB). Therefore, the foreign currency assets affected by the exchange rate fluctuation and liability information and foreign currency market risk analysis as Chinese version of 2019 annual report.

3. The responsive measures to the risk of exchange rate fluctuation:

- a. Continue to strengthen personnel concepts for exchange hedging, through a greater interaction for real exchange rate system with financial institutions, so as to judge to the impact of exchange rate fluctuations arising.
- b. Before quoting to customer, the company will estimate the trends and factors that influence the exchange rate in future. More comprehensive consideration is required to determine a reasonable pricing and to minimize the effect of changes in the exchange rate.
- c. To achieve a certain degree of natural hedging effect through an offset for regular A/P and A/R.
- d. Under the "Regulations Governing the Acquisition and Disposal of Assets", the company will effectively reduce the purchase of various assess derivative financial instruments exchange rate risks by hedging part of responsibilities in charge of strict control to prevent inappropriate transactions to reduce exchange rate risks arising from the exchange losses.

4. The impact of inflation

The company has not been inflationary circumstances have a significant impact on profit or loss so far. In addition to pay attention to fluctuations in the market price, and to maintain a good interaction with suppliers and customers, in order to adjust product prices and raw material stocks. It should be able to effectively reduce the impact of inflation on the Company.

7.6.2 Conducting high-risk and high-leveraged investment, granting loans to others, endorsement & guarantee and derivatives policy, main cause of profit and loss, and the responsive measures:

- a. The company has dedicated to the core business since established. No high-risk nor high-leveraged investment has been implemented.
- b. The company conducts loaning funds according to "Regulations Governing Loaning of Funds

and Making of Endorsements/Guarantees". The information of the company and the subsidiaries loaning funds to others up to the date of the report printed is disclosed as the following:

(1) Information of the subsidiaries loaning funds to others up to the date of the report printed :

Date of loan funds	Date approved by BoD	Company Name	Approved loan	Loan balance	Rate	Collateral	Due date	Date approved by BoD
2019/8/15	2019/5/5	AblereX Latam Corporation	US\$1,000,000	USD500,000	5.0%	Due for repayment	Credit	2020/8/15
2020/3/13				USD300,000				2021/3/13
2020/3/18				USD200,000				2021/3/18

(2) Subsidiary of the company, The Company's subsidiary company funds loans and other information:

AblereX International Corporation Limited (AblereX-HK), a subsidiary of the Company, is funded with AblereX Electronics (Suzhou) Co., Ltd. (abbreviation AblereX-SZ) for the development of its operations. The status of loaning is listed below

Date of loan funds	Date approved by BoD	Company Name	Amount	Rate	Repayment	Collateral	Due date	Date approved by BoD
2019/8/23	2019/8/5	AblereX Electronics (Suzhou) Co., Ltd.	US\$3,000,000	USD2,000,000	2.475%	Due for repayment	Credit	2022/8/22

(3) The company conducts endorsement guarantees according to the internal policy "Procedures for Making of Endorsements / Guarantees". Information of the company and the subsidiaries making endorsements / guarantees up to the date of the report printed is disclosed as the following:

Unit: US\$

Date of Endorsement / Guarantee	Date approved by BoD	Guaranteed Company	Relationship with AblereX	Collateral	Guarantee Items	Undertaking Bank	Endorsement/ Guarantee Amount
2019/12/9	2019/8/5	AblereX-HK	Subsidiary	N/A	Bank financing	China Trust	USD 2,000,000
2019/12/10	2019/11/11	AblereX-HK	Subsidiary	N/A	Bank financing	Taipei Fubon	USD 2,500,000
Total							USD 4,500,000

(4) The purpose of the company engaging in the derivatives trading is to avoid the risk of change in foreign currency assets or liabilities due to the fluctuation of exchange rate. The derivatives trading is focused on forward foreign exchange contract, and

the trading procedure is abided by the internal regulation “Procedures for Acquisition or Disposal of Assets”. The risk of derivatives trading is limited.

7.6.3 Future R&D projects and corresponding budget:

It is fundamental for R&D in the electronic industry. So the R&D should provide the plan every year. According to plan provision related to R&D to ensure competitive niche of the Company. The company has always attached great importance to research and development of products, the trend growth of the R&D costs in the following table to know the year, the future will continue to foster outstanding research and development personnel and actively involved in research resources to cope with the changing market trends and improve their own it Competitiveness.

The Company's research and development philosophy is:

- (1) to focus on improving power quality and improve reliability of power supply products
- (2) development and integration of advanced power electronics and digital control technology
- (3) introduced into academic research, access to innovation and key technologies
- (4) the implementation of the patented technology layout, improve the industry barriers to competition
- (5) really grasp technology trends and market demand, real-time development of new products

The company's future research plans and programs as follows:

- (1) small size, intelligence, and other network-oriented and decentralized
- (2) three-phase high frequency parallel among large UPS
- (3) Power Quality Management Technology
- (4) and the power-grid PV Inverter
- (5) Power Management Software Technology
- (6) Smart Grid Applications Related Products
- (7) Wireless Battery Monitoring System (Wireless BMS)

The investment for last three years and the research and development costs expected in 2016 as follows:

Unit : NTD in Thousands				
Item / Year	2017	2018	2019	Expected in 2020
R&D invested	144,289	151,895	142,655	159,352
Growth	3.65%	5.27%	-6.08%	11.70%

7.6.4 The impact of domestic and international policies and law change on the company's finance and business and the responsive measures:

The company follows national policies, decrees and international norms, implements

various operating activities, and holds the changes in important policies, laws and regulations, and timely adjusts the company's internal systems and operating activities in order to comply with the specifications and ensure smooth operation of the company. Currently, the company has no significant impact on finance and business due to changes in domestic and foreign regulations.

7.6.5 The impact of technology change and industrial change on the company's finance and business and the responsive measures:

UPS is the technology-intensive industry, so the development of light-weight, thin, short, small, along with Wisdom, modular, web-based products will be powerful to gain a competitive advantage in the market. In addition to strengthening the Company to enhance UPS equipment, but also committed to the development of high value-added systems improve power quality and green energy systems, Energy Storage System and related power electronics products. Every year, the company has invested a large amount of research and development manpower and funds to engage in theoretical and applied research and design and development of new products, in order to respond to the trend of future electronic products, and maintain a competitive advantage. Therefore, technological changes and industrial changes have no significant impact on the company.

7.6.6 The impact of industrial image change on business risk management and the responsive measures:

Since the venture has been to uphold the integrity of sound for business purposes, continue to strengthen internal management and improve the quality of management capacity to establish a good corporate image of the company, the company got quite good records on Corporate Governance Evaluation in past years and planning to enter the capital market can absorb more talented people into the company service. Enrich management team strength, operating results will contribute to the society. There was not significant change of corporate image for recent years. The company will be in the pursuit of the largest shareholders' equity and the interests of employees and fulfill the greatest social responsibility in future.

7.6.7 The expected effect, potential risk, and responsive measures of merger:

The company's did not have any merger conducted in 2019 and up to the date of the annual report printed.

7.6.8 The expected effect, potential risk, and responsive measures of plant expansion:

The company's did not have any plant expansion in 2019 and up to the date of the annual report printed.

7.6.9 The risk due to concentration of procurements and sales and the responsive measures:

a. The risk due to concentration of procurements and the responsive measures:

The main raw materials of the company's products include batteries, steel sheets, transformers, semiconductor electronic components, etc. Due to the large number of suppliers, the purchase amount and proportion of each manufacturer will not be too high or

excessively dependent, so there is no excessive concentration of purchases Risk. In order to maintain flexibility in the bargaining of raw material prices, the company has not forced to sign long-term supply contracts with suppliers, but in terms of major raw materials, it maintains the supply of several suppliers, and the company and each supplier All maintain a long-term good cooperative relationship to ensure the stability of the supply source.

b. The risk due to concentration of sales and the responsive measures:

The company's main sales target is branded customers and agency distributors all over the world. However, under the trend of global corporate mergers and acquisitions, there is indeed a trend of centralized sales; this trend will make the company face production and revenue vulnerable to a small number of customers. And face greater price pressure. The Company has adopted product diversification and actively expanded its response to emerging markets. It will tend to diversify the products, customers, and regional combinations that are shipped to prevent the risk of excessive sales concentration.

7.6.10 The impact of massive stock transfer or change by directors, supervisors, and shareholders with over 10% shareholding, the risk, and the responsive measures:

There was not any massive stock transfer or change by directors, supervisors, and shareholders with over 10% shareholding in 2019 and up to the date of the annual report printed.

7.6.11 The impact of right to operation change on the company, the risk, and the responsive measures:

No right to operation change on the company up to the date of the annual report printed

7.6.12 Legal and non-legal events:

(1) The result of the judgments settled or ongoing lawsuits, non-lawsuits or administrative lawsuits in the last 2 years up to the date of the report printed, which could cause significant impact on shareholders' equity or security price of the company, should reveal the arguing facts, amount engaged, litigation starting date, the main parties of the suit, and present situation: None.

(2) Major ongoing lawsuits, non-lawsuits or administrative lawsuits caused by Directors, Supervisors, President, Person in charge, and shareholders with over 10% holdings of the company and subsidiaries in the last 2 years up to the date of the report printed. The result could cause significant impact on shareholders' equity or security price of the company: None.

(3) Anything listed in Article 157 of Securities and Exchange Act had been implemented by Directors, Supervisors, managers, and shareholders with over 10% holdings of the company and the response of the company in the last 2 years up to the date of the report reprinted:

None

7.6.13 Other significant risks and responsive measures: None

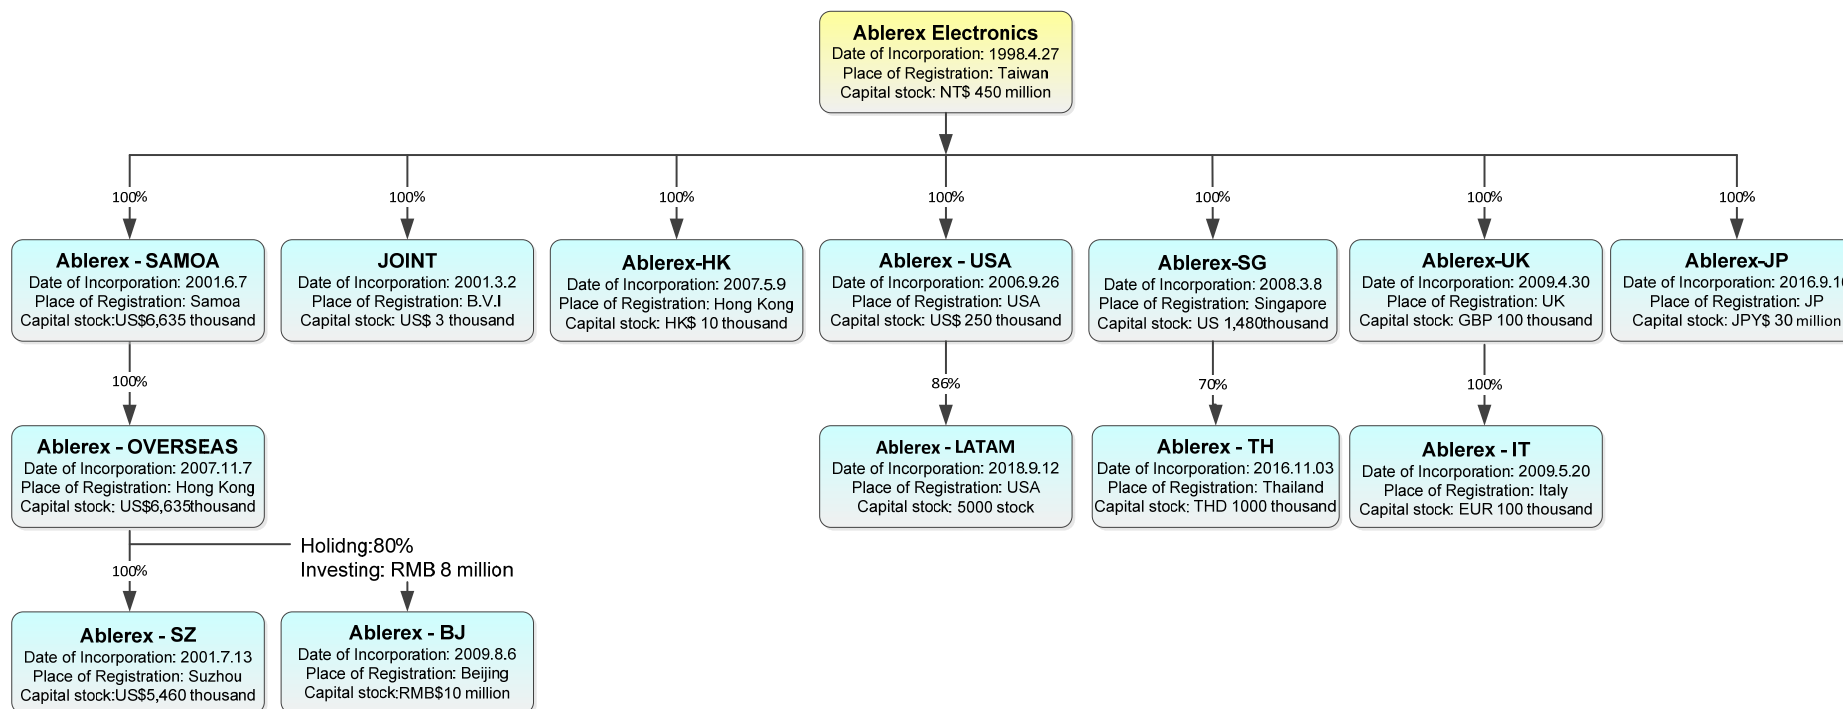

7.7 Other important matters: None

Ablerex Electronics Company Limited
Statement of Internal Control System

Date: March 19, 2020

Based on the findings of a self-assessment, Ablerex Electronics Company Limited (Ablerex) states the following with regard to its internal control system during the year 2018:

1. Ablerex's Board of Directors and Management are responsible for establishing, implementing, and maintaining an adequate internal control system. Our internal control is a process designed to provide reasonable assurance over the effectiveness and efficiency of our operations (including profitability, performance, and safeguarding of assets), reliability of our financial reporting, and compliance with applicable laws and regulations.
2. An internal control system has inherent limitations. No matter how perfectly designed, an effective internal control system can provide only reasonable assurance of accomplishing its stated objectives. Moreover, the effectiveness of an internal control system may be subject to changes due to extenuating circumstances beyond our control. Nevertheless, our internal control system contains self-monitoring mechanisms, and Ablerex takes immediate remedial actions in response to any identified deficiencies.
3. Ablerex evaluates the design and operating effectiveness of its internal control system based on the criteria provided in the Regulations Governing the Establishment of Internal Control Systems by Public Companies (herein below, the Regulations). The criteria adopted by the Regulations identify five key components of managerial internal control: (1) control environment, (2) risk assessment, (3) control activities, (4) information and communication, and (5) monitoring.
4. Ablerex has evaluated the design and operating effectiveness of its internal control system according to the aforesaid Regulations.
5. Based on the findings of such evaluation, Ablerex believes that on December 31, 2019, it has maintained, in all material respects an effective internal control system (that includes the supervision and management of our subsidiaries) to provide reasonable assurance over our operational effectiveness and efficiency, reliability of financial reporting, and compliance with applicable laws and regulations.
6. This Statement will be an integral part of Ablerex's Annual Report for the year 2018 and Prospectus, and will be made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Law.
7. This Statement has been passed by the Board of Directors in their meeting held on March 19, 2020, with none of the seven attending directors expressing dissenting opinions, and the remainder all affirming the content of this Statement.

CONSOLIDATED FINANCIAL STATEMENTS AND
REPORT OF INDEPENDENT ACCOUNTANTS
DECEMBER 31, 2019 AND 2018**

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

ABLEREX ELECTRONICS CO., LTD. AND SUBSIDIARIES
Declaration of Consolidated Financial Statements of Affiliated Enterprises

For the year ended December 31, 2019, pursuant to “Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises,” the company that is required to be included in the consolidated financial statements of affiliates, is the same as the company required to be included in the consolidated financial statements of parent and subsidiary companies under International Financial Reporting Standard 10. If relevant information that should be disclosed in the consolidated financial statements of affiliates has all been disclosed in the consolidated financial statements of parent and subsidiary companies, it shall not be required to prepare separate consolidated financial statements of affiliates.

Hereby declare,

ABLEREX ELECTRONICS CO., LTD.

Wen Hsu, Chairman

March 19, 2020

REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of ABLEREX ELECTRONICS CO., LTD.

Opinion

We have audited the accompanying consolidated balance sheets of Ablere Electronics Co., Ltd. and its subsidiaries (the “Group”) as at December 31, 2019 and 2018, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2019 and 2018, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

Basis for opinion

We conducted our audits of the consolidated financial statements as of and for the year ended December 31, 2019 in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants”, “Rule No. Financial-Supervisory-Securities-Auditing-1090360805 issued by the Financial Supervisory Commission on February 25, 2020” and generally accepted auditing standards in the Republic of China (ROC GAAS); and in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants” and generally accepted auditing standards in the Republic of China (ROC GAAS) for our audits of the consolidated financial statements as of and for the year ended December 31, 2018. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Professional Ethics for Certified Public Accountants in the Republic of China (the “Code”), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters. Key audit matters for the Group's consolidated financial statements of the current period are stated as follows:

Appropriateness of cut-off of project construction revenue

Description

Please refer to Note 4(27) for accounting policy on revenue recognition, Note 6(17) for composition of operating revenue and Note 14(5) for information on products and services. For the year ended December 31, 2019, the Group's project construction revenue amounted to NT\$958,810 thousand, accounting for 39% of consolidated net sales.

The Group's operating revenue is comprised of sales revenue and project construction revenue. The main composition of the project construction revenue is the sale of large equipment and installation related projects. The project needs to be completed through the Group's installation of large-scale equipment, and after the relevant documents are executed by both parties and the client can obtain and consume the benefits provided by the asset, the Group will have deemed to have completed the contractual performance obligations and can recognize the project construction revenue. Due to the fact that the income of the Group's project construction involves manual operation, it may result to inappropriate timing recognition of revenue. Considering that the amount of income recognized by the Group's project construction in a timely manner has a significant impact on the consolidated financial statements, we have deemed the appropriateness of the project construction income as one of the significant audit matters for the year.

How our audit addressed the matter

We performed the following audit procedures in order to assess cut-off of project construction revenue:

1. Assessed and obtained an understanding of the Group's internal control procedures of the project construction revenue recognition, and confirmed the related internal controls were performed effectively.
2. Performed cut-off test on project construction revenue transactions, and selected samples to check that the project construction revenue had been recorded in the proper period accordingly.

3. Tested the accuracy and completeness of project construction list and traced to a related document that can prove revenue in order to confirm that the recognition amount and timing were appropriate.

Valuation of allowance for inventory valuation losses

Description

Please refer to Note 4(12) for accounting policy on inventory valuation, Note 5(2) for accounting estimates and assumption uncertainty in relation to inventory valuation, and Note 6(5) for the details of allowance for inventory valuation losses. As of December 31, 2019, the Group's inventories and allowance for inventory valuation losses amounted to NT \$1,136,739 thousand and NT \$135,184 thousand, respectively.

The Group is engaged in the design, manufacture and sales of uninterruptible power supply systems, equipment to power quality devices and others. Due to the rapid technological innovations and the competitive nature of the market, there is a higher risk of inventory losses due to the market value decline or obsolescence. The Group recognises inventories at the lower of cost and net realisable value. Obsolete or slow-moving inventories were assessed individually.

The Group's estimation and determination of the net realizable value of inventories are subjected to management's judgement, involves a high level of uncertainty and has a material effect on the financial statements. Therefore, it was identified as a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in order to assess the adequacy of the measurement of net realisable value and provision on allowance for inventory valuation losses:

1. Assessed the reasonableness of policies relating to the provision of allowance for inventory valuation losses and procedures based on our understanding of the Group's operation and industry.
2. Verified the accuracy of the inventory aging report and net realisable value report in order to confirm that the information in the reports were consistent with the Group's inventory policies.
3. Checked the appropriateness of the estimation basis adopted by the Group for the evaluation of the net realizable value, verified the accuracy of inventory selling and purchase prices, and recalculated and evaluated the reasonableness of allowance for inventory valuation losses.

Other matter – Parent company only financial reports

We have audited and expressed an unqualified opinion on the parent company only financial statements of Ablere Electronics Co., Ltd. as at and for the years ended December 31, 2019 and 2018.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so. Those charged with governance, including supervisors, are responsible for overseeing the Group’s financial reporting process.

Auditor’s responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern.
If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements.
We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Cash and cash equivalents at beginning of year		186,063	255,339
Cash and cash equivalents at end of year		\$ 224,475	\$ 186,063

The accompanying notes are an integral part of these consolidated financial statements.

ABLEREX ELECTRONICS CO., LTD. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2019 AND 2018

(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. History and Organization

- (1) Ablere Electronics Co., Ltd (the “Company”), formerly UIS Abler Electronics Co., Ltd., was incorporated under the provisions of the Company Law of the Republic of China (R.O.C.) on April 27, 1998. The Company merged with PEC Technology Co., Ltd. on April 1, 2002, with the Company as the surviving company and was then renamed as Ablere Electronics Co., Ltd. The shares of the Company have been trading on the Taipei Exchange since September 9, 2010.
- (2) The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in the following business activities:
- (a) Manufacturing and sales of uninterruptible power supply systems.
 - (b) Manufacturing and sales of equipment to power quality devices.
 - (c) Manufacturing and sales of solar energy equipment.
 - (d) Maintenance and technical services.

2. The Date of Authorization for Issuance of the Financial Statements and Procedures for Authorization

These consolidated financial statements were authorised for issuance by the Board of Directors on March 19, 2020.

3. Application of New Standards, Amendments and Interpretations

- (1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS”) as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC effective from 2019 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 9, ‘Prepayment features with negative compensation’	January 1, 2019
IFRS 16, ‘Leases’	January 1, 2019
Amendments to IAS 19, ‘Plan amendment, curtailment or settlement’	January 1, 2019
Amendments to IAS 28, ‘Long-term interests in associates and joint ventures’	January 1, 2019
IFRIC 23, ‘Uncertainty over income tax treatments’	January 1, 2019
Annual improvements to IFRSs 2015-2017 cycle	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

IFRS 16, 'Leases'

- A. IFRS 16, 'Leases', replaces IAS 17, 'Leases' and related interpretations and SICs. The standard requires lessees to recognise a 'right-of-use asset' and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.
- B. The Group has elected to apply IFRS 16 by not restating the comparative information (referred herein as the 'modified retrospective approach') when applying "IFRSs" effective in 2019 as endorsed by the FSC. Accordingly, the Group increased 'right-of-use asset' by \$25,708, increased 'lease liability' by \$24,744 and decreased other non-current assets by \$964 with respect to the lease contracts of lessees on January 1, 2019.
- C. The Group has used the following practical expedients permitted by the standard at the date of initial application of IFRS 16:
- (a) Reassessment as to whether a contract is, or contains, a lease is not required, instead, the application of IFRS 16 depends on whether or not the contracts were previously identified as leases applying IAS 17 and IFRIC 4.
 - (b) The use of a single discount rate to a portfolio of leases with reasonably similar characteristics.
 - (c) The exclusion of initial direct costs for the measurement of 'right-of-use asset'.
 - (d) The use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.
- D. The Group calculated the present value of lease liabilities by using weighted average incremental borrowing interest rate range from 1.55% to 10.31%.
- E. The Group recognised lease liabilities which had previously been classified as 'operating leases' under the principles of IAS 17, 'Leases'. The reconciliation between operating lease commitments under IAS 17 measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate and lease liabilities recognised as of January 1, 2019 is as follows:

Operating lease commitments disclosed by applying IAS 17 as at	\$	11,522
December 31, 2018		
Less: Short-term leases	(187)
Less: Low-value assets	(315)
Add: Adjustments as a result of a different treatment of extension and termination options		15,187
Total lease contracts amount recognised as lease liabilities by applying IFRS 16 on January 1, 2019	\$	26,207
Incremental borrowing interest rate at the date of initial application		1.55%~10.31%
Lease liabilities recognised as at January 1, 2019 by applying IFRS 16	\$	24,744

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2020 are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by International Accounting Standards Board</u>
Amendment to IAS 1 and IAS 8, 'Disclosure Initiative-Definition of Material'	January 1, 2020
Amendments to IFRS 3, 'Definition of a business'	January 1, 2020
Amendments to IFRS 9, IAS 39 and IFRS7, 'Interest rate benchmark reform'	January 1, 2020

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by International Accounting Standards Board</u>
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by International Accounting Standards Board
IFRS 17, 'Insurance contracts'	January 1, 2021
Amendments to IAS 1, 'Classification of liabilities as current or non-current'	January 1, 2022

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs").

(2) Basis of preparation

- A. Except for the following items, the consolidated financial statements have been prepared under the historical cost convention:
- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
 - (b) Financial assets at fair value through other comprehensive income.
 - (c) Defined benefit liabilities recognised based on the net amount of pension fund assets plus less present value of defined benefit obligations.
- B. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

- A. Basis for preparation of consolidated financial statements:
- (a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
 - (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
 - (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
 - (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
 - (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are

reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

B. Subsidiaries included in the consolidated financial statements:

Name of investor	Name of subsidiary	Main business activities	Ownership (%)		Description
			December 31, 2019	December 31, 2018	
The Company	Ablerex Electronics (Samoa) Co., Ltd. (Ablerex Samoa)	Investment holdings	100	100	Note 1
The Company	Joint Rewards Trading Corp. (Joint)	Management service	100	100	Note 1
The Company	Ablerex Corporation (Ablerex-USA)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	Note 1
The Company	Ablerex International Co., Ltd. (Ablerex-HK)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	Note 1
The Company	Ablerex Electronics (S) Pte. Ltd. (Ablerex-SG)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	Note 1
The Company	Ablerex Electronics U.K. Ltd. (Ablerex-UK)	Investment holdings	100	100	Note 1
The Company	Wada Denki Co., Ltd. (Ablerex-JP)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	Note 1
Ablerex Electronics U.K. Ltd.	Ablerex Electronics Italy S.R.L. (Ablerex-IT)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	Note 1
Ablerex Electronics (Samoa) Co., Ltd.	Ablerex Overseas Co., Ltd. (Ablerex-Overseas)	Investment holdings	100	100	Note 1
Ablerex Overseas Co., Ltd.	Ablerex Electronics (Suzhou) Co., Ltd. (Ablerex-SZ)	Manufacturing and sales of uninterruptible power supply systems and solar energy equipment and others	100	100	Note 1
Ablerex Overseas Co., Ltd.	Ablerex Electronics (Beijing) Co., Ltd. (Ablerex-BJ)	Sales of uninterruptible power supply systems and solar energy equipment and others	80	80	Note 1
Ablerex Electronics (S) Pte. Ltd.	Ablerex Electronics (Thailand) Co., Ltd. (Ablerex-TH)	Sales of uninterruptible power supply systems and solar energy equipment and others	70	70	Note 1
Ablerex Corporation	Ablerex Latam Corporation (Ablerex-Latam)	Sales of uninterruptible power supply systems and solar energy equipment and others	86	100	Note 1, 2

Note 1: The information included in these consolidated financial statements as December 31, 2019 and 2018 is based on the audited financial statement of the investee.

Note 2: The consideration for acquiring the ownership of AblereX Latam Corporation was remitted on November 28, 2018. The investee was included in these consolidated financial statements thereafter. In addition, AblereX-Latam increased its capital to employees on February 7, 2019. As a result, the Company decreased its share interest to 86%.

C. Subsidiaries not included in the consolidated financial statements: None.

D. Adjustments for subsidiaries with different balance sheet dates: None.

E. Significant restrictions

Cash and short-term deposits of \$56,591 deposited in Mainland China are under local foreign exchange control which restricts the capital to be remitted outside the borders (except for normal dividend distribution).

F. Subsidiaries that have non-controlling interests that are material to the Group: None.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.

A. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

(d) All foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses'.

B. Translation of foreign operations

- (a) The operating results and financial position of all the group entities associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
 - (b) Assets held mainly for trading purposes;
 - (c) Assets that are expected to be realised within twelve months from the balance sheet date;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled within the normal operating cycle;
 - (b) Liabilities arising mainly from trading activities;
 - (c) Liabilities that are to be settled within twelve months from the balance sheet date;
 - (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amount of cash and subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets; and
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:
 - (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
 - (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(8) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(9) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(10) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(11) Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire.

(12) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated fixed production overheads based on normal capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(13) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Buildings and structures	10~50 years
Machinery and equipment	5~10 years
Transportation equipment	5 years
Office equipment	5~10 years
Leasehold improvements	10 years

(14) Leasing arrangements (lessee) – right-of-use assets/ lease liabilities

Effective 2019 (using the modified retrospective approach)

A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.

B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are mainly fixed payments, less any lease incentives receivable.

The Group subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost and the cost is mainly the amount of the initial measurement of lease liability.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term.

When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

(15) Operating leases (lessee)

Effective 2018

Payments made under an operating lease (net of any incentives received from the lessor) are recognised in profit or loss on a straight-line basis over the lease term.

(16) Intangible assets

A. Trademark right and patent rights

Trademark right and patent rights are stated at cost, have a finite useful life and are amortised on a straight-line basis over its estimated useful life of 5 years.

B. Computer software

Computer software is stated at cost and amortised on a straight-line basis over its estimated useful life of 3~5 years.

C. Goodwill

Goodwill arises in a business combination accounted for by applying the acquisition method.

(17) Impairment of non-financial assets

- A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior years no longer exist or diminish, the impairment is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.
- B. The recoverable amounts of goodwill shall be evaluated periodically. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognised in profit or loss shall not be reversed in the following years.
- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(18) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(19) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(20) Financial assets at fair value through profit or loss

- A. Financial liabilities are classified in his category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures the financial liabilities at fair value with any gain or loss recognised in profit or loss.

(21) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(22) Provisions

Provisions (primarily warranties) are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(23) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised past service costs. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of government bonds (at the balance sheet date) of a currency and term consistent with the currency and term of the employment benefit obligations.
- ii. Remeasurement arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.
- iii. Past service costs are recognised immediately in profit or loss.

C. Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of employment as a result from the Group's decision to terminate an employee's employment before the normal retirement date, or an employee's decision to accept an offer of redundancy benefits in exchange for the termination of employment. The Group recognises termination benefits when it

is demonstrably committed to a termination, when it has a detailed formal plan to terminate the employment of current employees and when it can no longer withdraw the plan. In the case of an offer made by the Group to encourage voluntary termination of employment, the termination benefits are recognised as expenses only when it is probable that the employees are expected to accept the offer and the number of the employees taking the offer can be reliably estimated. Benefits falling due more than 12 months after balance sheet date are discounted to their present value.

D. Employees', directors' and supervisors' remuneration

Employees', directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is distributed by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(24) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

(25) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(26) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(27) Revenue recognition

A. Sales revenue

- (a) The Group manufactures and sells uninterrupted power supply equipment and system, improved power quality system and equipment and solar energy equipment and other related products. Sales are recognised when control of the products has transferred, being when the products are delivered to the wholesaler, the wholesaler has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the wholesaler's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the wholesaler, and either the wholesaler has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- (b) The Group's obligation to provide a repair for faulty products under the standard warranty terms is recognised as a provision.
- (c) A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Sale of goods—Project construction

- (a) The Group provides sales services related to uninterruptible power system and equipment, improved power quality system and equipment and solar energy system and equipment. The project construction revenue includes equipment sales and installation services, and the

contract involves and provides integrated services. Therefore, the equipment and installation are indistinguishable and are regarded as a single performance obligation. The Group installs equipment, the customer performs the acceptance procedure, and the Group opens the warranty book. The customer obtains the control of the equipment and the benefits arising therefrom. When all the acceptance criteria are met, the Group completes the contractual performance obligated of contract to recognize revenue.

- (b) The Group's obligation to provide a repair for project construction under the standard warranty terms is recognised as a provision.
- (c) A receivable is recognized when the project construction is completed and the warranty book is delivered to the customer. As this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

C. Service revenue

The Group provides related services of maintaining uninterruptible power supply equipment, improved power quality system and equipment and solar energy system and equipment. Service revenue is recognized as income during the financial reporting period in which the services are provided to customers. Revenue from fixed price contracts is recognised as a percentage of the number of months of service actually provided on the balance sheet date. The customer pays the contract price in accordance with the payment schedule agreed upon, and is recognized as a contract assets when the services provided by the Group exceed the customer's payables, and are recognized as contract liabilities if the customer pays more than the services provided by the Group.

D. Costs of obtaining a customer contract

Given that the contractual period lasts less than one year, the Group recognises the incremental costs of obtaining a contract as an expense when incurred although the Group expects to recover those costs.

(28) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The Group's Chief Operating Decision-Maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

5. Critical Accounting Judgements, Estimates and Key Sources of Assumption Uncertainty

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Critical judgements in applying the Group's accounting policies

None.

(2) Critical accounting estimates and assumptions

A. Evaluation of inventories

Evaluation of inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

As of December 31, 2019, the Group's carrying amount of inventories was \$1,001,555.

B. Estimation of provisions for liabilities

The sale of goods requires consideration of the cost incurred or to be incurred in connection with the transaction. Therefore, the Group formulates the proposed policy for the determination of the warranty for the sale of the product, which is used to measure the actual operating profit and loss of the company. The Group's liability determination is based on the Group's policy based on the historical warranty data of the product as the basis for the assessment, and the related product warranty liabilities are estimated to estimate the future maintenance costs.

As of December 31, 2019, the Group estimated the liability provision to be \$40,441.

6. Details of Significant Accounts

(1) Cash and cash equivalents

	<u>December 31, 2019</u>	<u>December 31, 2018</u>
Cash on hand and revolving funds	\$ 876	\$ 828
Checking accounts and demand deposits	211,864	150,915
Time deposits	11,929	34,514
	<u>224,669</u>	<u>186,257</u>
Transferred to 'Other current assets'	(194)	(194)
	<u>\$ 224,475</u>	<u>\$ 186,063</u>

A. The Group transacts with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote.

B. For details on cash and cash equivalents provided as a pledge or collateral, please refer to Note 8.

(2) Financial assets at fair value through other comprehensive income

<u>Items</u>	<u>December 31, 2019</u>	<u>December 31, 2018</u>
Non-current items:		
Equity instruments		
Unlisted stocks	<u>\$ 81,000</u>	<u>\$ -</u>

A. The Group has elected to classify equity instruments that are considered to be strategic investments as financial assets at fair value through other comprehensive income. The fair value of such investments amounted to \$81,000 and \$0 as at December 31, 2019 and 2018, respectively.

- B. Amounts recognised in profit or loss and other comprehensive income in relation to the financial assets at fair value through other comprehensive income are both \$0 for the years ended December 31, 2019 and 2018.
- C. As at December 31, 2019, 2018, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the financial assets at fair value through other comprehensive income held by the Group was \$81,000 and \$0, respectively.

(3) Financial assets at amortised cost

Items	December 31, 2019	December 31, 2018
Current items:		
Time deposits expiring beyond three years	<u>\$ 12,915</u>	<u>\$ 15,222</u>

- A. Amounts recognised in profit or loss in relation to financial assets at amortised cost are listed below:

	2019	2018
Interest income	<u>\$ 280</u>	<u>\$ 267</u>

- B. As at December 31, 2019 and 2018, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the financial assets at amortised cost held by the Group was \$12,915 and \$15,222, respectively.
- C. The Group are not provided financial assets at amortised cost pledged to others as collateral.
- D. Information relating to credit risk of financial assets at amortised cost is provided in Note 12(2).

(4) Notes and accounts receivable

	December 31, 2019	December 31, 2018
Notes receivable	<u>\$ 32,715</u>	<u>\$ 43,758</u>
Accounts receivable	<u>\$ 537,255</u>	<u>\$ 527,246</u>
Less: Allowance for bad debts — accounts receivable	<u>(13,900)</u>	<u>(16,063)</u>
	<u>\$ 523,355</u>	<u>\$ 511,183</u>

- A. The ageing analysis of accounts receivable and notes receivable is as follows:

	December 31, 2019		December 31, 2018	
	Accounts receivable	Notes receivable	Accounts receivable	Notes receivable
Within 120 days	\$ 486,992	\$ 31,840	\$ 478,032	\$ 42,011
121 to 180 days	23,564	-	34,940	872
181 to 360 days	18,580	-	5,448	875
Over 361 days	8,119	875	8,826	-
	<u>\$ 537,255</u>	<u>\$ 32,715</u>	<u>\$ 527,246</u>	<u>\$ 43,758</u>

The above ageing analysis was based on invoice date.

- B. As of December 31, 2019 and 2018, accounts receivable and notes receivable were all from contracts with customers. And as of January 1, 2018, the balance of receivables from contracts with

customers amounted to \$610,369.

C. As at December 31, 2019 and 2018, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the Group's notes and accounts receivable was \$32,715 and \$43,758; \$523,355 and \$511,183, respectively.

D. The Group does not hold any collateral as security.

E. Information relating to credit risk of accounts receivable and notes receivable is provided in Note 12(2).

(5) Inventories

	December 31, 2019		
	Cost	Allowance for valuation loss	Book value
Raw materials	\$ 263,913	(\$ 69,003)	\$ 194,910
Work in process	78,191	(6,030)	72,161
Semi-finished goods	189,546	(37,048)	152,498
Finished goods	85,831	(7,748)	78,083
Goods	140,779	(15,355)	125,424
Goods in transit	58,857	-	58,857
Unfinished constructions	319,622	-	319,622
	<u>\$ 1,136,739</u>	<u>(\$ 135,184)</u>	<u>\$ 1,001,555</u>

	December 31, 2018		
	Cost	Allowance for valuation loss	Book value
Raw materials	\$ 302,673	(\$ 58,842)	\$ 243,831
Work in process	54,831	(5,464)	49,367
Semi-finished goods	179,514	(37,090)	142,424
Finished goods	86,443	(7,518)	78,925
Goods	136,968	(15,230)	121,738
Goods in transit	29,146	-	29,146
Unfinished constructions	306,610	-	306,610
	<u>\$ 1,096,185</u>	<u>(\$ 124,144)</u>	<u>\$ 972,041</u>

The cost of inventories recognised as expense for the year:

	2019	2018
Cost of goods sold	\$ 1,810,796	\$ 1,845,722
Maintenance cost	33,248	33,443
Loss on decline in market value	13,075	7,703
Others	31,338	32,185
	<u>\$ 1,888,457</u>	<u>\$ 1,919,053</u>

(6) Property, plant and equipment

		2019

- A. The abovementioned equipment are all assets for its own use.
- B. The significant components of buildings include buildings, air conditioners, elevators and utility construction. Buildings are depreciated over 26 to 50 years, and others are depreciated over 10 to 20 years.
- C. Information about the property, plant and equipment that were pledged to others as collaterals is provided in Note 8.
- D. There were no borrowing costs capitalised as part of property, plant and equipment.

(7) Leasing arrangements – lessee

Effective 2019 (using the modified retrospective approach)

- A. The Group leases various assets including land, buildings (including land), transportation equipment and office equipment. Rental contracts are typically made for periods of 1 to 5 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose covenants, but leased assets may not be used as security for borrowing purposes.
- B. The carrying amount of right-of-use assets and the depreciation charge are as follows:

	At December 31, 2019
	Carrying amount
Land	\$ 901
Buildings (including land)	13,983
Transportation equipment	812
Office equipment	571
	\$ 16,267
	2019
	Depreciation charge
Land	\$ 28
Buildings (including land)	11,122
Transportation equipment	691
Office equipment	269
	\$ 12,110

- C. For the year ended December 31, 2019, the additions to right-of-use assets were \$4,038.
- D. The information on profit and loss accounts relating to lease contracts is as follows:

	2019
<u>Items affecting profit or loss</u>	
Interest expense on lease liabilities	\$ 742
Expense on short-term lease contracts	180
Expense on leases of low-value assets	132

- E. For the year ended December 31, 2019, the Group's total cash outflow for leases were \$12,884.
- F. Information about the right-of-use assets - land use right that were pledged to others as collateral is provided in Note 8.

(8) Other non-current assets

	December 31, 2019	December 31, 2018
Overdue receivable	\$ 35,228	\$ 35,395
Allowance for bad debts	(35,228)	(35,395)
– overdue receivable		
Prepayments for equipment	1,724	1,545
Guarantee deposits	11,221	8,403
Long-term prepaid rents	-	964
– land use rights		
Others	16,861	20,270
	<u>\$ 29,806</u>	<u>\$ 31,182</u>

A. Information about the long-term prepaid rents - land use rights that were pledged to others as collateral is provided in Note 8.

B. For the effects on initial application of IFRS 16 on January 1, 2019, please refer to Note 3(1). For details of significant accounts, please refer to Note 6(7).

(9) Short-term borrowings

Type of borrowings	December 31, 2019	Interest rate range	Collateral
Bank borrowings			
Unsecured borrowings	\$ 410,250	0.97% ~ 2.75%	None
Secured borrowings	21,525	3.45%	Please refer to Note 8
	<u>\$ 431,775</u>		

Type of borrowings	December 31, 2018	Interest rate range	Collateral
Bank borrowings			
Unsecured borrowings	<u>\$ 252,298</u>	0.99% ~ 2.79%	None

Unused lines of credit are as follows:

Type of borrowings	December 31, 2019	December 31, 2018
Bank borrowings		
Unsecured borrowings	\$ 685,154	\$ 824,852
Secured borrowings	129,150	156,520
	<u>\$ 814,304</u>	<u>\$ 981,372</u>

For collaterals on bank borrowings and book value information, please refer to Notes 7 and 8.

(10) Long-term borrowings

<u>Type of borrowings</u>	<u>Borrowing period and repayment term</u>	<u>Interest rate range</u>	<u>Collateral</u>	<u>December 31, 2019</u>
Installment-repayment borrowings				
Unsecured EUR borrowings	Borrowing period is from September 27, 2019 to September 27, 2021; interest is repayable monthly; principal is repayable in 24 installments from October 27, 2019.	0.40%	None	
				\$ 13,233
Less: Current portion (shown as "other current liabilities")				(7,550)
				<u>\$ 5,683</u>

The Group's long-term borrowings are nil as at December 31, 2018.

(11) Other payables

	<u>December 31, 2019</u>	<u>December 31, 2018</u>
Payable for wages and salaries and other short-term employee benefits	\$ 91,647	\$ 98,460
Others	37,637	33,224
	<u>\$ 129,284</u>	<u>\$ 131,684</u>

(12) Provisions for liabilities -current

	<u>2019</u>	<u>2018</u>
Warranty:		
At January 1	\$ 31,959	\$ 45,791
Additional provisions	24,508	24,956
Used during the year	(16,026)	(38,788)
At December 31	<u>\$ 40,441</u>	<u>\$ 31,959</u>

The Group's provisions for warranties are primarily for uninterruptible power supplies and solar energy related products. The provisions for warranties are estimated based on historical warranty data of uninterruptible power supplies and solar energy related products.

(13) Pensions

A. (a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company and its domestic subsidiaries contribute monthly an amount equal

to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company and its domestic subsidiaries would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method of the employees expected to qualify for retirement in the following year, the Company will make contributions to cover the deficit by next March.

(b) The amounts recognised in the balance sheet are as follows:

	<u>December 31, 2019</u>	<u>December 31, 2018</u>
Present value of funded defined benefit obligations	(\$ 56,160)	(\$ 52,807)
Fair value of plan assets	<u>32,746</u>	<u>31,046</u>
Net defined benefit liability	<u>(\$ 23,414)</u>	<u>(\$ 21,761)</u>

(c) Movements in net defined benefit liabilities are as follows:

	<u>2019</u>		
	<u>Present value of defined benefit obligations</u>	<u>Fair value of plan assets</u>	<u>Net defined benefit liability</u>
At January 1	(\$ 52,807)	\$ 31,046	(\$ 21,761)
Current service cost	(77)	-	(77)

At December 31	<u>(\$ 52,807)</u>	<u>\$ 31,046</u>	<u>(\$ 21,761)</u>

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company and its domestic subsidiaries have no right to participate in managing and operating that fund and hence the Company and its domestic subsidiaries are unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2019 and 2018 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(e) The principal actuarial assumptions used were as follows

	2019	2018
Discount rate	<u>0.75%</u>	<u>1.00%</u>
Future salary increases	<u>2.00%</u>	<u>2.00%</u>

Assumptions regarding future mortality experience are set based on the fifth Taiwan Standard Ordinary Experience Mortality Table (2012 TSO).

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis is as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
<u>December 31, 2019</u>				
Effect on present value of defined benefit	(\$ 1,566)	(\$ 1,630)	\$ 1,606	(\$ 1,551)
<u>December 31, 2018</u>				
Effect on present value of defined benefit	(\$ 1,509)	\$ 1,571	\$ 1,552	(\$ 1,498)

The sensitivity analysis above is based on one assumption which changed while the other conditions that remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

- (f) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2020 amounts to \$955.
- (g) As of December 31, 2019, the weighted average duration of the retirement plan is 11 years. The analysis of timing of the future pension payment was as follows:

Within 1 year	\$	1,057
1-2 year(s)		2,341
3-5 years		4,631
Over 5 years		52,755
	\$	<u>60,784</u>

- B. (a) Effective July 1, 2005, the Company has established a defined contribution pension plan (the “New Plan”) under the Labour Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contributes monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labour Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
- (b) The Company’s mainland China indirect subsidiaries, Ablere Electronics (Suzhou) Co., Ltd. and Ablere Electronics (Beijing) Corporation Limited, have a defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People’s Republic of China (PRC) are based on a certain percentage of employees’ monthly salaries and wages. The contribution percentage for the years ended December 31, 2019 and 2018 was both 20%. Other than the monthly contributions, the Group has no further obligations. Ablere Corporation, Ablere Latam Corporation,

Ablerex Electronics (S) Pte. Ltd., Ablerex Electronics (Thailand) Co Ltd., Ablerex Electronics Italy S.R.L and Wada Denki Co., Ltd. have a defined contribution plan under the local regulations and have no further obligations. Other consolidated subsidiaries do not have any employee.

- (c) The pension costs under the defined contribution pension plans of the Group for the years ended December 31, 2019 and 2018 were \$26,470 and \$25,947, respectively.

(14) Share capital

As of December 31, 2019, the Company's authorised capital was \$800,000, consisting of 80 million shares of ordinary stock, and the paid-in capital was \$450,000 with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected. The Group's ordinary shares at the beginning of the period are the same with the outstanding shares at the end of the period.

(15) Capital surplus

- A. Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Law requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. However, capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.
- B. The shareholders resolved to appropriate capital surplus in cash at their meeting on June 21, 2018:

	Year ended December 31, 2017	
	Amount	Cash per share (in dollars)
Capital surplus appropriated in cash	\$ 40,500	\$ 0.90

The cash appropriation of capital surplus is in agreement with the proposal submitted by the Board of Directors.

(16) Retained earnings

- A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior years' operating losses and then 10% of the remaining amount shall be set aside as legal reserve unless the accumulated legal reserve has reached the total capital stock balance. Special reserve shall be appropriated in accordance with related regulations promulgated by competent authorities, and the special reserve along with the accumulated unappropriated retained earnings from previous years is considered as the distributable earnings. The remainder, if any, after considering the operating status, and through a proposition by the Board of Directors and a resolution by the shareholders, shall be retained.
- B. The Company's dividend policy is based on the Company's current operation status, future capital requirements, long-term operation plan, shareholders' benefits, balanced dividends and the Company's long-term financial plan, etc. The appropriation is proposed by the Board of Directors and then approved by the shareholders during their meeting. Cash dividends shall not be less than 20% of the total dividends distributed to shareholders.

- C. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.
- D. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When the debit balance on other equity items is reversed subsequently, the reversed amount may be included in the distributable earnings.
- E. The appropriation of 2018 and 2017 earnings as resolved by the shareholders on June 18, 2019 and June 21, 2018 are as follows:

	Year ended December 31, 2018		Year ended December 31, 2017	
	Amount	Dividend per share (in dollars)	Amount	Dividend per share (in dollars)
Legal reserve	\$ 7,316		\$ 7,960	
Special reserve	4,907		29,535	
Cash dividends	67,500	\$ 1.50	72,000	\$ 1.60

- F. For information relating to employees' compensation and directors' and supervisors' remuneration, please refer to Note 6(21).

(17) Sales revenue

	2019	2018
Sales revenue	\$ 1,428,842	\$ 1,401,805
Project construction revenue	958,810	1,060,972
Service revenue	74,738	67,836
	<u>\$ 2,462,390</u>	<u>\$ 2,530,613</u>

A. Disaggregation of revenue from contracts with customers

The Group derives revenue from the transfer of goods and services over time and at a point in time in the following:

	First Business Division	Second Business Division	Technical Services Division	Energy Division	Reconciliation and elimination	Total
Year ended December 31, 2019						
Revenue from external customer contracts	\$ 781,386	\$ 1,231,714	\$ 215,480	\$ 233,810	\$ -	\$ 2,462,390
Inter-segment revenue	101,417	2,474,889	6,491	-	(2,582,797)	-
Total segment revenue	<u>\$ 882,803</u>	<u>\$ 3,706,603</u>	<u>\$ 221,971</u>	<u>\$ 233,810</u>	<u>(\$ 2,582,797)</u>	<u>\$ 2,462,390</u>
Segment income/(loss)	<u>\$ 74,246</u>	<u>\$ 73,003</u>	<u>\$ 92,957</u>	<u>\$ 4,677</u>	<u>(\$ 219,019)</u>	<u>\$ 25,864</u>
Timing of revenue recognition						
At a point in time	\$ 781,386	\$ 1,231,714	\$ 148,808	\$ 232,190	\$ -	\$ 2,394,098
Over time	-	-	66,672	1,620	-	68,292
	<u>\$ 781,386</u>	<u>\$ 1,231,714</u>	<u>\$ 215,480</u>	<u>\$ 233,810</u>	<u>\$ -</u>	<u>\$ 2,462,390</u>

Year ended December 31, 2018	First Business Division	Second Business Division	Technical Services Division	Energy Division	Reconciliation and elimination	Total
Revenue from external customer contracts	\$ 861,498	\$ 1,192,195	\$ 250,365	\$ 226,555	\$ -	\$ 2,530,613
Inter-segment revenue	130,872	2,725,250	9,045	-	(2,865,167)	-
Total segment revenue	<u>\$ 992,370</u>	<u>\$ 3,917,445</u>	<u>\$ 259,410</u>	<u>\$ 226,555</u>	<u>(\$ 2,865,167)</u>	<u>\$ 2,530,613</u>
Segment income/(loss)	<u>\$ 123,038</u>	<u>\$ 103,182</u>	<u>\$ 92,119</u>	<u>\$ 14,497</u>	<u>(\$ 248,204)</u>	<u>\$ 84,632</u>
Timing of revenue recognition						
At a point in time	\$ 861,498	\$ 1,192,195	\$ 189,394	\$ 226,040	\$ -	\$ 2,469,127
Over time	-	-	60,971	515	-	61,486
	<u>\$ 861,498</u>	<u>\$ 1,192,195</u>	<u>\$ 250,365</u>	<u>\$ 226,555</u>	<u>\$ -</u>	<u>\$ 2,530,613</u>

B. Contract liabilities

The Group has recognised the following revenue-related contract liabilities:

	December 31, 2019	December 31, 2018	January 1, 2018
Contract liabilities:			
Contract liabilities	\$ 163,135	\$ 234,440	\$ 155,751
– advance receipts for construction			
Contract liabilities			
– advance sales receipts	16,297	14,174	5,177
	<u>\$ 179,432</u>	<u>\$ 248,614</u>	<u>\$ 160,928</u>

(a) Significant changes in contract liabilities

None.

(b) Revenue recognised that was included in the contract liability balance at the beginning of the period

	2019	2018
Revenue recognised that was included in the contract liability balance at the beginning of the period		
Sales revenue	<u>\$ 162,401</u>	<u>\$ 79,995</u>

(18) Other income

	2019	2018
Interest income	\$ 951	\$ 1,311
Others	12,322	12,988
	<u>\$ 13,273</u>	<u>\$ 14,299</u>

(19) Other gains and losses

	2019	2018
Losses on disposals of property, plant and equipment	(\$ 485)	(\$ 548)
Profit from lease modification	12	-
Foreign exchange gains	11,124	14,409
Losses on financial liabilities at fair value through profit or loss	-	(5,969)
Others	(946)	(341)
	<u>\$ 9,705</u>	<u>\$ 7,551</u>

(20) Expenses by nature

By function By nature	2019			2018		
	Operating costs	Operating expenses	Total	Operating costs	Operating expenses	Total
Employee benefit expense	\$ 216,349	\$ 328,337	\$ 544,686	\$ 210,405	\$ 320,702	\$ 531,107
Depreciation charges	37,263	34,363	71,626	35,631	22,719	58,350
Amortization charges	145	9,738	9,883	467	9,681	10,148

(21) Employee benefit expense

	2019	2018
Wages and salaries	\$ 460,319	\$ 449,088
Labor and health insurance fees	41,320	38,587
Pension costs	26,762	26,286
Other personnel expenses	16,285	17,146
	<u>\$ 544,686</u>	<u>\$ 531,107</u>

A. In accordance with the Articles of Incorporation of the Company, a ratio of distributable profit of the current year, after covering accumulated losses, shall be distributed as employees' compensation and directors' and supervisors' remuneration. The ratio shall be 6% to 10% for employees compensation and shall not be higher than 2% for directors' and supervisors' remuneration.

B. For the years ended December 31, 2019 and 2018, employees' compensation was accrued at \$2,717 and \$6,262, respectively; while directors' and supervisors' remuneration was accrued at \$906 and \$2,087, respectively. The aforementioned amounts were recognized in salary expenses. The employees' compensation and directors' and supervisors' remuneration were estimated and accrued based on 6% and 2% of distributable profit of current period for the year ended December 31, 2019.

The difference of \$9 between employees' compensation (directors' and supervisors' remuneration) as resolved by the Board of Directors and the amount recognised in the 2018 financial statements of \$6,262, \$2,087 had been adjusted in profit or loss for 2019. The appropriation was in the form of cash.

Information about the appropriation of employees' compensation (bonus) and directors' and supervisors' remuneration by the Company as proposed by the Board of Directors and resolved will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

(22) Income tax

A. Income tax expense

(a) Components of income tax expense:

	2019	2018
Current tax:		
Current tax on profits for the year	\$ 11,423	\$ 20,119
Prior year income tax overestimation	(4,333)	(2,882)
Total current tax	<u>7,090</u>	<u>17,237</u>
Deferred tax:		
Origination and reversal of temporary differences	(4,300)	3,235
Impact of change in tax rate	-	8,646
Income tax expense	<u>\$ 2,790</u>	<u>\$ 29,118</u>

(b) The income tax (charge)/credit relating to components of other comprehensive income are as follows:

	2019	2018
Currency translation differences	(\$ 4,460)	(\$ 1,225)
Remeasurement of defined benefit obligations	(331)	7
Impact of change in tax rate	-	(771)
	<u>(\$ 4,791)</u>	<u>(\$ 1,989)</u>

B. Reconciliation between income tax expense and accounting profit:

	2019	2018
Tax calculated based on profit before tax and statutory tax rate	\$ 10,828	\$ 25,566
Effect from tax credit of investment	(3,705)	(2,212)
Prior year income tax overestimation	(4,333)	(2,882)
Effect from changes in tax regulation	-	8,646
Income tax expense	<u>\$ 2,790</u>	<u>\$ 29,118</u>

C. Amounts of deferred tax assets or liabilities as a result of temporary differences and investment tax credits are as follows:

	At January 1, 2019	Recognised in profit or loss	Recognised in other comprehensive income	At December 31, 2019
Temporary differences:				
–Deferred tax assets:				
Unrealised warranty provision	\$ 6,392	\$ 1,696	\$ -	\$ 8,088
Allowance for market value decline and loss for inventories	15,593	1,071	-	16,664
Accrued pension liabilities	4,352	-	331	4,683
Allowance for bad debts	6,516	(42)	-	6,474
Translation differences of foreign operations	1,192	-	4,460	5,652
Others	<u>3,109</u>	<u>536</u>	<u>-</u>	<u>3,645</u>
	<u>37,154</u>	<u>3,261</u>	<u>4,791</u>	<u>45,206</u>
–Deferred tax liabilities:				
Gain on foreign long-term equity investments	(83,010)	1,019	-	(81,991)
Others	(<u>20</u>)	<u>20</u>	<u>-</u>	<u>-</u>
	(<u>83,030</u>)	<u>1,039</u>	<u>-</u>	(<u>81,991</u>)
	<u>(\$ 45,876)</u>	<u>\$ 4,300</u>	<u>\$ 4,791</u>	<u>(\$ 36,785)</u>
	At January 1, 2018	Recognised in profit or loss	Recognised in other comprehensive income	At December 31, 2018
Temporary differences:				
–Deferred tax assets:				
Unrealised warranty provision	\$ 7,784	(\$ 1,392)	\$ -	\$ 6,392
Allowance for market value decline and loss for inventories	12,498	3,095	-	15,593
Accrued pension liabilities	3,705	(122)	769	4,352
Allowance for bad debts	5,657	859	-	6,516
Translation differences of foreign operations	-	-	1,192	1,192
Others	<u>2,118</u>	<u>991</u>	<u>-</u>	<u>3,109</u>
	<u>31,762</u>	<u>3,431</u>	<u>1,961</u>	<u>37,154</u>
–Deferred tax liabilities:				
Gain on foreign long-term equity investments	(76,181)	(6,829)	-	(83,010)
Translation differences of foreign operations	(28)	-	28	-
Others	(<u>183</u>)	<u>163</u>	<u>-</u>	(<u>20</u>)
	(<u>76,392</u>)	(<u>6,666</u>)	<u>28</u>	(<u>83,030</u>)
	<u>(\$ 44,630)</u>	<u>(\$ 3,235)</u>	<u>\$ 1,989</u>	<u>(\$ 45,876)</u>

D. The Company's income tax returns through 2017 have been assessed and approved by the Tax Authority.

E. Under the amendments to the Income Tax Act which was promulgated by the President of the Republic of China in February, 2018, the Company's applicable income tax rate was raised from 17% to 20% effective from January 1, 2018. The Group has assessed the impact of the change in income tax rate.

(23) Earnings per share

	2019		
	Amount after tax	Weighted average number of ordinary shares outstanding (shares in thousands)	Earnings per share (in dollars)
<u>Basic earnings per share</u>			
Profit attributable to ordinary shareholders of the parent company	\$ 39,500	45,000	\$ 0.88
<u>Diluted earnings per share</u>			
Profit attributable to ordinary shareholders of the parent company	39,500	45,000	
Assumed conversion of all dilutive potential ordinary shares			
Employees' compensation	-	118	
Profit attributable to ordinary shareholders of the parent plus assumed conversion of all dilutive potential ordinary shares	\$ 39,500	45,118	\$ 0.88
	2018		
	Amount after tax	Weighted average number of ordinary shares outstanding (shares in thousands)	Earnings per share (in dollars)
<u>Basic earnings per share</u>			
Profit attributable to ordinary shareholders of the parent company	\$ 73,156	45,000	\$ 1.63
<u>Diluted earnings per share</u>			
Profit attributable to ordinary shareholders of the parent company	73,156	45,000	
Assumed conversion of all dilutive potential ordinary shares			
Employees' compensation	-	223	
Profit attributable to ordinary shareholders of the parent plus assumed conversion of all dilutive potential ordinary shares	\$ 73,156	45,223	\$ 1.62

(24) Transactions with non-controlling interest

- A. Subsidiary Ablrex-Latam of the Group increased its capital to employees on February 7, 2019. As a result, the Group decreased its share interest by 14%. The transaction increased non-controlling interest by \$1,784 and decreased the equity attributable to owners of parent by \$1,784.
- B. The Group did not conduct any transaction with non-controlling interest for the year ended December 31, 2018.

(25) Operating leases

Effective 2018

The Group leases offices and company vehicles under non-cancellable operating lease agreements. The lease terms are between 2015 and 2019, and most of these lease agreements are renewable at the end of lease period. The Group recognised rental expenses of \$11,913 for these leases in profit or loss for the year ended December 31, 2018. The future aggregate minimum lease payments payable under non-cancellable operating leases are as follows:

	December 31, 2018
Not later than one year	\$ 8,231
Later than one year but not later than five years	3,291
	<u>\$ 11,522</u>

7. Related Party Transactions

(1) Names of related parties and relationship

Names of related parties	Relationship with the Company
United Integrated Services Co., Ltd.	The entity using equity method to account for the investment in the Company
Beijing Xiankong Technology Co., Ltd.	Other related party
Directors, supervisors, general manager and vice general manager	The Group's key management
United Integrated Services Co., Ltd.(JIANGXI)	Other related party
Eco Energy Corporation	Other related party

(2) Significant related party transactions and balances

A. Sales revenue

	2019	2018
Sales revenue		
Entities with significant influence to the Group	\$ 165,930	\$ 1,877
Other related parties	1,530	-
	<u>\$ 167,460</u>	<u>\$ 1,877</u>

The transaction prices and terms of the Group and entities with significant influence over the Group are determined in accordance with the agreed contracts. The credit term is commensurate with non-related parties, which is 60~120 days after monthly billings.

B. Leasing arrangements - lessee

(a) The Group leased office and plant from United Integrated Services Co., Ltd. Rental contracts are typically made for periods from 2019 to 2020. Rents are paid at the end of each month.

(b) Acquisition of right-of-use assets

On January 1, 2019 (the date of initial application of IFRS 16), the Group increased right-of-use assets by \$10,340.

(c) Rent expense

	2018
United Integrated Services Co., Ltd.	\$ <u>4,362</u>

The Group adopted the Statement of Financial Accounting Standards No.17 in 2018 and recognised rent expense accordingly. On January 1, 2019 (the date of initial application of IFRS 16), the Group would recognise lease contract of United Integrated Services Co., Ltd. as lease liability and recognises interest expense over the lease term. Hence, there was no rent expense for the year ended December 31, 2019.

(d) Lease liabilities

i. Outstanding balance

	December 31, 2019
United Integrated Services Co., Ltd.	\$ <u>6,251</u>

ii. Interest expense

	2019
United Integrated Services Co., Ltd.	\$ <u>132</u>

C. Accounts receivable from related parties

	December 31, 2019	December 31, 2018
Accounts receivable		
Entities with significant influence to the Group	\$ 16,993	\$ 10,084
Other related parties	<u>23</u>	<u>-</u>
	\$ <u>17,016</u>	\$ <u>10,084</u>

D. Endorsements and guarantees

As of December 31, 2019, and 2018, there were unsecured bank borrowings amounting to \$410,250 and \$252,298, respectively. The Company's key management was a joint guarantor.

E. Commitments

Promissory notes issued for the warranty of sales and performance guarantees of lease contracts.

	December 31, 2019	December 31, 2018
Entities with significant influence to the Group	\$ <u>11,532</u>	\$ <u>1,220</u>

(3) Key management compensation

	2019	2018
Salaries and other short-term employee benefits	\$ 32,309	\$ 29,998
Termination benefits	879	898
	<u>\$ 33,188</u>	<u>\$ 30,896</u>

8. Pledged Assets

The Group's assets pledged as collateral are as follows:

Pledged assets	Book value		Purpose
	December 31, 2019	December 31, 2018	
Other current assets	\$ 194	\$ 194	Performance guarantee for contracts
— time deposits			
Property, plant and equipment	115,203	125,193	Short-term borrowings or guarantee for line of credit
— land and buildings			
Other non-current assets			Short-term borrowings or guarantee for line of credit
— long-term prepaid rent	-	964	
Right-of-use assets			Short-term borrowings or guarantee for line of credit
— land use rights	901	-	
	<u>\$ 116,298</u>	<u>\$ 126,351</u>	

9. Significant Contingent Liabilities and Unrecognized Contract Commitments

(1) Contingencies

None.

(2) Commitments

A. As of December 31, 2019 and 2018, other than the details of contingencies and commitments between the Group and related parties as provided in Note 7(2) E, contingencies and commitments between the Group and third parties are as follows:

Capital expenditure contracted for at the balance sheet date but not yet incurred

	December 31, 2019	December 31, 2018
Property, plant and equipment	\$ -	\$ 3,067
Intangible assets	381	-
	<u>\$ 381</u>	<u>\$ 3,067</u>

Warranty and performance guarantee

As of December 31, 2019 and 2018, promissory notes issued for the warranty and performance guarantee of sales amounted to \$82,229 and \$71,690, respectively.

B Details of operating lease agreements are provided in Note 6(25).

C Details of endorsements/guarantees provided by the Company to subsidiaries are provided in Note 13(1) B.

10. Significant Disaster Loss

None.

11. Significant Events after the Balance Sheet Date

- (1) The appropriations of 2019 earnings had been proposed by the Board of Directors on March 19, 2020. Details are summarized below:

	2019	
	Amount	Dividends per share
Legal reserve	\$ 3,639	
Special reserve	17,841	
Cash dividends	31,500	\$ 0.70

As of March 19, 2020, the appropriations of 2019 earnings has not been resolved at the stockholders' meeting.

- (2) On March 19, 2020, the Board of Directors proposed to appropriate \$0.30 (in dollars) per share in case with the capital surplus equivalent to \$734,378 arising from paid-in capital in excess of par value on issuance of common stock. As of March 19, 2020, the appropriations has not been resolved at the shareholders' meeting.

12. Others

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure with reasonable cost of funds. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as total liabilities divided by total assets.

In 2019, the Group's strategy, which was unchanged from 2018, was to maintain the gearing ratio of about 40%. The gearing ratios at December 31, 2019 and 2018 were as follows:

	December 31, 2019	December 31, 2018
Total liabilities	\$ 1,372,989	\$ 1,183,138
Total equity	1,481,332	1,528,739
Total assets	\$ 2,854,321	\$ 2,711,877
Gearing ratio	48%	44%

(2) Financial instruments

A. Financial instruments by category

	<u>December 31, 2019</u>	<u>December 31, 2018</u>
<u>Financial assets</u>		
Financial assets at amortised cost		
Cash and cash equivalents	\$ 224,475	\$ 186,063

(including current portion)	13,233	-
Guarantee deposits received	70	72
	<u>\$ 1,021,397</u>	<u>\$ 759,431</u>
Lease liability	<u>\$ 15,606</u>	<u>\$ -</u>

B. Financial risk management policies

- (a) The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. To minimise any adverse effects on the financial performance of the Group, derivative financial instruments, such as foreign exchange forward contracts and foreign currency option contracts are used to hedge certain exchange rate risk, and interest rate swaps are used to fix variable future cash flows. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.

- (b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the board of directors. Group treasury identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD and RMB. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities.
- ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Group treasury. Exchange rate risk is measured through a forecast of highly probable USD and RMB expenditures. Forward foreign exchange contracts are adopted to minimise the volatility of the exchange rate affecting cost of forecast inventory purchases.
- iii. The Group hedges foreign exchange rate by using forward exchange contracts. However, the Group does not adopt hedging accounting.
- iv. The Group's businesses involve some non-functional currency operations (the Company's functional currency: NTD; other certain subsidiaries' functional currency: USD and RMB). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(Foreign currency: <u>Functional currency</u>)	<u>December 31, 2019</u>			Degree of variation	<u>2019</u>	
	Foreign currency amount	Exchange	Book value		Effect on profit or loss before	Effect on other
	<u>(In thousands)</u>	<u>rate</u>	<u>(NTD)</u>		<u>tax</u>	<u>comprehensive income</u>
<u>Financial assets</u>						
<u>Monetary items</u>						
USD:NTD	\$ 6,307	29.98	\$ 189,084	1%	\$ 1,891	\$ -
RMB:NTD	4,477	4.305	19,273	1%	193	-
JPY:NTD	17,874	0.276	4,933	1%	49	-
USD:RMB	848	6.964	25,423	1%	254	-
SGD:USD	615	0.7432	13,703	1%	137	-
<u>Financial liabilities</u>						
<u>Monetary items</u>						
USD:NTD	\$ 1,883	29.98	\$ 56,452	1%	\$ 565	\$ -
USD:RMB	387	6.964	11,602	1%	116	-
SGD:USD	182	0.7432	4,055	1%	41	-

(Foreign currency: Functional currency)	December 31, 2018			2018		
	Foreign currency amount (In thousands)	Exchange rate	Book value (NTD)	Degree of variation	Effect on profit or loss before tax	Effect on other comprehensive income
<u>Financial assets</u>						
<u>Monetary items</u>						
USD:NTD	\$ 6,901	30.72	\$ 211,964	1%	\$ 2,120	\$ -
RMB:NTD	7,260	4.47	32,467	1%	325	-
SGD:USD	1,176	0.73	26,437	1%	264	-
<u>Financial liabilities</u>						
<u>Monetary items</u>						
USD:NTD	\$ 1,401	30.72	\$ 43,032	1%	\$ 430	\$ -
USD:RMB	404	6.87	12,409	1%	124	-
SGD:USD	562	0.73	12,634	1%	126	-

- v. The total exchange gain arising from significant foreign exchange variation on the monetary items held by the Group for the years ended December 31, 2019 and 2018, amounted to \$11,124 and \$14,409, respectively.

Price risk

- The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.
- The Group's investments in equity securities comprise unlisted shares issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, Other components of equity would have increased/decreased by \$810 and \$0, respectively, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

The Group's borrowings are mostly with fixed interest rate and maturity within one year. Therefore, the Group does not expect to be exposed to significant interest rate risk.

(b) Credit risk

- Credit risk refers to the risk of financial loss to the Group arising from default by the clients on the contract obligations. The main factor is that counterparties could not repay in full the contract cash flows of accounts receivable, notes receivable and amortized cost financial assets based on the agreed terms.

- ii. The Group manages their credit risk taking into consideration the entire group's concern. For banks and financial institutions, only independently rated parties with a minimum rating of investment grade or above are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the management. The utilisation of credit limits is regularly monitored. The main credit risk arises from wholesale and retail customers, including outstanding receivables.
- iii. The Group adopts the assumptions under IFRS 9, there has been a significant increase in credit risk on that instrument since initial recognition, when the contract payments were past due over 30 days.
- iv. The Group adopts the assumptions under IFRS 9, the default occurs when the contract payments are past due over 90 days.
- v. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
 - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
 - (ii) Default or delinquency in interest or principal repayments;
 - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.
- vi. The Group classifies customers' accounts receivable in accordance with sales area. The Group applies the modified approach using provision matrix to estimate expected credit loss under the provision matrix basis.
- vii. The Group wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Group will continue executing the recourse procedures to secure their rights. On December 31, 2019 and 2018, the Group's written-off financial assets that are still under recourse procedures amounted to \$35,228 and \$35,395, respectively.
- viii. The Group used the forecastability of Taiwan Institute of Economic Research boom observation report to adjust historical and timely information to assess the default possibility of accounts receivable. On December 31, 2019 and 2018, the provision matrix is as follows:

	Not overdue	Overdue within 30 days	Overdue within 60 days	Overdue within 90 days	Overdue for more than 90 days	Total
<u>At December 31, 2019</u>						
Expected loss rate	0.03%	0.17~1.28%	37~71%	38~84%	50~100%	
Total book value	\$ 496,139	\$ 12,847	\$ 8,260	\$ 3,584	\$ 16,425	\$ 537,255
Loss allowance	149	164	3,829	1,545	8,213	13,900
<u>At December 31, 2018</u>						
Expected loss rate	0.03%	0.17~1.28%	37~71%	38~84%	50~100%	
Total book value	\$ 483,995	\$ 24,620	\$ 6,820	\$ 1,993	\$ 9,818	\$ 527,246
Loss allowance	145	605	4,262	1,747	9,304	16,063

- ix. Movements in relation to the Group applying the modified approach to provide loss allowance for accounts receivable are as follows:

	2019	
	Accounts receivable	Overdue receivable
At January 1	\$ 16,063	\$ 35,395
Reversal of impairment loss	(2,033)	-
Effect of foreign exchange	(130)	(167)
At December 31	<u>\$ 13,900</u>	<u>\$ 35,228</u>
	2018	
	Accounts receivable	Overdue receivable
At January 1	\$ 19,129	\$ 36,240
Reversal of impairment loss	(3,068)	(550)
Write-offs	-	(550)
Effect of foreign exchange	40	217
Transfer	(38)	38
At December 31	<u>\$ 16,063</u>	<u>\$ 35,395</u>

(c) Liquidity risk

- Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs.
- Surplus cash held by the operating entities over and above balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits and other cash equivalents, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the above-mentioned forecasts.

- iii. The table below analyses the Group's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities

		Less than 3	Between 3		
		months	months and 1		
December 31, 2019			year	Over 1 year	Book value
Short-term borrowings	\$	411,344	\$ 21,525	\$ -	\$ 432,869
Notes payable		7,006	-	-	7,006
Accounts payable		428,784	11,245	-	440,029
Other payables		116,088	12,212	984	129,284
Lease liability		2,748	7,831	5,558	16,137
Long-term borrowings (including current portion)		1,897	5,753	7,671	15,321

		Less than 3	Between 3		
		months	months and 1		
December 31, 2018			year	Over 1 year	Book value
Short-term borrowings	\$	252,527	\$ -	\$ -	\$ 252,527
Notes payable		3,630	-	-	3,630
Accounts payable		354,024	17,723	-	371,747
Other payables		107,618	21,410	2,656	131,684

- iv. The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in unlisted stocks is included in Level 3.

B. Financial instruments not measured at fair value.

The Group's carrying amounts of cash and cash equivalents, notes receivable, accounts receivable, other receivables, accounts payable and other payables are approximate to their fair values. The carrying amounts are provided in Note 12(2)A.

C. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities is as follows:

The related information of natures of the assets and liabilities is as follows:

<u>December 31, 2019</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
Equity securities	\$ -	\$ -	\$ 81,000	\$ 81,000

As of December 31, 2018, there are no financial instruments measured at fair value. Therefore, there are no related information disclosed.

D. The methods and assumptions the Group used to measure fair value are as follows:

(a) When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

(b) The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.

E. For the years ended December 31, 2019 and 2018, there was no transfer between Level 1 and Level 2.

F. For the years ended December 31, 2019 and 2018, there was no transfer into or out from Level 3.

G. Financial segment is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.

H. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at December 31, 2019	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Unlisted shares	\$ 81,000	Market comparable companies	Discount for lack of marketability	25%	The higher the discount for lack of marketability, the lower the fair value

13. Supplementary Disclosures

(1) Significant transaction information

The Group discloses related information of the following for the year ended December 31, 2019:

A. Loans to others: Please refer to table 1.

B. Provision of endorsements and guarantees to others: Please refer to table 2.

C. Holding of marketable securities at the end of the period (not including subsidiaries, associates and joint ventures): Please refer to table 3.

D. Acquisition or sale of the same security with the accumulated cost exceeding \$300 million or 20% of the Company's paid-in capital: None.

E. Acquisition of real estate reaching \$300 million or 20% of paid-in capital or more: None.

F. Disposal of real estate reaching \$300 million or 20% of paid-in capital or more: None.

G. Purchases or sales of goods from or to related parties reaching \$100 million or 20% of paid-in capital or more: Please refer to table 4.

H. Receivables from related parties reaching \$100 million or 20% of paid-in capital or more: Please refer to table 5.

I. Derivative financial instruments undertaken for the year ended December 31, 2019: None.

J. Significant inter-company transactions for the year ended December 31, 2019: Please refer to table 6.

(2) Information on investees (not including investees in Mainland China)

Please refer to table 7.

(3) Information on investments in Mainland China

A. Basic information: Please refer to table 8.

B. Significant transactions, either directly or indirectly through a third area, with investee companies in the Mainland Area:

(a) Purchasing amount and percentage and related receivables' percentage and balance at December 31, 2019: Please refer to tables 6 and 9.

(b) Selling amount and percentage and related receivables' percentage and balance at December 31, 2019: Please refer to tables 6 and 9.

(c) Property transaction amounts and gains and loss arising from them: None.

- (d) Balance and purpose of provision of endorsements/guarantees or collaterals at December 31, 2019: None.
- (e) Maximum balance, ending balance, interest rate range and interest for financing during the year ended and at December 31, 2019: Please refer to table 1.
- (f) Other significant transactions that affected the gains and loss or financial status for the period, i.e. rendering/receiving of service: Please refer to table 9.

14. Segment Information

(1) General information

Management has determined the reportable operating segments based on the reports reviewed by the Chief Operating Decision-Maker that are used to make strategic decisions. The Group has three reportable operating segments: First Business Division, Second Business Division and Technical Services Division. The primary sources of revenue from products and services are as follows:

First Business Division	: Promotes domestic sales of consigned and self-manufactured products
Second Business Division	: Responsible for international sales and market promotion of self-manufactured products
Technical Services Division	: Responsible for the installation, testing, and warranty of products, as well as development of the repair and maintenance business line, and purchases and sales of spare parts and miscellaneous
Energy Division	: Domestic sales and market promotion of self-manufactured energy-related products

(2) Measurement of segment information

The accounting policies for the Group's operating segments are in agreement with the summary of significant accounting policies mentioned in Note 2 of the consolidated financial statements. The Group's Chief Operating Decision-Maker uses income before tax as the basis to evaluate each segment's performance.

(3) Information about segment profit and loss

The segment information provided to the Chief Operating Decision-Maker for the reportable segments is as follows:

2019	First Business Division	Second Business Division	Technical Services Division	Energy Division	Reconciliation and elimination	Total
Revenue from external customer contracts	\$ 781,386	\$ 1,231,714	\$ 215,480	\$ 233,810	\$ -	\$ 2,462,390
Inter-segment revenue	101,417	2,474,889	6,491	-	(2,582,797)	-
Total segment revenue	<u>\$ 882,803</u>	<u>\$ 3,706,603</u>	<u>\$ 221,971</u>	<u>\$ 233,810</u>	<u>(\$ 2,582,797)</u>	<u>\$ 2,462,390</u>
Segment income/(loss)	<u>\$ 74,246</u>	<u>\$ 73,003</u>	<u>\$ 92,957</u>	<u>\$ 4,677</u>	<u>(\$ 219,019)</u>	<u>\$ 25,864</u>

2018	First Business Division	Second Business Division	Technical Services Division	Energy Division	Reconciliation and elimination	Total
Revenue from external customer contracts	\$ 861,498	\$ 1,192,195	\$ 250,365	\$ 226,555	\$ -	\$ 2,530,613
Inter-segment revenue	130,872	2,725,250	9,045	-	(2,865,167)	-
Total segment revenue	<u>\$ 992,370</u>	<u>\$ 3,917,445</u>	<u>\$ 259,410</u>	<u>\$ 226,555</u>	<u>(\$ 2,865,167)</u>	<u>\$ 2,530,613</u>
Segment income/(loss)	<u>\$ 123,038</u>	<u>\$ 103,182</u>	<u>\$ 92,119</u>	<u>\$ 14,497</u>	<u>(\$ 248,204)</u>	<u>\$ 84,632</u>

The adoption of IFRS 16, 'Leases', had the following impact on the segment information in 2019.

	First Business Division	Second Business Division	Technical Services Division	Energy Division	Reconciliation and elimination	Total
Depreciation expense increased	<u>\$ 1,353</u>	<u>\$ 5,476</u>	<u>\$ 547</u>	<u>\$ 1,166</u>	<u>\$ 3,568</u>	<u>\$ 12,110</u>

(4) Reconciliation for segment income (loss)

Sales between segments are carried out at arm's length. The revenue from external customers reported to the Chief Operating Decision-Maker is measured in a manner consistent with that in the statement of comprehensive income.

Reconciliations of reportable segment income to the income before tax from continuing operations for the years ended December 31, 2019 and 2018 are as follows:

	2019	2018
Reportable segments income before tax	\$ 25,864	\$ 84,632
Other income	13,273	14,299
Other gains and losses	9,705	7,551
Finance costs	(5,497)	(2,448)
Income before tax from continuing operations	<u>\$ 43,345</u>	<u>\$ 104,034</u>

The Group did not provide the total assets and total liabilities amounts to the Chief Operating Decision-Maker.

(5) Information on products and services

Detailed breakdown of the Group's net sales for the years ended December 31, 2019 and 2018 are as follows:

	2019	2018
Project construction	\$ 958,810	\$ 1,060,839
Uninterruptible power supplies	986,409	935,361
Active power filters	124,413	156,369
Photovoltaic devices	32,670	27,170
Service revenue	74,738	67,836
Others	285,350	283,038
	<u>\$ 2,462,390</u>	<u>\$ 2,530,613</u>

(6) Geographical information

The Group's geographical information for the years ended December 31, 2019 and 2018 are as follows:

	2019		2018	
	Revenue	Non-current assets	Revenue	Non-current assets
Taiwan	\$ 1,075,536	\$ 790,320	\$ 1,162,703	\$ 828,337
Japan	5,660	1,277	8,940	195
Turkey	71,585	-	92,420	-
Italy	179,276	6,647	182,753	4,389
USA	69,531	12,609	83,665	11,044
Germany	84,725	-	66,300	-
Singapore	86,991	57,662	96,240	59,011
Others	889,086	-	837,592	-
	<u>\$ 2,462,390</u>	<u>\$ 868,515</u>	<u>\$ 2,530,613</u>	<u>\$ 902,976</u>

(7) Major customer information

Major customer information of the Group for the years ended December 31, 2019 and 2018 are as follows:

	2019		2018	
	Revenue	Segment	Revenue	Segment
A	\$ 238,692	Second Business Division	\$ 282,672	Second Business Division
F	101,797	First Business Division	331,103	First Business Division

ABLEREX ELECTRONICS CO., LTD. AND SUBSIDIARIES

Loans to others

													Item	Value			
0	The Company	Ablerex-IT	Other receivables	Y	\$ 24,848 (USD 800 thousand)	\$0 (USD 0 thousand)	\$0 (USD 0 thousand)	3.80%	Short-term financing	\$ -	Turnover of operation	\$ -	None	\$ -	\$ 293,738	\$ 587,476	Note 1 Note 4
0	The Company	Ablerex-LATAM	Other receivables	Y	31,040 (USD 1,000 thousand)	29,980 (USD 1,000 thousand)	20,497 (USD 684 thousand)	5.00%	Short-term financing	-	Turnover of operation	-	None	-	293,738	587,476	Note 1 Note 7
1	Ablerex-USA	Ablerex-IT	Other receivables	Y	7,765 (USD 250 thousand)	0 (USD 0 thousand)	0 (USD 0 thousand)	3.50%	Short-term financing	-	Turnover of operation	-	None	-	293,738	587,476	Note 1 Note 3 Note 6
2	Ablerex-HK	Ablerex-SZ	Other receivables	Y	93,180 (USD 3,000 thousand)	89,940 (USD 3,000 thousand)	59,960 (USD 2,000 thousand)	2.475%	Short-term financing	-	Turnover of operation	-	None	-	293,738	587,476	Note 1 Note 2 Note 5

Note 1: In accordance with the Company's "Procedures for Provision of Loans", limit on total loans to others is 40% of the Company's net assets. Limit on loans to a single party with business transactions is the higher value of purchases or sales during current year on the year of financing. Limit on loans to a single party with short-term financing is 20% of the Company's net assets; but limit on total loans to subsidiaries is 40% of the parent company's current net assets. Furthermore, for the foreign companies which the Group holds 100% of the voting rights directly or indirectly, limit on loans is not restricted.

Note 2: In accordance with the Ablerex-HK's "Procedures for Provision of Loans", limit on total loans to others is 40% of the parent company's net assets. Limit on loans to a single party with business transactions is the higher value of purchases or sales during current year. Limit on loans to a single party with short-term financing is 20% of the parent company's net assets; but limit on total loans to subsidiaries is 40% of the parent company's current net assets. Furthermore, for the foreign companies which the Group holds 100% of the voting rights directly or indirectly, limit on loans is not restricted. The deadline of each loan is 1 year from the lending day.

Note 3: In accordance with the Ablerex-USA's "Procedures for Provision of Loans", limit on total loans to others is 40% of the parent company's net assets. Limit on loans to a single party with business transactions is the higher value of purchases or sales during current year. Limit on loans to a single party with short-term financing is 20% of the parent company's net assets. Each loan matures within one year after it is lent except for financing among entities who directly or indirectly own 100% voting right of the Company's parent company.

Note 4: The maximum credit to be drawn as approved by the Board of Directors was USD 800 thousand. The period-end available credit balance was USD 0 thousand. The actual amount drawn was USD 0 thousand.

Note 5: The maximum credit to be drawn as approved by the Board of Directors was USD 3,000 thousand. The period-end available credit balance was USD 3,000 thousand. The actual amount drawn was USD 2,000 thousand.

Note 6: The maximum credit to be drawn as approved by the Board of Directors was USD 250 thousand. The period-end available credit balance was USD 0 thousand. The actual amount drawn was USD 0 thousand.

Note 7: The maximum credit to be drawn as approved by the Board of Directors was USD 1,000 thousand. The period-end available credit balance was USD 1,000 thousand. The actual amount drawn was USD 684 thousand.

ABLEREX ELECTRONICS CO., LTD. AND SUBSIDIARIES

Provision of endorsements and guarantees to others

For the year ended December 31, 2019

Table 2

Expressed in thousands of NTD

(Except as otherwise indicated)

Number	Endorser/ guarantor	Party being endorsed/guaranteed		Limit on endorsements/ guarantees provided for a single party (Note 3)	Maximum outstanding endorsement/ guarantee amount as of December 31, 2019	Outstanding endorsement/ guarantee amount at December 31, 2019	Actual amount drawn down	Amount of endorsements/ guarantees secured with collateral	Ratio of accumulated endorsement/ guarantee amount to net asset value of the endorser/ guarantor company	Ceiling on total amount of endorsements/ guarantees provided	Provision of endorsements/ guarantees by parent company to subsidiary	Provision of endorsements/ guarantees by subsidiary to parent company	Provision of endorsements/ guarantees to the party in Mainland China	Footnote
		Company name	Relationship with the endorser/ guarantor											
0	The Company	Ablerex-HK	Subsidiary	\$ 734,345	\$ 232,950	\$ 224,850	\$ 25,483	\$ -	15%	\$ 734,345	Y	N	N	Note 1 Note 2

Note1: In accordance with the Company's "Procedures for Provision of Endorsements and Guarantees", limit on the Company endorsements/guarantees to others is 50% of the Company's net assets. Limit on the Company's endorsements/guarantees to a single party is 20% of the Company's net assets, and limit on endorsements/guarantees for companies with business relations is the higher value of purchases or sales during current year.

Note 2: Relationship between the endorser/guarantor and the party being endorsed/guaranteed is classified into the following six categories:

(1) Having business relationship.

(2) The endorser/guarantor parent company owns directly and indirectly more than 50% voting shares of the endorsed/guaranteed subsidiary.

(3) The endorsed/guaranteed company owns directly and indirectly more than 50% voting shares of the endorser/guarantor parent company.

(4) The endorser/guarantor parent company owns directly and indirectly more than 90% voting shares of the endorsed/guaranteed company.

(5) Mutual guarantee of the trade made by the endorsed/guaranteed company or joint contractor as required under the construction contract.

(6) Due to joint venture, all shareholders provide endorsements/guarantees to the endorsed/guaranteed company in proportion to its ownership.

Note 3: Transactions made with Ablerex-HK is higher than 50% of the Company's net assets, which is over the limit on the Company endorsements/guarantees to others.

Thus, the limit on the Company endorsements/guarantees to Ablerex-HK is 50% of the Company's net assets.

ABLEREX ELECTRONICS CO., LTD. AND SUBSIDIARIES

Holding of marketable securities at the end of the period (not including subsidiaries, associates and joint ventures)

For the year ended December 31, 2019

		Ablerex-SG	1	Sales	148,918	Note 5	6%
		Ablerex-SG	1	Accounts Receivable	49,388		2%
		Ablerex-IT	1	Sales	78,464	Note 5	3%
		Ablerex-IT	1	Accounts Receivable	26,381		1%
		Ablerex-IT	1	Selling Expense	12,648		1%
		Ablerex-LATAM	1	Sales	23,753	Note 5	1%
		Ablerex-LATAM	1	Accounts Receivable	16,591		1%
		Ablerex-LATAM	1	Other Receivables	20,497	Note 8	1%
		Ablerex-HK	3	Purchases	897,235	Note 4	36%
		Ablerex-SZ	3	Sales	38,129	Note 6	2%
		Ablerex-SZ	3	Accounts Payable	117,508		4%
		Ablerex-SZ	3	Other Receivables	61,242	Note 7	2%
2	Ablerex-SZ	Ablerex-BJ	3	Sales	83,316	Note 5	3%
		Ablerex-BJ	3	Purchases	15,971	Note 5	1%
		Ablerex-BJ	3	Accounts Receivable	21,593		1%
3	Ablerex-SG	Ablerex-TH	3	Sales	29,834	Note 5	1%

Note 1: The numbers filled in for the transaction company in respect of inter-company transactions are as follows:

- (1) Parent company is '0'.
- (2) The subsidiaries are numbered in order starting from '1'.

Note 2: Relationship between transaction company and counterparty is classified into the following three categories:

- (1) Parent company to subsidiary.
- (2) Subsidiary to parent company.
- (3) Subsidiary to subsidiary.

Note 3: Regarding percentage of transaction amount to consolidated total operating revenues or total assets, it is computed based on period-end balance of transaction to consolidated total assets for balance sheet accounts and based on accumulated transaction amount for the period to consolidated total operating revenues for income statement accounts.

Note 4: Ablerex-HK conducted purchases from Ablerex-SZ, whereby the prices were based on Ablerex-SZ's production costs. The purchases were then resold to Ablerex with a zero contribution margin; the term for receivables and payables is Net 60 days E.O.M.

Note 5: Transaction prices are determined according to the agreements between the parties; the credit term is coherent with general customers.

Note 6: Ablerex-HK conducts purchases from Ablerex, whereby the prices were determined according to the agreements between the parties. The purchases were then sold to Ablerex-SZ with a zero contribution margin; the credit term is coherent with general customers.

Note 7: Ablerex-HK loan to Ablerex-SZ, of which \$60,065 calculated interest against agreed interest rate 2.475% per annum and the rest was for business demand.

Note 8: Ablerex loan to Ablerex-Latam, of which \$20,497 calculated interest against agreed interest rate 5% per annum and the rest was for business demand.
